The Centre Democrat.

BELLEFONTE, PA. AGRICULTURAL. NEWS, FACTS AND SUGGESTIONS.

Every farmer in his annual experience discovers something of value. Write it and send it to the 'Agricultural Editor of the Democrat, Bellefonte, Penn'a.' that other farmers may have the benefit of it.

THE acreage of sorghum in Kansas is double what it was last year. RUBBING the horse morning and noon with a handful of smartweed will prevent the flies from troubling him during the day.

THREE Cotswold ewes belonging to Sam Byars, living on the Dutch Ridge pike, gave birth to ten lambs. Two of them gave birth to three each and one to four. Who can beat this in the sheep business?—Augusta (Ky) Bulletin.

IN Spain it is the custom of every one who eats a fruit to dig a little hole and plant the seed, and the roads in that country are lined with trees, the fruits of which are free to all.

A RICH lumberman in northern Michigan has salted a small lake and pitched it with oysters. Salt costs very little at Saginaw, and as the lake has no outlet it is easy to keep the water salt.

THOSE who place high value on improved stock should keep in view the fact that the use of inferior stock of any breed will not give satisfaction.

Many people who are quite successful in canning fruits generally, are apt to fail with the tomato. A lady says: 'We have ten acres of fruit of all kinds and I take a great deal of pride in canning fruit.'

SINCE it is claimed that an acre of fish-pond will produce more food than five acres of ground, why should not farmers raise their own fish as systematically as they do hogs or cattle?

At this season of the year when the cultivation and harvesting of farm crops claim the constant attention of farmers, and when excessive heat makes hard work so depressing, there is danger from overwork with the ambitious farmer, who has his entire mind on the safety of his crops.

Farmers who have a number of workmen under their supervision can usually accomplish as much by their minds as by their hands, and with less fatigue.

THE PATRIOT. A Pennsylvania Newspaper for the General Public. The DAILY PATRIOT is the only morning newspaper published at the State Capital.

THE PATRIOT publishes the Associated Press news, and gives special attention to grain and produce markets. The DAILY PATRIOT opposes monopoly, bossism and centralization of political power.

THE PATRIOT is a large, eight page paper, devoted to literature, agriculture, science, manufactures, news, markets, etc. During 1882 each number will contain an illustration of some prominent topic or event.

Tar the Noses of Sheep.

Practical Farmer. The months of July and August are the ones when sheep in many localities are subject to a most aggravating annoyance from fly (oestrus bovis) which seems bound to deposit its larvae in the nostrils.

THE best known remedy is tar, in which is mixed a small amount of crude carbolic acid. If the scent of the acid does not keep the fly away he gets entangled in the tar, which is kept soft by the heat of the animal.

Save the Hay.

Corn will be scarce and high next Winter. That will send up the price of pork and beef to high figures. The only way to take the proper advantage of that condition of things is to save all the hay possible, to help make up the deficiency.

THEY will assemble in groups, holding their heads close together and their noses to the ground. As they hear the buzzing of the little pest going from one to another, they will crowd their muzzles into the loose dirt, made by their stamping, to protect themselves, and as the pest succeeds in entering the nose of a victim, it will start on a run, followed by the whole flock, to find a retreat from its enemy, throwing its head from side to side, as if in the greatest agony, while the oestrus, having gained his lodging-place, assiduously deposits his larvae in the inner margin of the nose.
