

CLOSING MARKET VERY IRREGULAR

Another Week of Boisterous Speculation in High-Priced Industrials

New York, Oct. 21.—Considerable irregularity marked price movement in today's short session in the stock market. The list made a good showing of strength at the outset under lead of the oil-carrying railroads, some oils and equipment.

The market, however, was called upon to absorb a fairly large line of profit-taking which together with the weakening response to the scattering parts of the list checked the upward movement, and in the later dealings most of the early improvement was cancelled.

Establishment of a new high record by the new Government 4 1/2 per cent bonds was the feature of the bond market on the main trend of which went upward. Most of the gains, however, were of a fractional nature.

BROADER DEALINGS IN LOCAL MARKET

Intense Interest Centered in Penny Dividend—Meeting Next Wednesday

The local stocks were unusually well represented in the rather limited operations of today's market, giving the trading a distinct broadening trend.

While there was some irregularity in price movement the list as a whole was added one-half point to yesterday's advance, with sustained, as all variations were confined within narrow fractional limits.

Fractional gains were registered by Philadelphia Electric common and U. G. I. Philadelphia Insulated Wire added one-half point to yesterday's advance.

Possibly in the entire history of the Pennsylvania Railroad there never was a meeting of the directors awaited with such intense interest as the one scheduled for next Wednesday.
