Artistic coffins are nowadays made out of wood pulp.

Among the industries of the United States that of paper making now holds fifth place.

In the twenty years that have elapsed since the close of the Franco-Prussian war Europe has doubled her military strength.

Although worth \$35,000,000 at the the time of his death, Leland Stanford borrowed money all his life, and said that he could have profitably used more.

A remarkable discovery has been made at Carrog, near Llangollen, Wales. While a number of workmen were carting stones from the bed of the river Dee, they discovered the remains of an ancient church, which was washed down by a heavy flood 300 years ago.

The scientific investigors at Munich claim to have discovered that "Asiatic cholera is essentially a poisoning with with nitric acid generated by Koch's comma bacilli." This is enteresting. If we can't kill the bacilli, perhaps something can be devised to neutralize the poisonous acid.

The largest use of placards on record was prior to the Paris election in 1889. General Boulanger had 15,000 billstickers, who put up 45,000 daily, in all 900,000. In some places, when they were torn down after the election, there were found sixty layers of bills alternating with those of Boulanger's rival.

The collection of postage stamps has brought into existence a professional stamp repairer, who, for a small fee, dexteriously repairs mutilated stamps. His specialty is restoring the margin to envelope stamps that have been cut to shape, and have thus lost much of their philatelic value.

Mr. Dobbins writes to the Pittsburg Dispatch that the very objectionable bit of slapg, "the wind blew through his whiskers," is not American at all. In fact, it was first used by an Englishman, one Dan Chaucer, who wrote the "Canterbury Tales." In the tale of "The Shipman" occurs this remarkable line, "With many a tempest had his beard been shaken."

The Central Peruvian Railway across the Andes starts from sea level at Callao. It crosses the Andes range to Oroya, 136 miles from the coast.

Twelve different kinds of tu ogy are preached in four languages in the eight churches at Wahoo, Neb.

Whaling in the Antarctic seas this season is reported to be a failure. Grampuses, seals and sea lions are numerous, it is further stated.

For some unexplained reason, states the New York Tribune, more fires seem to break out on Sunday morning than at any other time of the week.

The success of the three experiment farms in Manitoba, Assiniboia and British Columbia is causing Canadian farmers to urge the Government to establish a larger number.

When people talk about bad times the Baltimore American thinks it would be well for them to remember that there is about seventeen hundred million dollars (\$1,700,000,000) of deposits in American savings banks. Savings banks are pretty good financial thermometers for telling the real condition of the country.

The Cincinnati Times-Star exclaims : Chicago that succeeded in planning and executing an architectural and artistic and a mechanical triumph of which the most imaginative Roman poet in Rome's Augustan age could never have dreamed, will continue to be talked about throughout the world and in places, too, where all other American cities are unknown.

Says the New York Independent: It is the native custom in Tinnevelly to marry with a necklace instead of a ring, and the Church of England missionaries there have consented to the change in the marriage service so that it shall read : "With this necklace I thee wed." But with a delicious insularity some of the Angelicans at home are protesting against the crime of the change.

The new invention of M. Turpin, to whom the world is indebted for the discovery of melenite, the most powerful explosive in existence, seems destined, if not to render war impossible, at any rate, to render the artillery now in existence altogether superfluous. It consists of a very light gun and carriage drawn by two horses, and four charges can be fired within the space of fifteen minutes, each of which throws 25,000 bullets over a surface of 20,000 square yards. The range of the gun is about two miles.

Connecticut is now added to the list of States where the practice of medicine is regulated by law. There are now but nine States in the Union where the practice of this profession is absolutely unrestricted by any rules whatever, and, the Boston Herald regrets to say, that Massachusetts is one of the delinquent States. The only equipment that is essential for the practice of medicine in Massachusetts is a signboard hung outside the physician's office, and even this is frequently dispensed with. Massachusetts is the irregular practitioner's paradise. Where has the duster gone? asks the Philadelphia Press. It is still worn in the West. It still appears on longer lines of travel. Its manifest and sensible convenience endears it to middleaged men. But on a short line like that between this city and New York the duster has disappeared as completely as last winter's snowflakes. The clothing stores keep them on the back shelves. Few are sold. The big wholesale dealers do not sell a dozen where they once disposed of bales. In a few short years this convenient garment has been relegated to the country districts and the provinces. Yet in cur climate, with our hot, dry summers, our abundant dust and long railroad journeys, the duster ought to have become a permanent article of clothing for all travelers. "Kyphosis bicyclistarum" is apparently known in the West as well as the East. "Why 18 it," asks the Chicago Journal, "that as soon as a young man learns the useful and graceful art of bicycle riding he must forthwith attempt to undo the work by which he was made in the image of his Maker and seek to transform himself into a hideous mesozoic dinosaur or some other uncanny creeping thing? The head goes down, the back is humped, the arms assume the position of forelegs, and all that is wanting is a croak to pass for a broken-backed frog. There is no excuse for this abomination. An erect attitude gives the rider a much better command of the wheel. It is merely a habit due to too much pernicious and unhealthy "scorching." Women who ride wheels do not stoop, Out upon this frogsquat, this hump-backed disease, "kyphosis bicyclistarum !"

THE JAPANESE EXHIBIT. DRIENTAL FARMING PROD-UCTS AT THE FAIR. UCTS AT THE FAIR.

Japan's Section of the Agricultural Building is an Interesting Place to fowls. Visit-Various Tea Exhibits-The Japanese Honey Industry--Domestic Fowls of the Country.

Agriculture is the occupation of the greater part of the people of Japan. The mountainous and volcanic nature of the country renders large portions untillable. For probably the same reason the soil is not naturally very fertile, but it can be, and is, made so by the abundant use of compost. Moreover, not even half of what is fairly fertile is under even hair of what is hairly fertile is under cultivation; but the amount of cultivated land is gradually increasing, and the harvests are becoming richer. But it can be readily understood that if, for any reason, the crops fail, severe suffering will be widespread. The prosperity of the country depends upon the prosperity of the farmers.

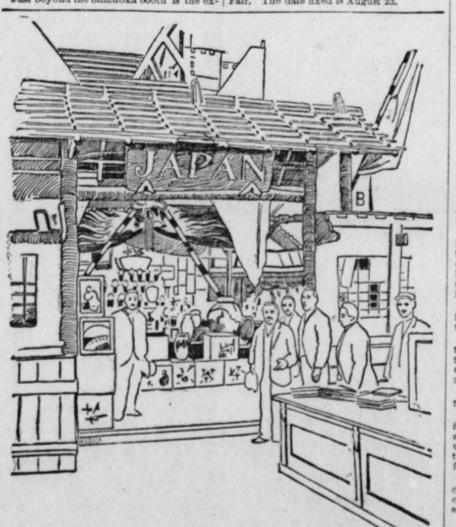

JAPANESE VEGETABLE PEDDLERS.

The front entrance to Japan's pavilion in the Agricultural Building, says the Chicago Record, is at the south end of the Japanese section. The doorway is constructed of native woods in the style of a native gateway, with a gable roof. Just inside the entrance is a booth devoted to the exhibit of tea from Shisuoka Kem (prefecture).

The Shizuoka hen (presecture). The Shizuoka tea is of the first quality. Its fine flavor has been developed through the culture of many years. The annual product is 25,000,000 pounds, of which 20,000,000 pounds are exported to the United States. A small sample package of this tea is given away, of which a tiny cup may be had in the Japanese tea house,

Mr. M. Hoshita is the overseer of the Shiz noka exhibits ; Mr. T. Watanabe is in charge of the different exhibits of tea, and Mr. K. Tawara is chief of both the fisheries and the agricultural bureaus. These gentlemen are always pleased to make explanations to the The sample package is put up in paper dipped in the tannie acid of an unr persimmon to preserve it from moisture. Mr. Watanabe is "purveyor of tea to his Imperial Majesty's Court of Japan." Just beyond the Shizuoka booth is the ex-Fair. The date fixed is August 23.

represents sportsmen, in the early morning or evening twilight, when the wild ducks are flying low, catching them in nets at the end of long bamboo poles. The two pictures at the extremes portray the two pictures methods of eatching wild duck on Lake Tega in Chiba prefecture. One is by means of bird-limed ropes stretched over the surface of the water ; the other is by a number of large spread-nets toward which the ducks are driven by hunters. The remaining picture illustrates Japanese hawking, which was a very popular sport in former times.

WORLD'S FAIR NOTES. Evoran SECOR, of Forest City, Iowa, has een appointed judge in the honey exhibits SECRETARY CARLISLE has decided that

At the seventh mile it is 700 feet above the level of the sea. At the fiftieth mile the elevation is about 6000 feet and the ascent, is steady and rapid until it reaches its highest point at the 106th mile, when the height is 15,665 feet.

The originator of the Concord grape is still living in Concord, Mass. He is Ephraim W. Bull, now eighty-sever years old, and one of the promine .t men of the historic town. He was a friend of Emerson and Alcott, and has been greatly honored by distinguished visitors to Concord, and by horticulturists at home and abroad. In his garden at Concord he still shows the old mother vine of the Concord grape which he developed from the seed of a native wild grape planted just fifty years ago.

The conservative University of Virginia could not permit a woman to attend its lectures, observes the New York Telegram, but it did suffer Miss Caroline Preston Davis to stand its examinations in mathematics at the close of the year, and as she passed the whole course successfully the faculty bestowed on her the certificate of excellence and made her practically the first female graduate of the university. Dr. Thernton gave to the graduating class the privilege of conveying to her the honorary diploma and the boys did it with a yell.

Says the New York Press : Four distinct invasions of the frozen mysteries of the Arctic region will be under way this year. Lieutenant Peary will endeavor to map the northern coast of Greenland and to investigate the archipelago which lies beyond. If conditions favor he may make a venturesome dash on sledges across the frozen sea toward the pole. The other American explorer, Gilder, will examine the movement of the magnetic pole. Two avowed attempts to reach the North Pole will be made, one by Doctor Nausen, of Norway, who proposes to drift with the ice in a craft especially designed to resist pressure from floes, and another by Mr. Jackson, whose effort to cross the ice on aledges assumes that there is no open Polar Sea, and is supported by the Royal Geographical Society of Great Britain.

JAFANESE EXHIBIT IN THE AGRICULTURAL BUILDING.

hibit of Ise tes, above which is a series of pictures illustrative of the different stages and kinds of labor employed upon the leaves from picking to shipping. A group of photo-graphs of similar scenes may also be found just over the front entrance. Ise is the name of a province famous for its traditions and its tea. It is the place where, according to Japanese history (unfortunately not credi-ble), Jimmu Tenno, the Japanese Romulus, in 660, B. C., laid the foundations of the Japanese empire. It is now the most sacred spot in all Japan, the seat of the ancient and popular shrines where the ancestors of the present emperor are worshiped. It is also the place where, according to tradition, the tea-plat was first discovered and cultivated. Other important agricultural products exhibited by the Japanese are rice, barley, wheat, buckwheat, beans, sweet potatoes (dried), daikon (a large, bitter radish, which is a staple article of diet) and tobacco.

A great many kinds of jellies and sweet-meats are made by the Japanese from vege-table products and are harmless and de-Several varieties of bottled, boxed and canned fruits, jellies and confections are on exhibition. failure in Western New York

A MATERIAL falling off is noticable in the number of applications for Federal jobs. THE Legislature of Vera Cruz, Mexico, has prohibited cock fighting and buil fighting.

A PHENOMENAL crop of wheat is predicted for the Canadian prairies the coming fall.

THE Mexican Government will pay \$5,000. 000 in railroad subsidies in the year following July 1.

The failures for the first six months of 1893 have been 6239, more than in any previous like period.

Or the 20,000 licensed vehicles in New York City 10,000 are permitted to stand over night in the streets.

Curcago has taken Boston's place in the last six months and is now second in bank clearings in the country.

THE Nicaragua Canal Construction Company is out of funds and has stopped all work upon the Nicaragua Canal.

THE total value of the exports of beef and hog products from the United States during June, 1893, was \$10,098,535.

THE Canadian Dominion revenue for the year ending June 10 was \$37,183,255. The expenditure was \$30,652,653.

THE American choice timothy is quoted abroad at thirty-five dollars a ton. In Eng-land hay is now selling at from \$45 to \$59 a ton.

The scarcity of fodder in the south of Engand has become so pressing that the farmers are feeding their horses rice, which is cheaper than oats.

Tue railroads have agreed on the low rate of a cent a mile to delegates to the National Grand Army encampment at Indianapolis, Ind., in September.

A snowmen of millions of toads is reported at Grand Falls, Me. It was thought they came from the water spouts that were sent up a few days before.

THE CROP OUTLOOK.

The Secretary of Agriculture Thinks the Prospects Are Good.

J. Sterling Morton, Secretary of Agriculfure, in an interview states that the crop prospects "are good. The outlook for a fine crop of corn in all the corn-growing parts of the country is good. The reports also indi-cate that the wheat and oat crops will be

large. "A demand for large exports of hay and other forage comes from all parts of Europe, France, Germany and Belgium will take the largest quantities. We are making an effort in the Agricultural Department to secure some statistics as to the amount of beel consome statistics as to the amount of Deel con-sumed in this country. It is a difficult thing to do because of the absence of any figures on the subject. The farmers have suffered greater losses on beef in the last ten years than on any other product, and still the strange fact remains that beef is the only product of consequence which does not figure in the speculative markets. There is no dealing in 'futures' or 'options' on beel."

STRUCK BY LIGHTNING.

Two Children Killed and Their Father Nearly Blinded.

While James Watt and two children, aged. nine and eleven years, were driving from a neighbor's to Mr. Watt's house, a short distance away, they were overtaken by a shower of rain and stopped under the shelter of a tree near Basseliville, Ky. They had been there but a short time when lightning struck the tree, wagon, and occupants. The two children were instantly killed. The sight of one of Mr. Watt's eyes was destroyed and that of the other was injured.
