Quiet Remington No. 12

It wins the operator because of its many features which make the day's work swifter and easier.

Prominent among these is the "Natural Touch", that triumph of Remington design, which makes the operation of the machine like second nature—as mechanical as walking and almost as unconscious as breathing itself.

It appeals to the owner because its work is surpassingly good-and consistently good under all circumstances.

In quality as well as quantity, it gives him the results he wants. And because it is so quiet that its

operation never disturbs him, no matter how near him it is used.

The new Remington No. 12 speaks only in a whisper, but will be heard around the world
