The Spiritual Side of the Practice of Healing by Touch

EVERY now and then something re- for good in touch is that not all good minds the world of an old truth person, possess it. I think hat like half or wholly forgotten. I suppose all beauty or like genins or like common truths are old-as old as the first sense, it is a gift. I think that it mortal who discovered them, or traine varies in persons, not so much in the as old as the Spirit of Truth, which is ratio of their goodness as in the ratio of their goodness as in the ratio.

Igious world is believing again in the delining the state of mind either that there is in the sense of touch printy or babitual. But it must more than something that is skin deep be a mind that can concentrate and the idea is galling ground that round rather than on a sharply defined.

Neighbors Slander Her

Dear Cynthia—Please advise me on this subject: We have just moved into a new neighborhood about three months ago, and to our surprise find that one of our neighbors has said terrible things about us which are very untrue. We have never spoken to this woman, and why she lets her tongue go around like this I don't know. She told her next-door neighbor and she told us. I was going to get a warfant out for her, but just do not know what to do, as my mother is dead. And. Cynthia, I am keeping steady company with a gentleman whom I intend to marry. We go out quite often, and do you think this gives her any reason to talk? My father wants to get a warrant. How will we go about it without trouble? I hope. Cynthia, you will rouble? I hope. Cynthia, you will rouble? I hope. Cynthia, you will answer soon, and please do not print my address. I am very thankful to you, and I know this will not take up much room in print. This is the very first time I have written, and I think you are wonderful. ELEANOR. You could not swear out a warrant without making a great deal of trouble. Besides if this woman has chanced to see your flance leaving you at the door after a dance or party, late at night, she could perhaps prove her words true, while she could not prove her meaning. Better let the whole matter drop, ignore the gossip and live your own life, not caring for interference.

They're for the Boxer

They're for the Boxer

They're for the Boxer

Dear Cynthia - We read "Blondy" the boxer's epistic, and we hope you will publish this to him:

Dear "Blondy" - You foscinate us because you are a boxer, and we are two girls, or flappers, if you choose to call us that. We like boxers and know a good many of them, and they are "good sports." But others, oh they bore us because they are always talking about themselves, but that doesn't mean anything to us, because you know that "self-praise never leads any procession."

Now, "Blondy," we are under the impression that we know you, but then our convictions may just be illusions. But one of our friends is a blond and nincteen years old, and he is just in the beginning of his profession as yet;

nineteen years old, and he is just in the beginning of his profession as yet; but with perseverance and patience, together with his good sense of humon, I know he will be among the top-notchers.

We also want to assure you of the fact that we are two girls who don't think that howers are brutes, and we have a good many other girls to back up our statements.

We have concluded from your letter that you are kind and amiable, which is so manifest in your grammatical expressions, and we only wish we could be with you in your spare time, as we reel sure that we could get along just fine. That is impossible, but remember "where there's life there's hope," and maybe some time we will see you if you appear in any bouts, and if we ever do we will surely root for you. So, in concluding, let us indulge in the hope that you will answer this letter, that you will go the limit every minute to attain your goal and that your mame will some day shine in the bright lights of the arena.

Now, when homeward travel is

Now, when homeward travel is at high tide, it is well for a girl or woman who is returning alone to make the proper provision for a sleeping berth on a night journey.

The lower berth in a Puliman is a little more expensive than the upper berth, but it offers many advantages it is rather undignified for a woman to have to climb to the second-story bed at night and to descend from it in the morning. Then, too, possession of a ticket for the lower berth entities her to "ride with the train"; that is to say facing the locumotive, instead of a ting backward.
