Serious Danger

Threatens every man, woman or child living in a region of country where fever and ague is prevalent, since the germs of malarial disease are inhaled from the air and are s-allowed from the water of such a region. Medicinal safeguard is absolutely necessary to nullify this danger. As a means of fortifying and ac-climating the system so as to be able to resist the malacial poison. Hostetter's Stomach Bit-ters is incomparably the best and the most popular. Irregularities of the stomach, liver and bowels encourage malaria; but these are popular. Irregularities of the stomach, live and howels encourage malaria; but these ar speedily rectified by the Bitters. The functions of digestion and secretion are assisted by its use, and a vigorous as well as regular condition of the system promoted by it. Constitution and physique are thus defended against the inroads of malaria by this matchless preventive, which is also a certain and thorough remedy in worst cases of intermittent and remittent fevers.
