Remember this year to trench the flower and sl.rubbery borders fully fifteen inches deep, mixing in some manure to this full depth.

To have the hardy garden flowers show off to the best possible advantage set out in wide beds with an irregular line of evergreens along the rear side. The effect with such a back-ground will be much finer than when the beds are narrow, and limited by walks, as s) ofcen seen.

Don't allow the water to freeze in your ben house and stand all day in a solid body of ice. Fowls can't urink it and they have no means for quenching thirst if you confine them and thus neglect this important mat-

Farm products have a selling value at the place of production. That is the commercial value. They also have an additional value to the farmer who converts them into a more condensed form by feeding them to stick. That is their feeding value.

The ground for carrots, beets and parsnips should be prepared early, in order to get the seed in as soon as the soil is warm, as these crops require pleaty of time for growth and maturi. ty, while early sowing also gives them a chance to get ahead of the weeds.

Bees will give easily twice as much extracted as comb honey. Any person can succeed in obtaining extracted honey, while only an expert can secure the best success in working for comb honey. The extractor is one of the greatest aids to bee-keeping.

The four feet of an ordinary ox will make a pint of neat foot oil. The thigh bone is the most valuable being worth \$80 per ton for cutting into clothes-brush handles. The fore-leg bones are worth \$30 per ton, and are made into collar buttons, parasol handles and jewelry.

It is estimated that a half bushel of grain twice a day is a good feed for tifty sheep. Corn and oats mixed make better feed than corn alone. The sheep should have, in addition to the grain, all the hay, fodder or straw that they will eat up clean, with water within convenient access.

Cleaning up the pens and hauling out the manure materially aids in keeping the stock healthy. Hogs seem to be susceptible to diseases, per haps more so than some other kind ot stock, and cleanliness is a great aid toward health, and while you secure valuable manure by keeping the hogpens clean, you also increase the health of your stock.

Although the manure heap may be large, yet buld does not constitute nutritious elements. It is sometimes costly to haul worthless manure.
