The Amaloanation of Languages.—There is a grewing tendency in this rge to appropriate the misst expressive words of other kneunges, and effer a while to incorporate them into ever on; thus the word Cepkelle, which is from the Greek, signifying "for the head," is now becoming popularized in cornection with Mr. I paiding's great Renducke remedy, but it will seen be used in a more general way, and the word Cepalic will lie a come as cen non as Electroty cand many others whose distinction as fareign words has been we reason as you common usage until they seem "native and to the manor born."

'ARDLY REALIZED. Hi 'ad 'n 'orrible 'esdache this hafternoon, hand I stepped into the hapothecaries hand says hi to the man, "Can you hease me of an 'esdache?"—"Does it hache 'ard," says 'e. "Hexceedingly." says hi, hand upon that 'e gave me a Cephalic Pill, hand 'pon me 'oror it cared me so quick that I 'ardly 'realized I 'ad an 'eadeche.

ME HEADACHE is the favorite sign by which nature makes known any deviation whatever from the natural state of the brain, and viewed in this light it may be looked on as a safeguard intended to give notice of disease which might other vise scrape attention, till too late to be remedied; and to give notice of disease which might other vise escape attention, till too late to be x-medien; and its indications should never be neglected. Leadaches may be classified under two names, viz. Symptomatic and Idiophatic. Symptomatic Headache is exceedingly common and is the precursor of a great variety of diseases, among which are Apoplexy, flout, Rheumatism and all febrile discases. In its nervous form it is sympathetic of diseases of the stomach constituting sick headache, of bepathic disease constituting sick headache, of werms, constipation and other discretes of the bowels, as well as renal and uterine affections. Diseases of the heart are very frequently attended with Headaches; Anæmia and plethora are also affections which frequently occasion headache. Idiopathic Headache is also very common, being usually distinguished by the rame of nervous headache, sometimes coming on suddelly in seen. Idiopatine Headache is also very common, being usually distinguished by the name of nervous headache, sometimes coming on sudderly in a state of apparently sound health and prostrating at once the montal and physical energies, and in other instances it woulds on slowly, heralded by depression of spirits of aperbity of temper. In most instances the pain is in the front of the head, over one or both eyes, and sometimes providing over one or both eyes, and sometimes provoking vomiting; under this class may also be named

CONSTIPATION OR COSTIVENESS.

No one of the "many ills flesh is heir to" is so prevalent, so little understood, and so much neglected as Costiveness. Often originating in carelessness, or sedestary habits; it is regarded as a slight disorder of too little consequence to excite anxiety, while in reality it is the precur sor and companion of many of the most fatal and dangerous discases, and unless early cradicated it will bring the suffert to an untimely grave. Among the lighter evils of which costiveness is the usual attendant are Headache, Colic, Rheumatism, Foal Breath, Piles and others of like nature, while a long train of frightful discases, such as Malignant Fevers Abcesses, Dysentery, Dirrhoa, Dysepesia, Apoplexy, Epilepsy, Paralysis, Hysteria, Hypochondriasis, Melancholy and Insanity, first indicate their presence in the system by this alarming symptom, Not unfrequently ine discases named originate in Constipation, but take on an independent existence unless the case is eradicated in an early stage. From all these considerations it follows that the disorder should receive immediate attention whenever it occurs, and on the first appearance of the complaint, as their timely use will exped the insiduous approaches of diseases and destroy this dangerous foe to human life, CONSTIPATION OR COSTIVENESS.
