ATLANTIC CITY, &

Five or six years ago Atlantic City was unknown, except as a summer re sort. For a few months in summer thousand thronged its beach and disported in its surf, but with the coming of autumn they vanished, leaving the change of climate. In a day's journey town to sleep in quiet through the long they may pass from the rigors of Northmonths of winter. Wise heads, however saw that there were a mildness of cli- spring. mate, an equability of temperature and recuperative properties in the sea air. which would some day attract as many visitors in winter as in summer. An enterprising hotel proprietor kept his house open for one winter as an experiment. People came, a few at first, but all experienced decided benefit, and the number increased from year to year, until its reputation as a great winter sanitarium is now firmly established. Last season six or eight hotels were filled with winter guests, and this winter others have joined the pioneers, and there will be ample accommodations for thousands of visitors.

Many conditions combine to make the place a great winter health resort. Its favorable location on the southern shore of New Jersey at a point, it is said, nearer than any other section of this coast to the Gulf Stream, secures for it a gentleness of climate unsurpassed on the North Atlantic. Behind the ment. His efforts, however, have been town is a vast waste of sand, which absorbes the atmospheric moisture, and aids largely in drying and purifying the the Pardon Board is satisfactory to the air. There is no body of fresh water great majority of the people it will surwithin fifty miles; the soft sea breezes tempered by the ocean's warm currents bring to land the health of the sea, while the land winds are robbed of their dampness in their course over the sands. These influences tone down the severity of winter to a degree that is remarkable when the thermometric Loyd, in the 79th year of his age. He observations of Atlantic City are compared with those of points of the same Blair, one mile west of Hollidasyburg latitude further inland. The medical fraternity bear overpowering testimony to the efficacy of the climate in pulmonary and other kindred diseases, and their resorted patients are willing witnesses to the same fact.

Apart from these considerations the city itself presents a number of desirable features. It is a well governed, handsomely built, and attractive city of some eight thousand permanent residents. All the accessories of city life until 1852, when he and his tamily are at hand. There are miles of hand- moved to Cambria county. He was a some avenue streets railway, stores of every description, churches, and an elcellent market, supplied with all the abundance of the land. The hotels orignally built fore summer use have been reconstructed and refitted with the appliances necessary comfort in winter. fires supplement the heat of stoves and radiators, while they add a charm of cheerfulness to their bright surroundings. The houses are built in full view of the sea, and glass-enclosed porticos afford both a prospect and a pomenade for the invalid too weak to face the eager air.

One's enjoyment of out-of-door exercise is perfect. The bright, bracing air, charged with the freshness of the sea, is a constant temptation to walks, sails, or drives. For the pedestrian a handsome board walk along the whole ocean front affords a fine field for exercise. A splendid beach drive of ten miles, and a surprising variety of vehicles of all descriptions, offer fine facilities for driving, while the inlet is famous as well for its sailing as for its fishing. There is no need of idleness, if one cares to be acrive-

No epidemic disease has ever prevailed at Atlantic City. The ; sanitary measures are in the hands of a board of health, the members of which fully appreciate the responsibilities of their position. Pure drinking water is introduced from the interior, and a system of sewerage is now being provided which promises to prove a most potent factor in preserving the health of the growing town. The topography of the town does not admit of natural drainage, and formerly the refuse and waste were carted off by contract. This plan proved unsatisfactory, and it was determined to employ some more effective methods. A comission was appointed as a millinery store and the fire was to examine various systems of drainage, and devise the best possible plan from such as had effectively elsewhere. The committee studied the question with care, and chose as the best what is known as the "West System." By this method the waste and sewerage are forced through pipes to a central reservoir, and thence pumped out to a point beyond the corporate limits, where, by the aid of machinery, the solid substance is converted into phosphates, and the liquid, purified by filtration, is allowed to flow into the bay. This is a most effective method, and one that has been used with great success in this country and in Europe. The work of laying the pipes is being pushed forward with vigor by a New York firm, toona Times.

and the early completion of the work is confi lently expected.

In the matter of accessibility no resort is more favored than Atlantic City. From Philadelybia it is a ride of one and a half and from New York four and a half hours by the Pennsylvania Railroad. To the residents of the East and North it offers the double inducement of easy access ,and a complete ern winter into the geniality of early

Although the season is not considered open until February, the vanguard ecty, to wit: of the coming army is already as hand, and the hotels are receiving daily accessions to their number of guests Every indication points to a most successful sesson.

The State Board of Pardons has de. cided not to interfere with the execution of Dr. L. U. Beach. The case had been presented to the board by S. A. Landis, Esq., in a very complete man ner and argued with all the ability and fervor of that distinguished advocate. Mr. Landis has all the time been unpressed with the conviction that Beach is insane, or was insane at the time the deed was committed, and he threw all his energies into the defense and has since the trial left nothing undone to secure a pardon or a commutation of the sentence to life imprisonunvailing and Beach must hang on the day appointed. While the decision of prise many who had believed that the efforts in his behalf would be successful. for the execution.

on Sunday morning, Jan. 18th, at the home of his granddanghter, Mrs. Annie was born in Huntingdon county, now near the place where the Holliday children were killed by the Indians. He was a son of a granddaughter of William Holiday: the father of the murdered children. His mother's maiden name was Mary Holliday. In 1836 he moved to Lycoming county, now Clinton, where he had a contract on the West Branch canal, near Youngwomans south west by North Front street; said lot town. In 1839 he moved to Mill Hall being 66 feet front on North Front street, and resided there and in the vicinity consistent member of the Methodist Episcopal church for forty nine years .-L. H. Democrat.

Last week Senator Wallace introduced an anti-discrimination bill in the sen- room partly finished, on Laurel street; sleet ate that is very exhaustive in its prov- the Borough Engine House and Council isions. It provides that any railroad Chamber, also situated on Laurel street shall have the right to intersect, con- on North Second street, one being a doubnect or cross any other railroad, and le house, suitable for two families, with shall receive or transport passengers, tonnage and cars, loaded or empty, without delay. Any railroad or canal company refusing or neglecting to act good condition. as a common carrier or demanding an exhorbitant compensation shall forfeit and pay threefold the actual damages suffered to persons or corporations by reason of such refusal. Any railroad or canal directory, official or employe neglecting or refusing to aid in the performance of that railroad as a common carrier shall be adjudged guilty of a misdemeanor, subject to imprisonment for not more than six months and pay a fine of not more than \$3,000. Any railroad demanding or receiving exor. bitant rates for transporting freight or passengers is subject to payment of threefold damage to the party injured or if the employee so charged shall be adjudged guilty of the misdemeanor, with the punishment stated in the first instance. Threefold damage is to be awarded where unjust discrimination is practiced.

while Police Officer Dotzler was standing at the corner of Sixteenth street and Eleventh avenue he observed smoke coming out the front door at the house of Mrs. S. J. Renner, Eleventh avenue above Sixteenth street. The officer ran over and found a couple of woman and a couple of men fighting inside with a fire. The place is occupied among the boxes on the shelves. The officer directed the party, and with the aid of a litile water the flames were

smothered. An investigation showed that oil had been spilled along the shelves and large quantities had been spilled in the drawers at the side of the room. Mrs. Renner says that hearing the gate slamming, her husband got up, went down stairs and found the store burning. How the oil got there could not be explained, but it was there in such quan-ties as to leave no doubt that it was the work of incendaries. The goods in the room not touched by fire or water were ruined by the oil. Mrs. Renner keeps

Barnums Great London Shows will not be divided, as was stated in the New York Times of the 21 inst. Mr. Barnum assures the public that they will never be divided, but continue to add new attractions to his already fa-

Sheriff Sales.
