## Women Who Call Up Their Husbands and Talk During Business Hours

Make Trouble in the Office and Also Give a Poor Impression of Themselves-This Is an Unfair, Unkind Practice

But the office boy came back and reported that the secretary was talking on the telephone.

So Mr. Jones had to wait until his secretary got through talking. Of course, he didn't know what the

conversation was, or he wouldn't have waited so patiently. In fact, after a few more experiences of the same kind, he did investigate the matter and he did find out what the conversations were all about.

And this is what Mr. Jones' secretary was having a conversation about when his "boss" wanted him in a hurry:
"Well, listen, Ed." the feminine voice at the other end of the wire was saying plaintively: "Sarah's going to get one of them elected words on the subject. saying plaintively: "Sarah's going to get one of those electric percolators and I know I could get one for less than hers cost if you'd only go with me this afternoon to look around for them. How Ammonia Received its Name

Ammonia received its name from a building near the place where it was first made. Arabian chemists first pro-duced ammonia by heating the dung of camels, and the name was given to it because the Temple of Jupiter Ammon was close to the place where the dis-covery was made. One of these old Arabian chemists is credited with being the father of chemistry. Like thou-sands of his countrymen he spent a lot of time trying to make pure gold out of something else, but in these experi-ments he discovered many things useful in the world today.

One unimportant thing after another drawn out to its fullest length, while Ed's work waits, and the effice boy reports that he is talking on the tele-phone, and Mr. Jones begins to wonder

what office business there would require such a long talk. And all over the business world there are husbands who are being interrupted in their work by wives of this kind.

There are even unmarried men who must take a half hour to exchange pleasantries, foolishness and small talk with girls who have nothing to do, and nothing else to think about.

If they had more to do their thinking with they would surely realize how unfair, unkind and unnecessary this pro-

They might even realize how badly it reflects back upon them.

He merely wishes she would restrain her affection and attention until the

proper time and place. He might be pleased if she just called him up occasionally, or if she said her say and had done when she did call up.

But when she gets him on the tele-phone and keeps him there talking about anything that happens to come into her head, he is very apt to get merely dishead, he is very upt to get merely dis-gusted with her.

# The Old Carriage Maker Had an Important Truth

I O make each part as strong as the rest," was his way of "building a wonderful, one-horse chaise that wouldn't wear out till judgment day."

This illustrates a fact that is keeping many doctors busy these days-human bodies, like chaises, break down because some part isn't as strong as the others.

Very often it's because of ill-balanced food, lacking in some important element of nutrition. This is especially true of ills developed in childhood, and carried on through life.

Grape-Nuts, that world-famous, ready-to-eat cereal, brings the plan of building each part as strong as the restto serve human need. Grape-Nuts contains all the nutriment of those best of the field grains, wheat and barley, including the vital mineral elements, and it is a wonderful food for building and sustaining health and strength.

The delicious flavor and crispness of Grape-Nuts make it a welcome dish whenever you're hungry.
