# Whirling, Laughing, Happy Paris Again—the Paris of Old, and

**Wrong Methods in Any Business Are a Species of Cancer** that must end in the weaknesses or extinction of strength and final destruction. All claptrap and deceptions are moral cancers that require a surgical operation to save life.

It is not necessary tomorrow or next day, but evil practices in business are really suicidal.

[Signed] *John Wanamaker*  
September 16, 1922.

**DINNER and Evening Gowns of Gorgeious Metal Tissues and Brocades**  
Wonderful fabrics of Bianchini, Rodier and Marescot, three great artist designers of Paris, are used in these glittering gowns for dinner, restaurant and evening wear. Gold and silver cloths and tissues and brocades and laces, in the beautiful new color-lined effects that make such tone symphonies as orange and gold, periwinkle and silver, gold and Venetian red, silver tissue with rhinestone-sprinkled gray chiffon, and so on.  
In sumptuous materials and simple clinging lines they duplicate the gorgeous toilettes worn by notable French and English women at the most splendid Deauville dinners recently given to the King of Spain.  
It will interest women who like such exquisite toilettes to know that we have but one of a kind.

New coats of fashionable olive weaves are topped with deep, soft collars of natural wolf, platinum wolf, caracul, squirrel or beaver, and sometimes have cuffs or bands match. In navy, brown, arden, Hawaiian blue and black.  
Especially lovely is a coat of black Bolivia with a deep lining of Australian opossum platinum wolf.  
All are lined with silk crepe and are in sizes 14 to 20.

**HER Gown Was Delightful—But That Umbrella Surely Looked Like a Rainy Day!**  
How often have you seen it?—Madame stepping with fashion's elite, as exquisite and fine as any, from her chic little bonnet to her trim slipped foot. Then she turns—that umbrella! How hideous everything seems.  
And it's so simple to have an umbrella just as smart and as nice as the rest of one's attire. Fashion has provided the London Club umbrella. Shorter and clubbier in effect both at handle and shank. Tops and tips are flashing with bakelite amber, a little side strap or leather thong provides a different way for carrying, while the silk covers are in many plain styles.  
Priced \$7.50 and \$10.

## What a Difference It Makes in Fashions

Presenting the New **PARIS MILLINERY** for Autumn and Winter 1922-23  
Wonderful hats, gracious and lovely in line, indescribably chic in effect. The most notable collection we have ever brought over from

and other brilliant Paris creators who set the millinery modes for womankind. Each has expressed her own interpretation of the mode. Each hat is marvelous in its own individual way.  
Useless to tell the materials. One might as well say a picture is made of such-and-such colored paint. It is the artist's inspiration that makes the picture. It is the millinery artist's inspiration that makes the hat—such hats as these.  
But if you wish to know what are the new lines, the new colors, the new decorations, the smartest materials in Paris today, see what Reboux and Lanvin and Maria Guy and the others have to say about it in the hats we present Monday—so lately from the Rue de la Paix and the Place Vendome that they are only just rustling out of their steamer boxes as this is written.  
Never have Paris hats been more diverse, more captivating, more eminently wearable.

## A Glorious Presentation of Radiant, New and Enchanting Silks

Light and loveliness, charm and beauty will be spread forth in the Silk Store on Monday morning—and the silk mode will be established.  
Exquisite French silks, all opened within the last two weeks, indicate beyond a doubt that it will be a season of patterned silks—broches, matelasses, imprimés—and, for evening, a glitter of tinsel.  
Metal brocades on Georgette or silk crepe grounds, cloth of silver or gold and satin-back tinsel will be used for evening gowns and wraps, for lining the finest fur wraps, for trains, panels, girdles, hats and even for slippers.

Color is everywhere on fashion's palette—black and white perhaps for contrast, but color is the mode. Take, for instance, the new satin broche imprimé, a gorgeous material for evening wraps or for lining ermine cloaks. It is of a chiffon texture with a velour broche printed in orchid, blue, brown and green on an apricot ground—the colors mingled in perfect harmony.  
On a ground of black Georgette crepe a broche figure, in which artificial silk is used for brilliancy, is worked out in purple, deep blue and ruby red. Especially beautiful is this material when draped over still another color.  
A Japanese temple design is done in silver on an orchid ground. Rays of silver light play on a field of geranium crepe.  
In addition to the brilliant things for evening are many delightful silk crepes brocaded or striped with satin and suitable for afternoon gowns.  
Prices on these exquisite things are lower than they have been in years—\$4 to \$30.

## Fur Mantles and Coats Exhibit Amazing Diversity and Beauty

ALMOST as regal as ermine are the snowy white caracul coats and wraps.  
A beautiful white mantle of this fur falls in voluminous folds as soft as velvet. Its inner side is silver-and-white brocade, and the great new collar is of silvery squirrel.  
Platinum gray, pearl, beige and black caracul, all appear in lovely garments of varied length. A pearl white caracul coat has white-and-silver military braiding. A beige caracul coat is trimmed with golden beaver. A white caracul mantle with platinum fox fur. The combinations are enchanting.  
Scotch moleskin, "Summer" ermine, Hudson seal, gray squirrel, mink, Persian lamb, leopard, nutria and other furs, make coats and wraps of a diversity of line and a variation of length greater than in any past year.  
Balkan blouses belt the hips. Extremely long mantles reach to the slippers. Short swinging sacque coats suggest the 1860 period. Draped and paneled garments are as elaborate as gowns.  
Sleeves are totally new and different. So are collars. Linings are nothing short of exquisite.
