Many Middle-Aged Women Have a Second Blooming

By WINNIFRED HARPER COOLEY

widowers, because it is alleged tied, neglecting their dress, and their appearance, and their minds, and being a set period of mourning, and begin to "spruce up" and make them and make them. and make themselves attractive. I think it was 8 hakespeare who spoke of the mild-dle-aged woman's trying to be alluring, thus: "As if the rose would shut, and be a bad again!"

Now we all know that nature is inexamble. Coolley kles will arrive, and certain states of mind appropriate to middle age will always weigh us down, so that we cease to have the hair and a widower may wear a toupee, animal spirits and gay abandon of although being gray or bald did not

our doom of old age. The puritanical deal: in the next year he begins to and the ferraces.

mind of the past used to see in any st- "take notice," and it is hard to get. The two women were strangely contempt on the part of a woman over him through his second summer.

Illowever poor the taste of a woman over him through his second summer.

Illowever poor the taste of a woman tractive clothes, or to dance, or show who attempts to dress too youthfully her rather haughty exterior many qualities that she had never suspected, and morality. She ought to be a grand- in a frivolous, undignified manner, one day, she told Marcia her strange mother and sit in a chimney corner and there are certain legitimate ways by story from start to finish.

Enit from forty on. If she chanced to which we can remain physically fit. When she had finished she said quite be unwed, then she was supposed to turn back the clock, and keep ourselves simply. 'I wanted you to know so that church work. The bright bachelor maid the spirits are apt to keep young.
of today who is in business for berself. Most women experience a dec who has an independent income and droop, in their thirties or fortles-after comething new under the sun! the early transports of honeymoon and new babies are past. They regard themselves as old, and life as over!

A ND if she is surprising, what would Some women never rally from a feeling A ND it she is surprising, what would not she is surprising, what would not she women never rang from a feeling and women of forty-live or fifty who out of the race of living.

I area is surprising, what would not some women never rang from a feeling and women of forty-live or fifty who out of the race of living.

For others, however, there is a second blooming. Whether this blooming A good many folks do do these because they are again on the matri-things but there still are large num-bers of married persons who slump, for their bushands and themselves, it and settle down into a dull, careless is more desirable than getting old.

Can You Tell? By R. J. and A. W. Bodmer WHAT'S WHAT

By Helen Decie

The Difference Between Light and Heat The difference between light and heat to that light acts upon vision, or the sense of seeing, and heat upon sensation, or feeling. Also, heat expands all bodies, altering their atomic condition. while light, on the other hand, though usually accompanied by heat, has not the same expansive force. Heat and light are both combined in the elementary rays, but we know, nevertheless, that they are separate elements. We have heat rays which are unattended by any development of light, such as heat from a hot iron, friction, etc. We also have light, phosphorescence, for in-stance, which is unaccompanied by an ppreciable amount of hear. Additional oof has been given us, by experiments, that have shown that in passing rays of colar light through media that are fransparent to heat but not to light.

it is possible to separate the heat rays. The point of heat at which boules be bottler for a The point of heat at which bodies is:

come luminous has been estimated at 1000 degrees. It is a very simple matter to transform mechanical energy into beat, but impossible to reverse the process. In order to get work from heat it is necessary to have two bodies at different temperatures, so that the beat ture may pass to the body at the lower ture may pass to the body at the lower temperature.

The point of heat at which bodies is:

It is a very simple matter to a few minutes in a hotel find out?

As the lays passed Anne give physically strenge. She lest that look dissess of a total stranger. The mether, the heat which it is necessary to have two bodies at different temperatures, so that the beat danger of possible injury would be far a find out?

As the lays passed Anne give physically strenge. She lest that look of fragility that had been hers when known woman to strike the child, the different temperatures, so that the beat danger of possible injury would be far a wind out?

As the lays passed Anne give physically strenge. She lest that look of fragility that had been hers when known woman to strike the child, the danger of possible injury would be far a wind out?

As the lays passed Anne give physically strenge. She lest that look of fragility that had been hers when known woman to strike the child, the danger of possible injury would be far a wind out?

As the lays passed Anne give physically strenge. She lest that look of fragility that had been hers when known woman to strike the child. The lays passed Anne give physically strenge. She lest that look of fragility that had been hers when known woman to strike the child. The look of fragility that had been hers when known woman to strike the child. The look of fragility that had been hers when known woman to strike the child. The look of fragility that had been hers when known woman to strike the child. The look of fragility that had been hers when known that while it.

Light is formed from the ether, which is found in all substances, filling the spaces between molecules. When the molecules are made to vibrate, the ether vibrates also. When the vibrations have become sufficiently rapid they produce the sensation of light. These same vibrations also produce heat. When the other is made to vibrate rapidly enough at any point, the vibrations go in straight lines from the source of light. single line of vibrating particles in the ether is known as a ray.

The Superior Sex By HAZEL DEVO BATCHELOR

John Steele marries Anne Temple knowing that she has a secret in her past. He knows, too, that she does not love him, but he sets about win-ning her love and succeeds. But the minute he is sure of her, he begins to broad about her next to begins to brood about her past. He finally discovers that she has a child and blinded by jealousy, he accuses her of the worst. That night Anne goes to her baby and finds her desperately to her baby and finds her desperately ill with pneumonia. Three days later the child dies. In the meantime Steele realizes his love for Anne, and is eager to atone for what he has done. He goes to her, and Anne tells him that the child is dead. She calls it a with him that the child is dead. it a punishment for having loved him more than she loved the baby, and refuses to have anything to do with him, However, Marcia, Steel's mother, intervenes, and succeeds in persuading Anne to visit her.

Mother and Daughter

TT WAS the last of March when Marcia carried Anne away to Virginia. to one of the most famous resorts in that part of the country. Their rooms and in a short while longer it fades entirely.

A JOKE, or rather a connectrum, in the hotel were beautifully appointed, and this does not mean that we need like a haby. The answer was that for long but take walks and hask in the hasten the fateful day, and rush to the first six months he eries a good sunshine that flooded the long verandas

Mrs. Wilson Gives Things You'll Love to Make

Will Take the Monotony Out of the Week's Menu

By MRS. M. A. WILSON

CHILLY November days tell the U housewife that winter is approaching and that the family requires plenty of nutritions food to supply the needed strength, energy and heat, to withstand the rigers of the coming winter.
The thrifty woman who has camed
and conserved all summer now has a
two derful store of aplendid foods on
the cellar shelf, and it will give her
an opportunity to plan a balanced ment
at low rost. Each season has its food
and all wenter there will be plenty of
carrots, beets, turning, cabbage, celerr, parsings, sweet and white potatoes, spinish, callidover, brussels
spreads, kehl-rabi and other greens.
Thanking a three-meal ment for
Sunday.

Hazel Deyo Batchelor The first chapter will appear on Monday, November 6

What to Do

Lettero to Cunthia's column must be written on one side of the power only and must be signed with the writer's name and address. The signed will not be sublished if the writer does not wish if. Unsigned letters and letters writing on both sides of the abser will not be answered. Writers who wish personal answers that can be pives in the column will please look there, as personal letters are only written when absolutely necessary.

Please Tell Me

She Must Have Stood Him Up Dear Cynthia—I was going with a girl about a year ago and I broke off with her. Now I have found out that I really loved her and would like to go with her again. The other day I met her and I invited her to a mask party which took place Saturday night. She said she had a date with her friend, I told her to come after she loft him, but she said it would be too late. She asked if she could bring her friend with her and I said all right. She said she would be there at 8:30.

"WALLY REID."

Probably this girl's friend objected to coming, and as she had a previous engagement with him, she had to keep it of course. She might have let you know, but since she didn't you could call her up and ask her what happened to her, and make another engagement with her.

Said She Was Through With Him

Dear Cynthia—Every evening, without an exception. I read each and every
lotter appearing in your most helpful
and interesting column. At times I read
letters from some of your young ment
readers, whose experiences are remarkably similar to mine, hence I cannot
referain from writing.

For one year I kept steady company
with a young lady. During that period
I was out with her on an average of
four to five times a week (which is too
stendy). One evening I called her up
and received the greatest shock of my
one score and two years of existence,
She politely but coolly said she was
through with me. I naturally demanded
an explanation, which she could not
give. Any one who unfortunately had
a similar experience can well imagine
my consternation.

Now that occurred just two years
ago. As I redde within a few squares
of her, I see her occasionally, but never
ago. As I redde within a few squares
of her, I see her occasionally, but never
and probably always will be.

It's Rather Pathetic to See the Girl Who Must Have Admiration

She Must Be Admired or Admiring Always in Order to Be Really Comfortable, but She Never Gets Anywhere

Then I told her I would wait tilf the would come. Saturday night I waited till the party was over, but she did not come. Sow I am asking you to help me. So please tell me what to do.

The I told her I would wait tilf the would come. Sow I am asking you to help me. So please tell me what to do.

The I would wait tilf the also made it a rush, so that before the unsuspecting victim knew what was happening neople were accusing him of happening neople were accusing him of happening neople were accusing him of

also made it a rush, so that before the unsuspecting victim knew what was happening neople were accusing him of being engaged.

The is one of those girls who must always be either admired or admiring. If there is no man who is calling her up, paying her compliments and calls, giving her invitations and gifts and getting closer and closer to proposing every minute, then she must find some other man for whom she can profess deep admiration and affection.

The USUALLY starts in fun, just as this one did, but it invariably ends it is now?

AND what is she going to do as she goes on getting older? Will there always be an admirer or an admires who is willing to play his part?

She doesn't think about the future, this girl in the gold earrings, with the crush on the man she doesn't know very well.

She's having a good time now, and that's as far as it goes.

But the girl with the tortoise shell comb and others who look on wonder and sometimes feel a bit serry.

What will the future be? Or will her life always be in the present, just as it is now?

n man ever enter her head, while as for her heart, it remains completely

untouched.
Yet these girls are not hard, and they are not extraordinarily selfish.
It is simply their nature to have admiration always in their lives, either

disapprove of them.

They are so amusing!

It seems so ridiculous to be so entirely dependent for amusement and content upon the admiration of or for man. In a way it is rather pathetic.

At the age of—oh, anywhere in the wentless and early thirties, it's all right, but as the girl goes on approaching middle age, a larger waistline and and another chin, it really is sad.

Walking through the office.

"On him? Why?" exclaimed the girl with the tortoise shell comb, glancing up from her typewriter in surprise.
"Oh, I don't know. I kind of like him!" was the casual reply.

She didn't know him very well, but she probably would before the week was up.

It wasn't her plan ever to worship from afar: if she got a "crush" she is or eal feeling there.

They have a good enough time, but everybody rather smiles at them in an indulgent way because they all know it last, it doesn't mean anything, there's no real feeling there.

There isn't even real friendship; it's just light infatuation.
