The Comedy.

—Despite the disagreeable weather on Monday night, Humes Hall was well filled with an audience entirely en rapport with the parties giving the entertainment. "A Lesson of Love," a society drama full of pleasing situations and some not so pleasing, especially for the lover and lovers who were frequently foiled in gaining the object of their choice. The character of Mrs. Sutherland, a charming and highly educated widow—was most admirably taken by Miss Kate Jackson. Her manner and style was natural and unaffected and her articulation and enunciation was very distinct. She had the true conception of the character and displayed as much talent as many actresses we have seen in similar roles. The character of Captain Freeman, a man of considerable knowledge of the world, but very little practical experience in love affairs, was personated by Harry Keller in a most delightful manner. Captain Freeman was trying to make love to Miss Edith Leslie, (assumed by Miss May Barrett, in a very pleasing manner) the charming niece of Miss Winterbury. Miss Anastasia Winterbury, an elderly maiden of forty, whose heart was as susceptible to Cupid's darts as that of her niece, was especially well taken by Miss Anna Orvis. She was quite at ease on the stage, spoke her lines in a loud, clear tone and brought out the true idea of the character. Scott Harris was well adapted to the character of Mr. Middlemark, and did the part of the man who was continually falling in love with every marriageable female. Another very important character is that of Mr. Babblerook. Mr. James Hughes sustained this role to perfection, as an interloper or a fellow who by chance is prying eyes and opera glasses is always seeing into other peoples' affairs, is always around when not wanted, seeing the love affairs moving along smoothly with nothing to interrupt, save his own sudden appearance upon the scene. In this character he was elegant. His song from the balcony brought forth an encore and he again did it nicely with the assistance of Dr. Harris.

—A second scoundish attempt to burn the Houserville woolen factory was made on last Saturday night. A dim light was seen in the factory at midnight and Mr. Keller and three others went in the direction of the factory, when the light disappeared. They then thought that it was only the reflection of light from the house and did not investigate the matter any further. Sunday morning they entered the factory and found to their surprise that their suspicions were well founded. A fire had been built near the door which was immediately smothered when they heard Mr. Keller and his men coming down to the factory. There are many rumors afloat as to who the culprit is or are, but these are circulated by malicious parties who may be called upon to prove what they are so freely circulating. The rumors afloat were not started by the owners of the factory for they are entirely in the dark as to who the guilty parties are. The factory will be closely guarded and nightly watched by an unknown detective who is working hard for the liberal reward of \$500.00 which is offered for the arrest and conviction of the parties who attempted to burn or may burn or have been instrumental in having the same burned. Those parties who have any clue to the perpetrators are requested to call at this office. The suspicious individuals who so mysteriously disappeared in the grain field near the factory on Saturday evening, and the one who concealed himself behind a pile of posts, will do well to make themselves scarce before they get caught in the clutches of the law.

—On last Thursday night between ten and eleven o'clock, the whistle on Wagners flouring mill sounded an alarm of fire. In a few minutes the heavens in the direction of Central City gleamed redder than the flames at McCoy's furnace, and that Milesburg was having a most destructive fire was evident. It proved to be the Curtin House, at one time a hotel, but of late years used as a tenant house, and occupied by three families, A. W. Rishel, A. D. Rager and Sager. The origin of the fire is not known, but is supposed to have originated from a defective flue. The structure was entirely destroyed, but the contents were saved, with the exception of a few articles of furniture stored in an upper room belonging to Mr. George Tayler who formerly occupied the house. A large room on the second floor had recently been fitted up for the Grangers to hold their meetings in, but their valuable furniture was saved. The probable loss is between \$3,000 and \$4,000 with some insurance on the building.
