## THE LION HAS NOT ROARED.

His Growl Is Expected at Any Moment, Though, Despite an Assurance From London That It Will Not Be

Necessary to Protest.

WASHINGTON Feb. 1 .- It is stated that the report that a protest of Eugland against the annexation of Hawaii by the United States would be presented to Uncle Sam's officials was premature. It was said at the state department that it had not been received and there was no intimation that it would come, but the opinion prevailed that it might be expected at any time. It is admitted that England objects to the annexation proposition, but it is not known what steps she proposes to take in the event of such an act on the part of the United States.

There was a long conference at the state department between Secretary Foster, Senators Chandler and Dolph, and Representative Blount, chairman of the committee of foreign affairs, relative to the Hawaiian to commit himself on the subject at this time, as he prefers to wait and hear from the Hawaiiau commissioners en route to Washington.

He is said to be averse to conducting the negotiations, as he is in the midst of his preparations to go to Paris next week as coun sel in the Behring sea dispute. He anticipates that the discussion over the Hawaiian question will be prolonged, and he has no desire to relinquish his connection with the Behring sea case to remain here and conduct the negotiations in connection with the annexation problem.

Annexation Sentiment Growing. Senator Chandler says he called upon the secretary of state to get some information bearing on the Hawaiian question to assist him in defending the resolution providing for annexation which he introduced

There is a disposition at the state department, and also among members of the com-mittees on foreign affairs in both houses of congress, to delay any positive action until there is some official proposition before the government for consideration. At present there is nothing pending except the reports that have come in an indirect way.

There is a growing sentiment in favor of annexation, and that feeling has been strengthened in view of the fact that England objects.

Lord Rosebery's statement to the Ha waiian charge at London yesterday that England, France and Germany would protest against the annexation of Hawaii by the United States is believed to have good foundation only so far as England is concerned. The interests of France and Germany in that country are not of sufficient importance to warrant either of them in proceeding even so far as a protest against the political absorption of the islands by the United States in case it was deemed best by this country to take that action.

Dr. Mott Smith, the Hawaiian representative here, expects England to protest, and to protest vigorously. He thinks that there be a concentration at Honolulu as rapidly as possible of the naval forces of England now in the Pacific for the purpose of making a demonstration. But it is not probable, in the opinion of Dr. Smith, that this will affect the sentiment of the people in any way.

The commercial interests of Hawaii are practically all with the United States, and, although the sympathies of the native popuiation under the influence of the members of the royal family are undoubtedly with the English, still the property interest of the island will eventually control its destiny. That interest is in favor of political incorporation with the United States. In congress the situation continues to be

privately discussed by members. Mr. Harmer (Rep., Penn.), a member of the house foreign affairs committee, said:

"I approve of the steps already taken by the representatives of the United States at Honolulu, as it has prevented the government of Great Britain from assuming protectorate over the islands, which would have resulted in absolute possession in the near future. If to avoid this we were compelled to accept the proposition for annexa-tion at once, I would favor it. Our government should look to its own interests first, which Great Britain never fails to do

"No European power should be allowed to seize Hawaii at any time, and especially while the representatives are begging at our doors for annexation.

"It is claimed that no international treaty would be violated by annexation. France and Great Britain recognized the independence of the islands in 1843, and subsequently the United States.

"Much will depend upon the development of the next few days, but I believe with careful consideration, keeping American interests constantly in view, we shall reach a conclusion which will be satisfactory to the people of our country."

Marines For Hawaii. SAN FRANCISCO, Feb. 1.-It is reported

here, but cannot be confirmed, that the steamer Mariposa, which leaves for the Hawaiian Islands next Friday, will carry several hundred United States marines from Mare island to serve in an emergency at Honolulu. The Mariposa is very swift and makes

the trip in 6½ days. She will beat the Claudine, which sails Wednesday, but will take eight days on the voyage.

It is also said Claus Spreckels has offered the steamer Zelandia to the government for transport duty. She used to be on the island service, but has been idle for nine months. Recently \$40,000 was spent in repairing her engines.

Is This a Covert Warning? LONDON, Feb. 1 .- It is learned on excellent authority that the British government has not instructed Sir Julian Pauncefote to otest against American interference in Hawaii, as the British government does not expect the United States to take any

step to which Great Britain would be likely The Sickness of Mrs. Talmage.
