

EIGHTY DROWN AS HAMMONIA SINKS

Scenes of Horror Witnessed When German Steamer Founders Off Vigo

LIST OF PASSENGERS LOST

Southampton, Eng., Sept. 12.—The loss of life in the foundering of the German steamer *Hammonia* off Vigo, Spain, last Saturday will probably never be definitely known. The passenger list was not saved, and the total of those on board can only be approximated.

Captain Alfred Hofer, commander of the *Hammonia*, asserts that only fifty persons are missing out of a total of 537. The crew, he believes, numbered 192 and the passengers 385.

Captain Day, commanding the steamship *Kinfauns Castle*, which brought 385 survivors here, says he saw possibly eighty drowning, while others placed the death list as high as 150. One reason why the number lost will probably never be known is that most of the passengers were Spanish or Cuban workmen, whom it will be impossible to trace.

During his fifty years at sea, in which he has saved four ships and their crews, Captain Day told the Associated Press he never witnessed scenes of horror equal to those of Saturday.

"When we received the S. O. S. on Saturday morning," he said, "we hurried to the scene and stood for several hours until told that we were not needed. Then, when resighting our course late in the afternoon, we got a second call and hurried back in a heavy sea. We saw the *Hammonia* on her side, sinking, with the ocean full of life rafts and overturned boats, to which drowning men, women and children were clinging. We got out eight boats, and there was a great rush among the sailors to be the first to the rescue.

"They brought on board 385 persons. One of our boats delivered seven to the City of Valencia; another eighty-eight were rescued by the *Euclid* and possibly sixty by the *Tudor Prince*. If there were any more they were lost."

Captain Hofer, who formerly commanded the liner *Imperator*, said he had never suffered an accident. Then, with lips quivering:

"When we left Vigo," he continued, "strong cross-winds began to blow and we slowed down. Then I found the ship leaking and put her head to the storm, but the water kept creeping upward. I sounded vainly to ascertain the whereabouts of the leak, and set the pumps working at 3000 tons to the hour."

"I did not dream that such a stout ship could be in danger, but the water kept climbing, and when the ship was listing I sent out the S. O. S. Then, hoping against hope, I refused aid until the very last."

"I refused to leave the ship, and nineteen of my engineers and officers declared they would remain. Even Fritz, the ship's cook, and a thirteen-year-old cadet, stayed when the waters were sweeping the lower decks."

"We finally shoved off, but the waves were so powerful that, with two men on each oar, it was difficult to go more than a few yards and we were almost caught by the sinking vessel. As she went down by the stern there was a big explosion, shooting the green seas a hundred feet into the air."

Coruna, Spain, Sept. 12.—(By A. P.)—When the ill-fated steamship *Hammonia* left here for Vigo on Friday day there were on board 537 persons, of whom 385 were passengers. One hundred and eight passengers and a cargo of goods were taken on shore. The *Hammonia* is reported to have grazed a rock while leaving the harbor.

Some survivors who have reached here declare sixty-three lives were lost, while others believe that all the crew and passengers were saved.

HUSBAND STEPS ASIDE IN BABY TRIANGLE SUIT

Tiernan Encourages Wife to Fight Other Man

South Bend, Ind., Sept. 12.—Prof. John P. Tiernan said yesterday afternoon that he had withdrawn from the suit brought by his wife against Harry Poulin, in which she charges that he is the father of her youngest son. Prof. Tiernan said, however, that his wife would continue to press the case now in the hands of the prosecutor.

"If I understand Mrs. Tiernan's frame of mind," said her husband, "she intends to prosecute to the limit, and in that determination she has my approval. She insists that she will prove the guilt of the man who brought wreckage into our lives. She will insist that he pay the penalty, as she is paying."

Prof. Tiernan said that he had arranged for a separation from his wife under which the other two children will be put in a Chicago school where he can visit them each week after the Poulin case is disposed of.

TORREADOR PANTS NEXT

Western Style Exhibited at Men's Fashion Show Has Bells On

New York, Sept. 12.—(By A. P.)—The advent of a new style of men's trousers that is coming out of the West is revealed at the main store conducted at Madison Square Garden in connection with the annual convention of the National Retail Clothiers' Association. The new trousers are called "torreador" and have all kinds of fancy fittings. They are belted at the bottom, with slits laced together, and may be decorated with bells, little buttons and fancy braids.

The fad, said to have started among high school and college boys near the motion-picture colony in Los Angeles, is, it has been learned, reported here by the Southern branch of the University of California, where freshmen had planned to wear them together with sideburns.

MONEY MAKER REARRESTED

Joe Suka in Tolls Again After Finishing Term

West Chester, Pa., Sept. 12.—Joe Suka, of Philadelphia, was released from the Chester County prison late last night after having served a term of eighteen months on the charge of attempting to make a "money-making" machine to a resident of Coatesville, but the latter had "framed" him and caused his arrest and that of a companion, the latter being a fugitive from justice.

As Suka was ready to leave, an officer from Allentown appeared with the proper papers, took charge of him and started for that place on a late train. Suka is wanted there on a similar charge to the one of which he was convicted here, the offense having been committed previous to the one at Coatesville.

Fire Sweeps N. Y. Tenement

New York, Sept. 12.—(By A. P.)—A fire which swept through a five-story tenement in Brooklyn late last night cut off all exits from the building and forced the members of more than twenty families to seek refuge on the roof, where they were rescued by police and firemen.

Farewell to Mr. Moth

A CEDAR-LINED CLOSET is made by us assures complete protection against moths for your valuable furs and clothing. Such a closet possesses advantages such as no tar-bag or cedar chest can offer.

Every garment has ample space, each is easy of access. Clothing does not become wrinkled and creased.

Cedar-lined closets are the most modern form of moth protection. Houses of refinement everywhere are being fitted with them at a cost so low, as to be negligible, considering the protection they afford.

EIGHTH NATIONAL EXPOSITION OF CHEMICAL INDUSTRIES

Grand Central Palace, New York
WEEK SEPTEMBER 11 to 16, 1922

What the Pennsylvania Salt Manufacturing Company Does

A Story of the Company and Its Products

FOR OVER 72 YEARS this company, founded by a group of Pennsylvania chemists and business men in 1850, has been identified with the growth of the Industrial Chemical Industry in this country. To many this fact will be surprising, for although styled a "Salt" Manufacturing Company, the manufacture of the condiment or food stuff known as "salt," has never been the company's principal product.

Their activities as manufacturers of Industrial Chemicals have, however, been wide and varied, until at the present time they stand among the largest manufacturers in this country of a family of products which are vital to the processes of manufacture in many important industries.

At Philadelphia on the Delaware River; at Natrona, Pa. (on the Allegheny River, 23 miles from Pittsburgh, the great industrial center of that section), and at Wyandotte, Mich. a suburb of Detroit, on the Detroit River, where is situated their electrolytic plant, second to none in size in the country, are located the Company's plants, from which flow the constant stream of their products, some of which have been nationally known under brands for over half a century. In certain fields the Company have been foremost as pioneers and inventors. They have since 1865, without interruption, been the sole importers of Kryolith, from the Island of Greenland into the Western Hemisphere. Among paper makers they are known as pioneers in the manufacture of Paper Maker's Alum, and their Natrona Porous (Iron Free) Brand has a national reputation not only in this industry, but other industries as well. Throughout the industrial world they have gained and maintained a reputation for the reliability and uniform quality of their products. As a Company, they are naturally proud of the progress made during their 72 years of activity, for as the original corporation was founded, so it stands today, without consolidation or amalgamation with outside interests, a Philadelphia company, owned and managed by Philadelphians.

At the coming National Exposition of Chemical Industries, to be held at Grand Central Palace, New York, from Sept. 11th to 16th, the Company will have an exhibition a display of their products, and they will gladly explain them and how they are used to their friends who may visit the Exposition.

The following are the Major Products of the Pennsylvania Salt Manufacturing Company, and their uses:

- Sulphate of Alumina**
Paper making, Water purification, Dyeing, Tanning, Color trade, Leather trade.
- Alumina**
(Calcined and Hydrate) Aluminum glass, Printing inks, Pottery trade, Abrasives, Colors, Spark plugs, Porcelain.
- Crystal Alum**
(Lump, Green and Powdered) Medicine, Dye works, Artificial marble, Water filtration.
- Caustic Soda**
(Electrolytic 60%, 74%, 78% strengths) Soap making, Color industry, Dyeing and Galico printing, Mercantile.
- Bicarbonate of Soda**
(Natrona and Cheesbrough Brands) Medicine, Baking powder, Confectionery trade, Textile industry, Mineral waters, Fire extinguisher compounds.
- Salt Soda**
Washing, cleaning and spraying, Domestic purposes.
- Salt Cake**
Glass trade, Pharmaceutical and Veterinary purposes, Dyeing and finishing, Paper pulp.
- Salt**
Free from Magnesia and Calcium, Dye manufacturing, Water softening, Soap refining.
- Bleaching Powder**
(Chlorinated Lime) Bleaching pulp, Disinfectant, Bleaching Oils and Fats, Textile trade, Household purposes, Water sterilization, Laundry.
- Natrona Red Ore**
(For Gas Purification) Removing sulphur from gas.
- Natrona Paint Ore**
Color purposes.
- Coppers**
Preparation of Horticultural sprays, Inks, Prussian blue, Disinfectant, Photography, Gas and water purification, Manufacture of rouge.
- Nodulized Iron Ore**
For iron and steel, low in phosphorus.
- Sulphuric Acid**
(All strengths) Fertilizers, Petroleum refining, Pickling, Iron and steel, Textiles, Gas industry, Storage batteries.
- Muriatic Acid**
(Pure and Commercial Grades) Preparation of chlorides, Manufacture of radium, Metallurgical purposes, Medicine, Leather industry, Glass industry, tanning and galvanizing.
- Nitric Acid**
Gun cotton, explosives, manufacture of dyes, photo-engraving, etching steel tools.
- Acetic Acid**
(All strengths) Textile industry, Vinegar manufacture, Insecticides, Acetate of lead, Varnish manufacture.
- Chloride of Alumina**
Textile industries, Oil refining, Wool carbonizing.
- Zinc Chloride**
Cotton, Silk and Wool industries, Disinfecting, Preserving wood, Tanning and soldering purposes, Wood fibre manufacture.
- Greenland Kryolith**
Enamelling and glass, Tiling table tops, Flux, Glazing in pottery, Manufacture of aluminum.
- Lewis 98% Powdered Lye**
American Lye
Greenwich Lye
Saponifier
Household soap making, Cleansing and numerous domestic uses.
- Hypochlorite of Soda**
Laundry purposes, Disinfecting milk bottles and dairy utensils, farm uses. A non-poisonous germicide.
- Liquid Chlorine**
Water sterilization, Textile trade, Bleaching, Manufacture Paper, Pulp, Dyes.
- Oils**
(Hardened by hydrogenation) Producing a high-grade tallow for soap, candle, better substitutes, Grease lubrication.
- Pyrites**
Sulphuric Acid, Purple Ore, Iron and steel industries.
