# The Worker's Right To A "Living Wage"

Every rational human being in this country stands for a wage that will give American workers an American living. President Harding and Secretary of Labor Davis have recently gone further and declared publicly that American workmen should have not merely a "living" but a "savings" wage. In the face of this comes the ruling of the Railroad Labor Board, which declares that "the theory of 'the living wage' if carried to its legitimate conclusion would wreck every railroad in the United States and if extended to other industries would carry them into communistic ruin." It will be noted that what the Board opposes is not "a living wage" but the theory of "the living wage."

Read THE LITERARY DIGEST this week and learn what the press of the country thinks of the Labor Board's decision, and also the various interpretations of a living wage made by Labor journals and the press generally.

The article has a very real importance for several million American women. To get an opinion upon the subject, the "Digest" addressed a letter to the married women in the current edition of the American "Who's Who," and the answers received are from women of various professions and businesses.
