[Cleveland Leader.] [Cleveland Leader.]

John Randolph, of Roanoke, was as peculiar when it came to dogs as he was in many other respects. Mr. Henderson, the intelligent barber under the American house, lived in Richmond, Va., when he was a little shaver—he is a big one now, and a very good one, by the way—and often saw old John and heard his piping voice. Randolph had relatives in Richmond and frequently drove up from Roanoke to vicit quently drove up from Roanoke to visit them. His carriage was very large, very showy and very much admired. It had great leather straps for springs, and a high seat in front for the driver. When he came into Lichmond Randolph kicked up a vast amount of dust, and people ran to the windows to see him pass. Three horses dragged the carriage. The leader was ridden by Juba, a black man, while

the other two. Randolph on such occasions would lean back and gaze about him the same as if he had been a king or a conqueror. Traiting behind the carriage were five or six immense greyhounds, who seemed to recognize the pomposity of their situation, for they turned up their noses at the other dogs and said nothing. Juba was invested with the exclusi e care of these dogs, and was ordered by his master to furnish them plates to eat from, and with the best steaks that the market afforded. Under no circumstances would Randolph permit his dog to eat scraps from the table. Their palates were tickled with choice cuts, and their thirst quenched with rich milk.

John, the driver, sat on the seat and drove

Dogs were very numerous in those days, and men were paid premiums for catching and killing them. As the Randolph caravan was approaching Richmond one day the handsomest dog in the procession ran ahead to see what he could see. Presently has encountered two catchers who ently he encountered two catchers who threw a net over his head and then proceed to tie a rope around his neck. whined and barked, and Juba, hearing the commotion, dug his spurs into the tanks of his leader, while John cracked his whip, and the whole party, Pandolph. Juba and John, were borne along on a run to the rescue.

The catchers were just about to disap pear in the woods by the side of the road with their prize when Randolph drew up.

Taking in the situation he produced a pistol and ordered the release of his dog.

The catchers complied at once, whereupon Randolph screamed out in his peculiarly shrill manner: "Juba, O Juba, fetch some water and wash the dog where the poor white men had hold of him "

How Clerks Recognize a "Beat."

[Chi a to Tribune.] "How much is my bill? I had three meals and no room," said a departing guest to the cashier in one of the hotels. Without looking at the books the cashier named the amount, which was paid, and

You have a good deel of confidence in that man's honesty," was suggested to the cashier by a reporter waiting near by.

"How are we going to help ourselves," was the reply, as the cashier shrugged his shoulders. If we take his word for it and rely on his honor ten chances to one he will be honest. If we watch the guests some of them will think it a fine trick to beat us just for the fun of the game. How did I know just how many meals the last man took here? He looked like an honest man for one thing. That goes a long way. The beat betrays signs in spite of all he can do that the clerk makes a mental note of when he registers, and looks out for any game he may try. is really curious how a man shows in small things what he really is. Signs that you or I would not notice he detects instantly, and the man cannot beat the hotel out of a cent after that,

the Wood" was a disguised recital of the reported murder of his young nephews by Richard III. Titroughout the tale there is a marked resemblance to several leading facts connected with the king and his brother's children, as well as a correspondence with historic details. In an old black letter copy of the ballad there is a rude representation of a stag, which is significant, because a stag was the badge of the unfortunate Edward V.

How to Get Rich. (Exchange

Nothing is more easy than to grow rich. It is only to trust nobody, to befriend none, to get everything and to save all you get, to stint ourselves and everybody belonging to us, to be the friend of no man and have no man for our friend, to heap interest upon interest, cent upon cent, to be mean, miserable and despised for some twenty or thirty years, and riches will come as sure as disease and disappoint-

Lead in the Tinning.

(Exchange, M. Fordoz gives in Cosmos a very simple and useful method for detecting lead in the tinning of culinary utensils. The vessels being carefully cleaned to remove grease, a drop of nitric acid is applied to any part, and a gentle heat is used to dry the spot. A drop of the solution of iodide of potassium is applied to the spot, and if lead be present a yellow iodide of lead is formed.

Womanly Innoceace.

[Pittsburg Chronicle.] "It is as plain as the nose on your face, and there's no excuse for your overlooking it," exclaimed a husband whose wife had forgotten to reduce the size of a buttonhole in his shirt collar.

"But, deary, how can I help overlooking the nose on my face?" was the patient and placating answer that set him wild.

Out of Butter. (Exchange,

An entry in Washington's diary, dated February, 1768, shows the great number of visitors he entertained at that time. "Would any person believe," he says,
"that with 101 cows actually reported at
a late enumeration of my cattle I should
still be obliged to bay butter."

And No Questions Asked.

[London Punch.] Personal-If L. M-hdi, who recently took a large city at the corner of the Blue and White Niles, will return the same, all will be forgiven and no questions asked. Address William E. Gl-dst-ne at this

The Zulu Bible.

This year, for the first time, it is said, the Zulus have had the entire Bible translated for them in their own language.

Col. Ingersoll: If your child has got to get up early in the morning it is just as easy to waken him with a kiss as with a alub.

Jud Lafagan: Never think to live by hances are all taken.

THE ELECTRICAL AGE.

Wonders of Electricity To Be Bealised Before Many Years.

[Cor. Van Nostranl's Magazine.] The possible applications of the princi-ple of the electrical transmission of power, are almost numberless. We shall, believe, at no distant date, have great central stations, possibly situated at the bottom of coal pits, where enormous steam engines will drive many electric machines. We shall have wires laid along every street, the electricity tapped into every house, and the quantity of electricity used in each house registered as tas is at present. The storage istered as gas is at present. The storage battery will fill a place corresponding to the gasometer in the gas system making the current st ady, rendering the con-sumer independent of the irregular action or stoppages of the dynamos of the cen-tral station, and enabling the use of dynames of the highest tension—i.e., those which produce the currents of the greatest intensity. The electricity will be passed through little electric machines to drive machinery to produce ventilation to replace stoves, and to work all sorts of apparatus, as well as to give everybody an electric light. Solar heat will be used to run the dynamos in the cloudless regions. Everywhere the powers of the tides and such waterfalls as Niagara are to be util-Is not a millennium to be anticipated when the water power of a country shall be available at every door?
Steam, which in the last century has

conferred so many benefits on the world, will give way before electricity. The dynamo will replace the steam engine. This prediction seems wild and visionary, yet when steam was first thought of as an available force its advocates were consid ered, just as the advocates of dynamical electricity to-day are considered, mere enthusiasts. But public opinion never stops the march of intellect. After it had proved the powers of steam to be enormous, genius never halted, but straightway went on anticipating still more wonderful discoveries in the realms of electricity.

The prophetic ken of science was hap The prophetic ken of science was hap pily exhibited by Dr. Lardner in his treatise on the steam engine. "Philos ophy," said he, haif a century ago, "al-ready directs her fingers at sources of inexhaustible power in the phenomena of electricity and magnetism, and many causes combine to justify the expectation that we are on the eve of mechanical dis coveries still greater than any which have yet appeared, and that the steam engine itself, with the gigantic powers conferred upon it by the immortal Watt, will dwindle into insignificance in comparison with the hidden powers of nature still to be revealed; and the day will come when that machine which is now extending the blessings of civilization to the most remote skirts of the globe will cease to have existence, ex-

cept in the page of history. To day we are beginning to appreciate the truth of this prophecy. To day we see dynamical electricity in the forefront of the physical sciences. The principle of the transmission of power by electricity fast approaches its realization. We are in truth, just entering upon a wonderful

The First Families. [Boston Budget.]

A book called "The First Families of the United States" is soon to burst upon a wondering world. Some people may be verdant enough to think that it will refer to the aborigines and their red descendants, but they will be as far out of the way in their speculations as the Indian was when he supposed the spirit of his dog would accompany him to the happy hunting-grounds of the hereafter.

The volume, which will probably be welcomed by all Angio mannes, will be an imitation, as far as possible, we are told, of "Burke's Peerage," and will be devoted to recording the deeds of those white settlers who have been fortunate enough to become wealthy in this country. Its pages will be illuminated with crests The popular legend of the "Babes in and coats of arms, and those whose fathers came here in their shirt sleeves ought to communicate with the author as quickly as possible, so that they may be turnished with heraldic devices worthy of their aristocratic rank in this Demo cratic country. A canal boat couchant on an argent field might suit some people, and a pedier's pack rampant, with the motto, "We might go further and fur worse," might answer for others.

Ivy Keeps the Wall Dry.

Let any one examine any ivy covered wall, and they will discover the leaves hang down, one over another, from the highest point to which the plant attains to the ground, forming an ornamental shield that casts off the rain and prevents its beating against the wall, conveying it from leaf to leaf downward, preventing its ever coming in contact with or moist-ening the walls; while the clinging nature of the plant, intended for the purpose of adhesion, thrusts its shoots into the crevices as roots and claspers, according as it ascends and acts as so many sucking engines, extracting and drawing away for the nourishment of its own luxuriance whatever moisture the walls may be supposed to attract or imbibe from the atmosphere. No walls are dryer, or so dry, as those to which ivy forms a permanent external covering.

The Date Was On It.

Acta Co.umbiana. He was a freshman, but a most enthusi-stic numismatist. "Do you know," astic numismatist. astic numismatist. "Do you know, said he, with an air of profound gravity, "I find it very hard work to secure old coins—I mean, for example, those that can date back beyond the time of Constantine the treat. I have some that the collector I purchased them from says are older, but they are in the main much defaced, and their antiquity becomes a matter of mere conjecture. I was in great luck, however, the other day, for while strolling down town I chanced to while strolling down flown I chanced to drop into an old curiosity shop, and the proprietor, to my great delight, produced a coin for which I would not take \$100—the oldest I have ever heard of, undamaged and clear—591 B. C., and it has the date on it." The freshman looked supremely happy.

Central American Republics.

[Inter Ocean.] Central America, comprising the five independent republics of Costa Rica, Guatemala, Honduras, Nicaragua, and San Salvador, has an area of about 175,000 square miles, and a population of about 2,951,000. The people are divided into three classes, whites and creoles mestizos, or the offspring of whites and Indians, and the aboriginal native.

Something New in Net-

[Exchange.] "Here is an advertisement that interest me a good deal," said Mrs. Benton thoughtrully. "What is it?" asked he husband. "Why, its the advertisemen. of a '7 per cent. net security guaranteed. I'm awfully bethered lately about keeping up my back hair, and I believe I'll call ir and look at it."

A NEW FIRM.

McCalmont & Co

Erie Mail East and West connect at Erie with trains on L. S. & M. S. RR.; at Corry with B. P. & W.RR; at Emporium with B., N. Y. & P. RR., and at Driftwood with A. V. RR. R. NEILSON,

No diseases have so thoroughly baffled the skill of the medical profession as mancerous affections and as they have always been considered incarable, it has been thought disreputable to adopt their treatment as a specialty; and hence physi-mans have neglected their proper study.

But of late years new and important dis coveries have brought forth a course that coveries have brought forth a course that now proves successful in any of its forms, with certainty, without the use of the knife or caustic plasters. We have a treatment that is comparatively mild. It is not poisonous, does not interfere with the healthy flesh, can be applied to any part of the body, even the tongue. We take nothing for our services until the cancer is cured. Address

FRUIT JARS...-We have the new lightning fruit far and Mason's porcelain-lined and glass top jars. The lightning jar is fer ahead of anything yet known. It is a little higher in price than the Mason jar, but it is worth more than the difference in price. Buy the lightning jar and you will not regist it. We have them in pints, quarte and half galloss.

MEATS.—Fine sugar-cured Hams. Shoulders. Break-fast Bacon, and dried Be-f. Naked and canvassed. We guarantee every piece of meat we sell,

OUR MEAT MARKET.—We have fifty fine lambs t dress for our market as wanted. We give specia attention to getting fine lambs and always try to have a fine flock sheed. Our customers can depend on getting nice lamb at all times. SECHLER & CO. GREERS & MEAT NARKEY. Bush Honse Block, Belleionte, Pa.

Dr. Ryman's Indian Vegetable Balsam

The greatest known remedy for Colds, Consumption, Coughs, Hearseness, Asthma, Sore Throat, Croup, Spitting Blood, and all Diseases arising from an irritated throat and Inflamed Lungs.

This R*isamic Comdound has been used in private practice over twenty years, gaining a high reputation for curing all Lung and Throat affections with those who have need it. It is a sad reality, yet true, that two-thirds of the deaths within our mid-tare caused from bad colds becoming deeply seated in the vital portions of the lung tissue through neglect and improper care or treatment. When, health is destroyed all erjoyment of life is lost. Then, because of these treacherous colds, which suck the life-blood by degrees, and leave the poor emaciated sufferer with no chance for relief, the reliable way is to thoroughly eradicate the destroyer from the system

Ryman's Pure Vegetable Remedy.

Mucous membrane of the Throat and Bronchial Tubes, greatly facilitates expectorstion, breaking up a troublesome cough in a marvelous short period, at the same time increasing the appetite, causing an enjoyment of food, ensoies the stomach to projectly digest it, purifies the blood and imparts a healthy complexion.

RYMAN'S Columbian or Liver Pills.

These Pills have been prepared with reference to becoming a

General Family Medicine,

For Purifying the Blood, Curing Liver Complaint, Dyspepsia, Sick Head-Ache, Bilious Complaint, and for the removal of Diseases to which Females are particularly liable, in all of which cases they have become become deservedly popular.

As a medical agent it is conceded by skillful physicians to be among the

Acting on all the Glands of the Body,

And Especially the Liver.

This Pill is not a drastic purgative, but an Alterative Cathastic, Toning and Strengthening the various organs of the body, removing effete and worn-out particles of matter from the blood, thereby Cleansing and Renovating the entire system.

RYMAN'S CARMINATIVE.

For Dysentery, Diarrhoea and Cholera Morbus. This Carminitive, founded on just medical principles, is the most positive

other remedies have failed. A fair trial will prove its efficacy. FOR CHILDREN TEETHING It is the most pleasants reliable and safe remedy for children in cases of

remedy offered to the public; hundreds have been cured by it when

Griping, Pains, Colic, Cholera Morbus, Diarrhoea, &c., now before the public. A trial will prove the truth of this assertion. No mother should be without it.

FOR DYSENTERY. The most violent cases of Dysentery have speedily yielded to the magic power of this carminative- If taken according to directions suc-

cess is certain.

Ryman's Worm Syrup,

For the removal of worms no medicine was ever more deservedly popular than this. Hundreds of cases of the most distressing character have been cured, and the lives of many children saved, and some of them after other remedies had been tried in vain, and almost every hope had fled.

Dr. Ryman's Catarrh Snuff.

This is one of the most reliable and pleasant remedies for Catarrh and Cold in the head ever discovered. Under the influence of its mild, healing and curative properties the disease soon yields. Try it, and we believe your verdict will be, not one of the best, but the best.

RYMAN'S PAIN CURE.
