CLARENCE COMES BACK TO US

When Clarence comes back to us, he will be wearing a pair of glasses. Will you remember that?

## THE MOVIE FAN'S LETTERBOX

By HENRY M. NELLY

"Jerry"—My suggestion of a "Clarence" and "The Boy" is a very good one. I have seen "The Boy" and "Clarence" and they are both very good. I hope you will like them. Tessie Mallet, for she can give some intelligent knock equal to a Solomon's Temple lodge, and I am sure that, next to yourself, many, many readers have for the first time, please don't keep repeating what you answered to her today. Forgive and forgive the smart aleck who said it of you. There is only one T. M. S. And we surely would miss your kind and helpful criticism. Friend Tessie Mallet.

Why's all the shouting for? Tessie and I are the best of friends. We'll be just as good as the column for anything.

E. M. writes: "In the EVENING PUBLIC Ledger of Friday, October 20, I read an announcement of a prize offered by Cecil B. de Mille for the best idea for a motion picture scenario. Will you please send me Cecil de Mille's address?"

And sports of kind of things that make me wonder whether it is worth while to try to explain anything. The article referred to was my answer to some one who said he was sure a dummy was going to win the automobile race, so on. My thought was, I printed an offer by Cecil de Mille to give \$5000 to any one who could prove that a dummy was good. And I let this be.

## Dentists say USE BOTH!

It is not enough  
to protect teeth from one attack alone

Dentists say—  
Guard them from two destructive forces

**OPENLY** on the very surface—that is where one dread enemy is attacking your teeth. The other works hidden in the crevices. The destruction it causes is often done before you are aware it has begun.

The first is dental mucin—the unsightly coating sometimes called film. This is responsible for the yellowing of teeth—and eventually causes tartar. The second is the acid decay that comes from the fermentation of any food particles.

Dentists are now recommending

a new and more thorough method of caring for the teeth—a method that guards from both these destructive forces.

Sanitol Tooth Paste and Liquid Antiseptic give your teeth the complete protection they need.

**White, beautiful surfaces**

Sanitol Tooth Paste keeps the teeth smooth and beautifully white. The glycerine in Sanitol softens, then the fine chalk removes the ugly dental mucin. Because it removes this filmy coating so effectively it is unusually successful in restoring whiteness to teeth that have already begun to yellow. It contains only the finest ingredients.

**Clean, healthy crevices**

Sanitol Liquid Antiseptic floods into the most minute crevices, the places your brush cannot reach, and counteracts acid decay. More than this, it soothes and strengthens soft, tender gums (often the forerunner of Pyorrhea) and frees the breath from all odor.

You will be delighted with the way your teeth regain their natural whiteness. You will be glad to know all remote parts of your mouth are thoroughly cleansed.
