Itching Piles—Symptoms and Cure.
The symptoms are moisture, like perspiration, intense itching, increased by scratching, very distressing, particularly at night, seems as if pin-worms were crawling in and about the rectum; the private parts are sometimes affected. If allowed to continue very serious results follow. "SWAYNE'S OINTMENT" is a pleasant, sure cure. Also for Tetter, Itch, Salt Rheum, Scald Head, Erysipelas, Barbers Itch, Blotches, all scaly crusty Skin Diseases. Sent by mail for 50 cents; 3 boxes \$1.25, (in stamps). Address, DR. SWAYNE & SON, Philadelphia, Pa. Sold by Druggists. 5-8-17

EXTRAORDINARY REDUCTION. THE WKLY POST.
A first-class 36-column newspaper for \$1. per year, in advance. The year 1884 will include the most stirring and interesting events, very likely, of the next 12 years. It will cover the proceedings of Congress usually called the Presidential-making Congress, which will run into midsummer; the campaign in both parties for the Presidential nomination; the proceedings of the great National Convention to nominate candidates; the exciting Presidential canvass, certain to follow the election and its result, which we believe will be the success of the Democratic candidates. We have made this great reduction in the price of THE WEEKLY POST with a view to its increased efficiency in the Presidential canvass. Every subscriber can add one or more names by a little effort. THE WEEKLY POST is now one of the largest, best and cheapest papers in the country.
It Contains All the News.
Full telegraphic and market reports, all the political news, including debates in Congress. An excellent miscellany, State and local news. 36 columns of reading matter for \$1.00 in advance. \$1.25 single subscription, postage prepaid. \$1.00 in advance of the year, postage prepaid. Send for sample copies. Address the publishers, JAMES P. BARR & CO., 145 Wood St., Pittsburgh, Pa.

The Centre Democrat.
Bellefonte, Pa.
AGRICULTURAL.
NEWS, FACTS AND SUGGESTIONS.

Without giving the details of the experiment J. N. Muncy gives the results of a test made by Lord Kinard and reported in the journal of the Royal Agricultural Society. He selected the same kind of cattle, gave them the same kind and quantity of feed and bedded them with the same kind and quality of straw. In one case the manure was carted out doors, to remain exposed to the weather. In the other case it remained under until used. A field of twenty acres of uniform land was selected, divided in two equal parts, and planted to potatoes.

UNCOVERED DUNG.
One acre production.....Tons. Cwt. Lbs.

Second measurement.....7 18 19

COVERED DUNG.
One acre production.....Tons. Cwt. Lbs.
First measurement.....11 17 56
Second measurement.....11 12 26

From this, then, we see an increase of about four tons of potatoes per acre, which would more than compensate for taking care of the manure. The manure could be protected from rains by any cheaply constructed shed. He continued the experiment by sowing wheat on the same land, at the rate of three bushels per acre. In doing this, however, he added three cwt. per acre of guano on all the land. The results, however, are worth mentioning.

Second.....45.....61.....61.....210 of 22

These figures cover a small space in print, but they are worth the careful thought of farmers.

WINTER RADISHES—In the frozen season when there is little variety of fresh vegetables, a crisp radish is not to be despised. There is a variety known as the Mammoth White California, which grows to a large size and is said to be of excellent flavor. We have found the rose colored Chinese radish an admirable variety. The color is beautiful, the flesh firm and the flavor piquant. Seed should be sown late and when frost comes they should be buried or kept in sand in a cool cellar. No one who has a garden should let another summer pass without preparing a supply for the next winter.

AMERICAN PORK IN PARIS.—The French Academy of Medicine, in reply to the questions propounded by the Minister of Commerce, relative to the importation of pork, says: First, that the symptoms of typhoid trichinosis are so dissimilar from all others that they never can be mistaken, and second, that the importation of foreign salt pork may be fearlessly authorized by the French Government.

A WRITER says he applied tar to young pear trees as a remedy for wounds, and now he is anxious to know if a bigger idiot can be found than this side the Rocky Mountains.

An experienced farmer makes all of his fence posts from oak limbs, claiming that they will last much longer than posts of equal size from old body wood or young trees.

One experienced in such matters claims that the best ointment for cows teats is unworked butter from the churn, melted and mixed with vinegar and simmered together.

In saving eggs for early hatching be careful to gather them before they have opportunity to get chilled, as they will hatch with much greater certainty.

Farm Notes

It is difficult to say which branch of farming is the most profitable. Intelligently conducted and under proper conditions every legitimate branch of farm economy carries the elements of success to a far greater degree than mercantile business, commercial ventures or manufacturing enterprises. The pursuit of agriculture as a business is more within the control of the individual than is the case with the merchant or manufacturer.

No farm should be without its ice house. Not only is ice indispensable in the absence of a cold spring house in summer for having nice milk and butter, but for keeping all kinds of fresh meats, fish, etc. A good ice-

It is difficult to say which branch of farming is the most profitable. Intelligently conducted and under proper conditions every legitimate branch of farm economy carries the elements of success to a far greater degree than mercantile business, commercial ventures or manufacturing enterprises. The pursuit of agriculture as a business is more within the control of the individual than is the case with the merchant or manufacturer.

No farm should be without its ice house. Not only is ice indispensable in the absence of a cold spring house in summer for having nice milk and butter, but for keeping all kinds of fresh meats, fish, etc. A good ice-

house can be built for \$18 or \$20, and the interest on the cost, with the trouble of filling it, are but trifles compared to the convenience and comfort of having plenty of ice through the hot days of summer.

Professor Budd is of the opinion that cellars in which fruit is stored between picking time and the setting in of winter should be opened at night, instead of the daytime, as is usually done. The reason assigned is that at night the air is cooler, while the warmer air of the daytime has its moisture precipitated by the cool temperature of the cellar, which engenders dampness.

If you are going to set a new orchard this spring remember that it is an excellent way to prepare a plan of the orchard, showing the position of each tree, its variety, etc. If a tree dies it can be replaced by one of the same sort. Some fruit-raisers keep a book in which they register the age and variety of every tree in the orchard, together with any items in regard to its grafting, productiveness, treatment, etc., which are thought to be desirable.

The grape thrives well on rich, loamy soil, or on the poor, gravelly hillsides. Like other vines, however, it does best when well cultivated and carefully managed.

A new fire proofing liquid is a basic silicate of alumina, and it is said to be far better than tungstate of soda, because the cyanide does not scale off or evaporate, while the soda requires resapplication every week.

A Boston firm lately received a cheese weighing 523 pounds net and containing the milk of 3000 cows. It is 3 feet 8 inches high, 5 feet 4 inches in diameter, and is said to be the largest cheese in the country.

In some sections of the south the Bermuda grass is being cultivated. Once rooted it is hard to eradicate, but as it seems to thrive well during seasons of drought it has been used as pasturage in preference to less hardy grasses.

The claim that stumps may be extracted by boring holes into them and filling the holes with saltpetre has not been borne out by facts. It does well in a dry season; but the stump burns easily, without the aid of saltpetre, during such periods.

The strongest stocks of bees consume the least honey during the winter, for the reason that in their semi-torpid state they are kept warm with very little food; whereas a weak stock requires more food to keep up the requisite natural heat.

The hard pieces of driving reins frequently become smooth from use, causing the hands to shift. In such cases rub the lines with powdered rosin.

If you wish to drive your horse with an open bridle, have him tried with one before putting him to your top-wagon, otherwise he may get away with you.

Keep hens well supplied with gravel and you will prevent them from having many diseases. Too many farmers think that a hen is glad to supply her own system with everything.

Fowls are as fond of a change in their diet as people are. Give chopped onions, with a little red pepper sprinkled on, once a week. An occasional feed of sunflower seeds will give a smooth, glossy plumage.

When horses overreach, lengthen the hind shoes; when they hit the front of the hind feet, have the toe of the front shoe made narrow and concave on the inside.

Some horses, when trotting in putting their hind feet to the ground, strike principally on the toe. Such horses should have the heels lowered, and should wear shoes without heels.

Skunk cabbage is said to be good for moving in teaspoonful doses, night and morning. Moisten the hay and grain. Be careful with the diet. Never work a heavy horse on a full stomach.

Steel bits should be kept in a warm place until they are placed in the horse's mouth. Any person can realize the sensation of placing a cold bit in a horse's mouth by first touching it with his own tongue.

An excellent remedy for mange is: Oil of turpentine, one pint; add cautiously two ounces of oil of vitriol, stirring the mixture constantly; then add eight ounces linseed oil; to be rubbed in with a brush twice a day.
