The Wife Cheater By HAZEL DEYO BATCHELOR

Joan Stockbridge marries Norman Wayne in spite of many warnings from her friends. She chooses him in preference to Herbert Livingston, who loves her devotedly, but who lacks Norman's charm. Norman has never been known to care for one woman more than a few weeks at a time, but Joan is confident of holding him. After marriage, however, she finds it difficult and he makes her miserable through his attentions to other women. When Edith, Joan's younger sister, comes to visit them, Norman carries on a flirtation with her, and in desperation. Joan turns to her, and in desperation, Joan turns to Herbert Livingston, who still loves her. The day comes when Herbert asks her to go away with him, and Joan, reckless because of Norman's neglect, decides on impulse to go. They start out in Herbert's car, but as Joan thinks it over, every instinct in her revolts. In a panic she seizes Herbert by the arm, and ho loses control of the wheel.

Thank you, ma'am, I aim to please. Dear Cynthia—Will that kissing question never cease? Last summer we thought it was closed with the numerous replies to "Somehody's Stenog." The first sweetheart I had said to me one night, when I kissed her for the first time, after knowing her six months and seeing her mostly every day and evening, "It's about time." So there you are. She was a cultured girl, at that time attending college. She has been married now some years. As I said in a letter to you last summer, I would be married now most likely to a very charming girl whom I met in the office and with whom I went about quite a bit for more than two years, but for the fact that slie was an iceberg. Shortly after meeting her I learned her feelings on the matter and never attempted to kiss her. She was perfectly willing to go anywhere with me, drive out of town, spend any amount of money. To use an expression of the day, I think, and most men do, too, the majority of girls one meets these days are gold diggers.

Just a word to "Lone Wolf." Welloid sport, when I read your letter in the column I saw right away that you are a young fellow after my own heart. Some few months ago I came to this city a stranger and worked under the same circumstances that you are under at the present time, but I am beginning to see a bright light ahead for us both in the near future. Anything that I can do to help you put this organization over I am willing to do. Let me know. For instance, why not have several different gatherings in different parts of the city on the earme days with some one interested in charge at each place, because it would take a large place to hold all the lonesome young people of "Phillie." I bet. Let's hear from you. Cynthia, I wonder what's the matter with our friend "Lonesome." She has not answered my letter yet.

Dear Cynthia—You are a daisy! Helping every one, even the lonesome girl. Pledse help me.

About two years ago I met a boy one year younger than myself (I am sixteen) and I became very fond of him after he had told me some wild tales of love. I used to call him up a great deal. Now he has a maiden aunt who is always "quidnunc." So, as she was industrious, she runs and tells my dad (father always had a grudge against this family, anyway) and dad answers her in a very business-like way, and she in turn takes up for her nephew. This happened two years ago.

The other day this dame came to visit us and I treated her as a new friend, heing very courteous and affectionate. After she had gone dad was cross from treating her so. Don't you think I to the daight. Cynthia? I thought hy In blackberry season it is very easy to stain tablecloths and table napkins with drops of juice from the stewed fruit or from blackberry pie. Every one should eat blackberry desserts very carefully so as not to splash the juice upon the table linen.
