Bond Salesman

A well-known bond house handling only high-grade issues desires to employ an additional salesman on very attractive terms. In consequence of the firm's rapidly growing business, this opening offers an exceptional opportunity. It should appeal to you if your present situation holds out limited promise for your future. The attention of our own salesmen has been called to this advertisement. Replies will be considered strictly confidential and should be addressed to B 522, Ledger Office.

# MARKET HARD AND SPONGY IN SPOTS

## Speculative Favorites Under Pressure, While Selected Issues Make New Peaks

**New York**, Dec. 11.—The new week opened without definite change in the general characteristics of the stock market, and the price variations, much the same as in the preceding sessions, represented little else than efforts on the part of contesting forces of the professional speculating element to gain the advantage. The honors in so far as net results were concerned were about even, for while there was renewed selling of speculative favorites, other selected issues were marked up, several making new peak prices.

It has been some time since the market has so closely followed what could be termed as a set program for such a considerable length of time. Day by day news receives very little consideration, except as regards developments within the individual companies concerned, which is available for immediate annunciation, but which has little or no bearing whatever on the general situation.

There was, however, little of an inspiring make-up in the over-the-week-end developments. Cable advices, however, indicated some improvement in foreign situation. News from industrial and commercial world could be described as encouraging, indicating continued expansion of business activity. Partial confirmation was to be found in the report of the Department of Labor, showing the increase in employment in November was the greatest since January. Trade reviews reported recent gains in the West were not only held, but further gains were being made. Then there was the continued steadiness of foreign exchange, and also the material improvement in the reserve position of the banks as indicated in Saturday's weekly Clearing House statement.

These constructive events might as well have been in the language of the Greeks, because, interpreted from a market viewpoint, they were equally unreadable.

National Lead was an outstanding feature of the irregular opening, making a sharp advance of more than 5 points to 129¼, a new high record for the year. Peak prices were also established by Westinghouse Air Brake, and a few others, but the main body of stock was without any settled trend.

Liquidation of some weakened accounts and heavy short selling of some of the speculative favorites caused a reactionary trend in a large part of the list around the end of the first hour. Oils proved particularly vulnerable to selling pressure, but material recessions also were noted in such stocks as Studebaker, Baldwin, Republic and Gulf States Steels, Consolidated Gas, United States Alcohol, Famous Players and Burns Brothers.

The decline was not general, however, speculative buying going on in a number of selected shares, notably in the food, chemical, zinc and public utility groups and Crucible Steel and General Asphalt. The steady absorption of these issues, which were marked up 1 to 3 points, combined with a lower renewal rate for call money, eventually caused a sympathetic hardening throughout the list before midday.

## Commodity Markets

### GRAIN MARKET

**Chicago**, Dec. 11.—Although wheat touched a new high price record for the season today in the early dealings, the market soon underwent a setback. Profit-taking on the part of holders, together with the fact that Liverpool quotations failed to reflect fully Saturday's advance in America, was the chief reason given for the decline. On the other hand, bulls continued to emphasize gossip about proposed legislation to provide credits for farmers and exporters.

The opening, which ranged from ¼c decline to ⅛c advance, with May $1.20 to $1.20½, and July $1.03⅝ to $1.10, was followed by slight gains and then by a general sag to below Saturday's finish.

Corn and oats, as well as wheat, reached new top prices for the season but later eased off with wheat. After opening unchanged to 1¼c up, May 71⅛c to 71⅜c, the corn market lost most of its gains.

Oats started ⅜c to ⅝c up, May 44⅞c to 45c, and later held around Saturday's latest figures.

Provisions were higher in line with hog values.

### COTTON MARKET

**New York**, Dec. 11.—In the early dealings today, the market for cotton futures was firmer, in sympathy with a sharp upturn at Liverpool. First prices here were 15 to 21 points higher, with Japanese interests, the continent and spot houses the best buyers. The Times Picayune crop estimate was considered bullish. Liverpool, the South and Wall Street sold moderately.

Later, the list was a little easier, and about 5 to 17 points off from opening levels.

### NEW YORK COFFEE MARKET

**New York**, Dec. 11.—The market for coffee futures opened at an advance of 2 to 5 points with demand from trade sources. There were delivered on contract today 1250 bags.

Shortly before the local opening, a special cable from Rio reported the term market there unchanged to 25 reis lower. Rio exchange on London was 3-32d lower and a decline of 30 reis on the dollar.
