The Centre Democrat.

BELLEFONTE, PA. AGRICULTURAL. NEWS, FACTS AND SUGGESTIONS.

Every farmer in his annual experience discovers something of value. Write it and send it to the 'Agricultural Editor of the Democrat, Bellefonte, Penna.'

THERE appears to be some evidence that land which has recently been dressed with lime or potash is exempt from the ravages of the white grubs.

COL. V. E. PIOLETTE, one of Pennsylvania's most excellent farmers, and a prominent member of the Patrons of Husbandry, celebrated his seventy-first birthday, on the 24th ult.

EVERY farmer should have good, clean seed wheat, entirely free from rye and cockle, and of whatever variety he sows it should be pure.

WE shall be glad to receive, for publication, short, practical, printed articles upon any subject concerning the farm or farm work, from any or all of our readers.

FARMERS who are in the habit of sowing from one and one-half to two bushels of wheat per acre, should carefully read and think over Prof. Blount's article, entitled 'A Bushel from Every Pound.'

Two notable instances of successful farming are mentioned in the current issue of the Farm Journal. One is that of E. M. Denison, of Albany county, New York, who upon a forty-five acre farm, made last year a net profit of \$2,163.00.

A Bushel from Every Pound. I have known land so poor that it would not raise sand peas put up in five years by ploughing under a second crop of clover after mowing one and a half tons to the acre.

SKIN DISEASES CURED! By Dr. Frazer's Magic Ointment. Cures as if by magic. Pimples, Black Heads or Grubs, Blisters and Eruptions on the face, leaving the skin clear, healthy and beautiful.

POTATOES are plenty this year.

Importance of Thorough Preparation.

In the Ohio Crop and Stock Report for May, 1881, Secretary Chamberlain published a 'wheat map' of the State, showing by counties the conditions of the crop for 1880 and 1881.

Another lesson drawn from the wheat map and from the uniform testimony of our own township correspondents is, that we must have early, thorough and proper previous tillage to insure good crops.

EVERY farmer should have good, clean seed wheat, entirely free from rye and cockle, and of whatever variety he sows it should be pure.

POTATOES are plenty this year.

mistake the demands of almost all small grain. Generally they think the more seed, the larger yield, when the very reverse is the case.

Many farmers have made extensive experiments in thin sowing, and in one single case were the conditions were favorable and the culture carried out on scientific principles, has there been a failure to produce from 50 to 6000-fold.

On these grounds in small plots well cultivated last year no one of the 67 varieties sown produced less than 56-fold, all without any fertilizer whatever.

Make Allowance for Losses. Breeder's Gazette. A failure of many writers for the agricultural press, but not at all calculated to them, is in making their calculations on maximum yields; not allowing for failures or losses which are inevitable in large operations.

One stalk of corn weighs so many pounds; so many can be grown on an acre; multiply the two—product the expected yield per acre.

That looks a little as though 'bonanza farming,' with all its puffing, and advertising, and photographs, and wood cuts, had knocked the bottom out of itself.

Late Turnips. From the last of this month until the middle of August, according to locality, it will be reasonable to sow turnips for late crops.

New White Egg is an excellent sort that may be sowed later than most other varieties and will yet perfect a crop.

In some parts of France boiled apple pulp is mixed with flour for bread.
