to polute the air, while rivers of the FOR liquid, and soluble part and the very life blood of the dung-hill are runing down the highway of nature, to sow the seed of death and destruction. This carelesness and waste is in a great measure encouraged by some of these Land Quacks, who try by their theory to educate farmers to the belief that it does not pay to handle and utilize these things. When a vest-pocket full of some Low Grade High Priced Climax, Ammoninated, Acid Super-phosphate (well shaken together) will do the work. It will be only a question of time, when the wis iom of these modern philosophers will become necessary to decide the pressing question, as to whether it would pay best to move the barn or the dung-hill.

A Gentle Stimulus

Is imparted to the kidneys and bladber by Hostetter's Stomach Bitters, which is most useful in overcoming torpidity of these organs. Besides infusing more activity into them, this excellent tonic endows them with additional vigor, and enables them the better to undergo the wear and tear of the escharging function imposed upon them by nature. Moreover, as they are the channel for the escape of certain impurities from the blood, increases their usefulness by strengthening and healthfully stimulating them. In cer-tain morbid conditions of these import-ant organs, they fall into a sluggish state, which is the usual percursor of disease. What then can be the greater service than a medicine which impels them to greater activity when slothful? No maladies are more perilous than those which affect the kidneys, and a medicine which averts the peril should be highly esteemed.
