Three Strikers Killed.

BRUSSELS, April 18.—The dynamite explosion at Mons yesterday seems to have acted as an incentive to the strikers to Senator Gray sought to have it with-drawn, but Mr. Higgins was obdurate and exercised the privilege that belonged to all manner of threats against the government, and as the day wore on they became emboldened and determined to take possession of the town for a labor procession. The intentions were known to the authorities, who have many spies among the work-men, and when the mob, singing the "Carmagnole" and the "Marseillaise," attempted to march through the streets they were met by a strong detachment of the civic guard. The usual order was given for the strikers to disperse, but no attention was paid to it by the strikers.

Hooting and yelling they attempted to march on, when the order was given for the civic guard to prepare to fire. The mob defied the guards to fire upon them, and threw heavy stones, bottles and other missiles at them. The guard fired upon the crowd, but this did not effect their dispersal. On the contrary, it only infuriated them and a charge en masse was made upon the guard. A desperate hand-to-hand similate ensued. The main body of the strikers was broken up, but groups of struggling men could be seen in the side streets leading from the main thoroughfare.

The battle was long and bitterly con-tested, but finally the civic guard were victorious. It is known that three of the miners were killed. Many of the rioters were wounded and a number were taken to the hospitals. It is thought that the exact number of the wounded will never be known, as some of them were carried away by their friends to prevent their falling into the hands of the authorities.

The killing of the strikers has added greatly to the excitement in the town, and there is danger of a more serious outbreak Men and women from the adjacent mining dilages are flocking into Mons and the authorities are anxiously awaiting events. Mons is the center of the great Borinage

The Blood of Life,

Runs the old saying, and everything that ever makes part of any organ of the body must reach its place therein through the blood. Therefore, if the blood is purified and kept in good condition by the use of Hood's Sarsaparilla, it necessarily follows that the benefit of the medicine is imparted to every organ of the body. Can anything be simpler than the method by which this excellent medicine gives good health to all who will try it fairly and patiently?
