

TWO DEATHS FROM STARVATION.

Cases Referred to the Coroner in New York for Investigation.

New York, June 19.—Dr. John T. Nagle, of the bureau of vital statistics, has referred to the coroner's office for investigation two cases of death said to have resulted from starvation.

He reported that Mary McQuade, eleven months old, had died at No. 8 Varick place and that Dr. T. T. Janeway, of the Northern dispensary, at No. 26 West Seventeenth street, had stated that the child's death had resulted from acute gastritis, due to lack of nourishment.

The child was cared for by Mrs. McDonough, of No. 350 Cherry street. It had been there for three months and Dr. Nagle asked the coroner's office to ascertain whether it had been the victim of "baby farming."

The other case was that of Thomas Daly, 38 years old, who died in the Charity hospital on Blackwell's Island. Dr. M. C. Carr, of the Charity hospital, certified that Daly's death was due to starvation. The man had been in the hospital for nine days and his system was too weak to receive food when he became a patient.

It was thought that he was starving in this city for a long while before his removal to the hospital.

While the turnkey was enjoying his late morning sleep Ellwood opened the front jail door and walked into liberty. Marshal Harnah returned to Pittsburgh without his prisoner. This makes the fifth successful escape from the county jail under the present sheriff in five months.

Delicate Weights in a Mint.

New Orleans Times Democrat. Sixteen one-hundredths of a grain in weight is enough to make trouble and work for mint officials. After the silver pieces are coined a small number are examined and weighed by the supervisor's office before the lot is received. Then two pieces are sent the director at Washington, by whom they are weighed. Out of a lot of 5,000 ten-cent silver pieces coined in this city Supervisor Smyth failed to draw from the lot any that was not to the requirement in every way, and accordingly drew out of the lot two more dimes and then sent them to Washington. One of them was found to be sixteen one-hundredths of a grain light, of which fact Dr. Smyth was accordingly notified. This necessitated the reweighing of the whole lot, in which only a dozen or so were found not to be in compliance with the weight regulations.

The Libby Prison War Museum.

Of the many attractions outside of the World's Fair in Chicago, there are but a few in which there is so much interest centered as there is in the Libby Prison War Museum. In 1861 this celebrated prison was removed from Richmond to Chicago and converted into a War Museum. The project was undertaken by a syndicate of the best known business men of the city whose enterprise was conceived in a commercial spirit, but has attained a national reputation. A project such as this was never before heard of. To move a stone and brick building the size of Libby more than a thousand miles, across rivers and mountains, was an enterprise that many of the best contractors in the West refused to undertake at any price. The great collection is considered to be second to none in the country and includes much of the most valuable material that the greatest civil war the world has ever known has left to posterity. The collection includes thousands and thousands of relics of every description, many of which form important links in the history of the Nation. The old building itself is fraught with interesting memories and the story of the celebrated tunnel escape of Feb. 9, 1862, now fails to interest the visitors. One hundred and nine Union officers made their escape through that tunnel, which formed one of the most thrilling events in the history of the war.

Completely Uprooted.

How many remedies there are which merely relieve with out uprooting disease. The contrast with stinging medicines which such palliatives afford, not only enhances the dignity of the former, but serves to emphasize the folly of employing half-way measures when thorough ones are available. A marked instance of this is the effect, on the one hand, of Letzer's Stomach Bitters in cases of hills and fever, and biliousness, and on the other of ordinary remedies in maladies of this type. By the Bitters, malarial complaint in every stage, and of the most malignant type, are completely conquered and lose their hold upon the system. They are rarely, if ever, displaced by the ordinary resources of medicine, although choleraism, nervousness and debility, by the Bitters they are cured when many remedies fail.
