EXPLORER PEARY SAFE.

HE REMAINS IN GREENLAND TO COMPLETE HIS WORK.

The Thrilling Narrative of His Adventures in the Arctic Region - A Peary Baby Added to the Party-The Lieutenant to Go Northward Next Year With Two Comrades.

A dispatch from St. Johns, Newfoundland, gays: The steam whaler Falcon arrived rith eleven members of the Peary Arctic expedition, including Mrs. Peary and her yearold daughter and nurse, and also the members of the auxiliary expedition except Dr. Ohlin, the Swedish naturalist, who took passage on a Danish ship sailing direct from Godhavn to Copenhagen. The auxiliary party had sailed north last July to relieve the original party, who had been in the Arc-tic regions since last summer.

LIEUTENANT PEARY.

The story of the expedition is very thrill-ing. The first incident of note was the birth of Mrs. Peary's baby, on September 12, 1893, a month after the Falcon left last year. The baby, Marie Ahnigito Peary, came home safe with her mother.

During the month of October last frightful storms swept over Falcon Harbor, smashing the naphtha launch and washing away large quantities of oil intended for use for illum-Inating and heating purposes. The various scientific observations were

pursued all winter. The meteorological ob-servations were most successful. These were taken by Mr. Baldwin. On March 6 last the main expedition started across Greenland to Independence Bay, the furthest point north reached by Lieutenant Peary on his previous burney. The eight men, Lieutenant Peary, Entre-

kin, Astrup, Dr. Vincent, Lee, Davidson, Baldwin and Clarke, with twelve sledges and ninety-two dogs, met with frightiul weather almost from the time of starting. After a week Dr. Vincent was so used up that he had to return. The storms reached their worst point during the equinoctial gales on March 20. The party was then in camp about fifty miles from Anniversary Lodge, in a tempo-rary house at the head of Bowdoin Bay. The thermometer dropped to fifty-five and sixty degrees below zero, and remained so for about two days, while a gale blowing about fifty miles an hour buffeted the party.

lavidson and Lee were both badly frost-

ter, Mrs. Cross, the nurse, and an Esquimau girl attendant were taken aboard and the Falcon started southward. Mr. Peary decided to accompany the ship

to Cape York to superintend shipping a meteorite which he had examined while on a sledge journey, and arriving at Cape York on August 27 the ice of the cape was found intact, and thus all hope of reaching the meteorite, twenty miles distant, was dispelled.

The Falcon carried Mr. Peary north to Patomik glacier, latitude seventy-s'x degrees fifteen minutes, where he bide his wife and daughter farewell and clambered down into

his whaleboat, which, with his crew of Hen-sen and five Esquimaux, was awaiting him. The Falcon fired a parting salute, and Mr. Peary, erect and resolute, stood in the stern of his little boat and waved farewell in answer to cheers from the ship. On August 28 the Falcon started for Godhavn, but a southwesterly gale drove her many miles from her course and prevented her from arriving until September 2. The last call was at Godthaab, and leaving there September 8

The original party, except the leader, left Boston, Mass., on July 5, 1893, in the Falcon. At Portland, Me., Mr. and Mrs. Peary boarded the craft, which then proceeded north-

Lieutenant Peary and his companions are well provisioned for a year and will be well looked after by the natives. These will form the reserve party when he starts next spring over interior ice.

In Washington General Greely, comment-ing on the news from Mr. Peary, says that the failure of the party to advance further made by the Cunard liner Lucanta, which has reduced the eastward passage from New Youk to Queenstown by over two hours.

A TERRIFIC hurricane passed over the southwest coast of Spain, wrecking many small vessels. The town of Gota was partly destroyed by the storm.

THE President of Nicaragua has pardoned political prisoners, among those thus re-leased being John Taylor. Clay Ingram and other Americans connected with the Mosquito uprising.

THE NATIONAL GAME.

GLASSCOCK'S retirement left a hole in Pittsburg's infield.

BALTIMORE won the series with Louisville by ten games to two.

TweLve of the thirteen lowest averaged batters in the League are pitchers.

BECKLEY, of Pittsburg, during the season was hit by pitched balls nineteen times. THE record for base stealing is held by Hamilton, of Philadelphia-seven in one

game.

Assos, of Chicago, says there was more real science in baseball eighteen years ago than to-day.

THE Louisvilles won but two games in the East this season-one in Philadelphia, the other in Boston.

DUFFY, of Boston, was the first player in the League to make 100 hits; also the first to make his 200th.

CATCHER TENNEY, of Boston, throws left handed. He is one of the few prominent backstops that do.

Own of the surprises of the season is the great game that Lachance, of Brooklyn, has played at first base.

VAN HALTREN is the only member of the New Yorks who participated in every game played by that team.

It is reported that the Boston team will have about three new faces next season, and two of them will be pitchers.

Ix the list of seventy-five League players having a batting average of .300 and over the Boston Club has ten representatives,

HANLON, of Baltimore, says he will have exactly the same team next season, rein forced by another pitcher and catcher.

MANNING, the sole proprietor, manager, captain and second baseman of the Kansas City Club, will clear \$7000 on the season.

THE APPLE CROP.

An Expert's Estimate of the Vield for 1894.

An expert fruit man, who for fifteen years has made inspection trips through New York State, Northern Ohio, Michigan, Missourl. Kansas, Nebraska, Iowa and Canada, has just returned, and pronounced his opinion

concerning the apple crop of 1894. "The New England States," said he, "will have a good average crop, and the outlook where I have been outside is for a large yield. In no particular section west of the New England States is there a full crop, but every section in the States I visited, which has supplied winter fruit heretofore, will supply quite largely this year. A close inspection shows this to be a season in which the fruit is found well inside the tree. The quality of the fruit is below the average, ex-cept in Missouri, Kansas, Nebraska and lowa. The aggregate supply will be in ex-cess of the fall of 1891, except as it may be Iowa. changed within the next few weeks by the elements. The crop in the New England States, New York and Michigan is fully equal to that of last year. In some sections apples have been injured by the severe drought, but late rains are bound to help them."

A MURDERER SHOT.

Six Rifle Balls in His Breast From the Guns of the Executioners.

Enoch Davis, the wife murderer, died at 10.45 a. m., at Lohi Junction, Utab. with six riffe balls in his breast. About thirty officers and reporters were present at the exe-

eution, but no minister. At 10.40 be was placed in a chair with a plank at the back. The penitenitiary doctor planed a prescription blank with a black mark over his heart. Liquor was given to Davis and he was strapped down. He pro-tested, as he said he wanted the sharpsboot-ers out in plain sight instead of in the tent as they were and he said he due to wart to as they were, and he said he did not want to die "like an Indian."

At 10.43 the Marshalerled : "Make ready, take aim, fire !"

take aim, fire I" Six shots rang out and Davis moved slightly, and at 10.45 gasped faintly. The doctor said it was only a contraction of the muscles. Death was practically instantane-ous. Four balls plerced the paper, two at the side, and one ball pierced the black mark. Davis killed his wife on June 5, 1892.

HONORING FORT M'HENRY.

Eighty Years Ago It Was Bombarded by the British.

One hundred years ago Fort McHenry became the property of the United States. It is on Whetstone Point, near Baltimore, Md., and had been owned by the State from 1775. It was not the scene of any conflict in the Revolutionary War, but became celebrated in the second war with Great Britain.

Eighty years ago was fought the battle of North Point. As a part of this battle the fort withstood a terrific bombardment by the British vessels.

On the anniversary day these events were jointly celebrated in song and story. The old fort resounded with the strains of Key's Immortal "Star Spangiel Banner," inspired by the fort's defense, while over the ram-parts waved Old Glory, greeted by volleys of musketry and a chorus of volces.

NEW COUNTERFEIT BILLS.

A Five Dollar Note and a Ten Dollar Silver Certificate.

The Secret Service Division of the United States Treasury Department has issued cfrcular letters, announcing two new counterfeit United States notes, one a \$5 National

DEATH IN FLAMES.

Six Lives Lost at a Fire in Washington.

An alarm at noon called the Washington Fire Department to Massachusetts avenue and K street, where fire had been dicovered in the mattress factory of Stumpth &

Brothers. This was soon followed by a general alarm, and in a short time all the engines in the city were at the scene, but so quickly did the flames spread that the employes on the fourth and fifth floors were obliged to fly to the root and jump for their lives before the trucks arrived. Four men jumped, one of them, James E. Vaughn, sustaining fractures of both legs and fatal internal injuries. The other three escaped with more or less severe injuries, but all will recover.

Sorapid and complete was the work of the flames, that in less than half an hour from the time of their discovery the greater part of the four walls had fallen in. At 3 o'clock the work of searching for the bodies of those who were known to have been in the building and not accounted for was gun. So far as could be learned the missing ones were Henry Fowler, Philip Ackerman, Robert Reitzel, William Tennyson, William Ashe, a boy, and an engineer, name unknown.

The searchers soon found three bodies close together, about fifteen feet from the K street entrance, charred beyond hope of rec-ognition. At 5.30 o'clock the searchers tound another body within a few feet of the

engine on the ground floor. The fire, besides destroying the Stumph building, consumed the Woodruff building, a factory where all the Government files are made, and the falling walls of these buildings crushed Hall & Cammack's furnibuildings crusted Half & Cammack's furni-ture house, filled Benner's marble yard and injured the Homosopathic Dispen-sary building, on the Massachusetts avenue side. On the K street side, Offenstein's horseshoeing establishment, an oyster house and a building occupied by a gospel mission and the Horse and Cattle Food Company were demolished. The loss will probably be about \$85,000.

Duning the present season of professional weling in France and England the Ameri-ans have secured the largest share of the purses, Zimmerman and Banker or Zimmerr-nan and Wheeler taking in almost every instance first and second and occasionally irst, second and third.

THE public schools of Chicago have opened with an unexpectedly large accession of supils. Some 175,000 children presented hemselves for tuition. Two hundred and fity new teachers will have to be employed, ind larger accommodations provided.

THE MARKETS.

Late Wholesale Prices of Country Produce Quoted in New York.

Under a good demand the market has ruled generally active throughout the past week. The average price for the platform surplus at the various milk-receiving stations has been \$1.47 per can of 40 quarts. The Exchange price, was raised to 31/c. per quart. Receipts of the week, fluid

milk, gals..... Condensed milk, gals.... 1,521,729 Cream, gals 49,717 BUTTER.

SABBATH SCHOOL.

INTERNATIONAL LESSON FOR SEPTEMBER 30.

Review: Lesson of the Third Quarter - Golden Text: Mark 1., 15-Commentary.

LERSON L.—The Birth of Jesus (Luke fl., 1-16). Golden Text, Luke fl., 11. "Unto you is born this day in the city of David, a Saviour, which is Christ the Lord." The prestest event that ever occurred in this world up to that time-the incarnation of God, the Creator of all things-came to pass when the fullness of the time had come (Gal. iv., 4). There is an appointed time for every event, and God in all things is never too soon nor too late. The great things of God are nothing to the world lying in the wicked one, and so the great event is made known not to the mighty ones of earth either in church or state, but to the humble shep-herds on the plains of Bethlehem (I Cor. l., 26-29).

LESSON IL .- The Presentation in the Temple (Luke ii., 25-38). Golden Text, Luke ii., 32. "A light to lighten the Gentiles and the glory of thy people. Israel." It is to the Simeons and Annas that the Lord reveals Himself, while He pusses by the great and wise of this world. He looks to the poor and contrite spirits wire tremble at His word, who love and wait for His salvation and are separate from this present evil world. Not to the righteous Lots who live in Sodom, but to the Abrahams who live at Hebron in fel-lowship with God, does He reveal Himself

and His ways. LESSON III. -The Visit of the Wise Men (Math. il., 1-12). Golden Text, Math. il., 11, "They saw the young child with Mary, His mother, and fell down and worshiped These wise men are another illustration of the unknown on earth, but well known in heaven, to whom the Lord reveals His secrets. They were wise in the things eternal.

nal. LESSON IV.—The Flight Into Egypt (Math. H., 13-23). Golden Text, Ps. exxi., 8, "The Lord shall preserve thy going out and thy coming in." The three dreams of this lesson, in which God revealed His will to Joseph. along with the fourth in verse 20, suggests the many dreams of Scripture in connection with Job xxxiii., 14-17. The command, "Be thou there till I bring thee word" (verse 13), makes us think of the wilderness life, when every movement of Israel was directed by the pilar of cloud (Num, ix., 15-23). The wondrous fulfilling of Hox xl., 1 (see verse 15) shows how literally and fully we may exect all prophecy to be fulfilled. LESSON V.-The Youth of Jesus (Luke II.,

40-52). Golden Text, Luke il., 52. "And Jesus increased in wisdom and stature and in favor with God and man." The leading thoughts in this lesson seem to be His knowledge of who He was and what He came for, even at the age of twelve years, when He said, "I must be about my Father's busi-

LESS VI.-The Baptism of Jesus (Mark i., I-11). Golden Text, Mark i., 11, "Thou art My beloved Son, in whom I am well pleased." We have here the heraid foretold by Isaiah and Malachi, who was content to be heard and not seen, only a voice crying in the wilderness-glad to sty, "Behold the Lamb of God," and to see his own followers forsake him to tollow Jesus. Then we have the opened heaven and the Spirit descending upon Jesus as a dove and abiding on Him.

Him. LESSON VII.—The Temptation of Jesus (Math. iv., 1-11). Golden Text, Heb. iv., 15, "In all points tempted like as we are, yet without sin." While absolutely perfect in Himself, yet as our High Priest and Saviour He is made south the tempt of the first (He He is made perfect through suffering (Heb. ii., 10). I have often been glad that in this conflict with the devil Jesus did not conquer him in any miraculous way, but simply by the use of the same sword (Eph. vi., 17) to use. Let us cling to it like the man in 10% II Sam. xxiii., 10. LESSON VIII. -- The First Disciples of Jesus 9% (John 1., 35-49). Golden Text, John 1., 41, "We have found the Messiah, which is, being interpreted, the Christ." The way to make disciples of Jesus is to point Him out as the Lamb of God who taketh away sin, for He said Himself that when lifted up He would draw men unto Him. LESSON IX.-The First Miracie of Jesus (John il., 1-11), Golden Text, John il., 41, "Tais beginning of miracles did Jesus in Cana of Galilee and manifested forth His glory." That the Bible should begin with the marriage of Adam and Eve and end with the marriage of the Lamb, the last Adam and Eve and that Jesus, the Lamb of God, the last Adam, should perform His first miraclo at a marriage least, is, to say the least, very interesting. And that He should show forth His glory by turning water into wine, makes us think of His words in Luke xxii., 18, concerning the kingdom. LESSON X .- Jesus Cleansing the Temple (John il., 13-25). Golden Text, John il., 16, "Make not My Father's house a house of merchandise." It is man's way, instigated by the devil, to define holy things and places. Since Adam defiled Eden by his disobedience it has been the story all the way down. Thank God for the New Jerusalem into which no defliement can enter (Rev. xxi, 27) Lesson X1.-Jesus and Nicodemus (John 111., 1-16). Golden Text, John III., 16, so loved the world that He gave His only begotton 'Son." Realing the hearts of all men and knowing what was in man, Jesus tells this good moral man, a ruler of the Jews, that his great need is to be born from above, and that unions he is born from above he can never see por enter the kingdom of God. If we miss the kingdom of God, we must be shut out into the kingdom of dark. ness, where are weeping and gnashing of teeth. How all important, therefore, is this teeth. How all important, therefore, is this birth from above, which I tried to make plain in the notes on this lesson! LESSON XIL—Jesus at Jacob's Well (John iv., 9-26). Golden Text, John iv., 14, "Who-soever drinketh of the water that I shall give him shall never thirst." The seeking Saviour, the Gool Shepherd, finds this lost one by the well and tells her of a well which she might have within her and over carry with her have within her and ever carry with her From the water with which she was familian He leads her to the water of which she knew not by convincing her of sin and then reveal ing Himself to her, after which she became a bearer of this living water to others. LESON XIII. --Christ's Peaceful Beign (Isa. xi., 1-9). Golden Text, Isa. xi., 9, "The carth shall be full of the knowledge of the Lord." The time will surely come when the Lord. The time will surely come when the long rejected Jesus who was born in Bethle-hem, lived at Nazareth, was crucified on Cal-vary and ross from the dead will come again to the air for His people and after the great tribulation to the earth with His saints to sit on David's throne in Jerusalem and exe-use indica and inderment in all the earth cute justice and judgment in all the earth.-

Idaho has a woman horse dealer. Black bengaline silks are the latest. New York buys more lace than any other city in the world.

There is \$7,000,000 invested in corset factories in this fair land.

The size of a woman's shoe should be just half that of her glove.

Anatomists say that the tongue of woman is smaller than that of man.

Bristling bows of thin material, accordion plaited, are seen in all colors.

A photographer claims he has "taken" Sarah Bernhardt in 1007 different attitudes.

The Dowager Empress Frederick, of Germany, has a chain of thirty-two pearls valued at \$175,000.

To Mrs. Strauss, a Washington lady. belongs the honor of having the largest rose farm in the world.

Helen Blackburn is one of the most popular advocates of woman suffrage in Great Britain. She is an Irish woman.

Extremely pretty costumes for girls are made with kilt-plated skirts. The plaits are about four inches wide and pressed flat.

White woolen "sweaters," they say, with soft black silk sashes, will be the thing to wear for bicycle riding on cool mornings.

Russian newspapers are not permitted to make any reference to the dresses worn by the Empress on state or public occasions.

Dr. Margaret Abigail Cleaves, of New York, is the second woman in the world to occupy the position of physician in a public insane asylum.

Mrs. W. K. Vanderbilt sometimes wears what irreverent young men call a "hawser of solitaries," which, fastened on one shouldes, is bound round and round the bodice of her gown.

The woman who gets a tobaccobrown cheviot dress for fall will be in good style. And it she trims the bodice with black soutache braid and olives she will be right up to the top notch.

A court in Toledo, Ohio, has appointed three women to actas appraisers of a decedent's estate, probably the first time women have been thus officially recognized. The estate is that of a woman.

William Cullen Bryant's mother, it is said, kept a diary for fifty-three years without missing a day. This is the entry for November 3, 1794 : "Storming, wind N. E.; churned; seven in the evening son born."

Some of the brotherhood insurance societies are giving women the benefit of the insurance privileges. The Knights of the Golden Eagle has amended its rules to admit the women members to the insurance branch. The magnificent marble palace that Mrs. Vanderbilt erected at Newport. R. I., at a cost of more than \$1,000,000 resembles the White House at Washington in its architecture and is one of the finest samples of that school in the world. Senorita Maria Gonzalez Hermosillo has been appointed by President Diaz postmistress of Teocaltiche, State of Jalisco, Mexico. She is the first woman to hold office in Mexico, and the appointment has created a stir in the Republic. At present there are 155 women studying medicine in Paris, of whom only sixteen are natives of France, the largest number being Russians. On the other hand, of 164 women attend. ing the faculty of belles lettres 141 are French women. These lace-covered bodices, by the way, are very fashionable either in black or white lace, and are exceedingly becoming to a pretty shape, as they are made very close fitting, with out folds, giving a very smart, trim look to the figure. "Glycine" is the name of the new blue, for which there has been "quite a rage" in Paris, and which will probably be one of the features of the coming season. It is a tone between bright blue and mauve, and is rather startling at first sight. Different observers have commented upon the increase of women riders in England, who ride on the off side of their horses. The Englishwoman has been taken as a model in horsewomanship, and her departure in this respect will certainly have its influence. Mme. Pherore Langrana, an East Indian lady, is attracting much at-tention in London as a singer. She is a pupil of Sims Reeves, and her specialty is the performance of Persian melodies. So far as known she is the first Indian woman to attain distinction as a public singer. "People lift their eyebrows," says William Morris, the English poet, "over women mastering the higher mathematics; why, it is infinitely more difficult to learn the details of good housekeeping. Anybody can . learn mathematics, but it takes a lot of skill to manage a house well." Mrs. Humphrey Ward, in refusing an invitation to dinner from a club of "woman writers," said she condemned sex distinction in literature. She did not wish to see sex emphasized in literature, but rather she desired to see "the neutrality of the pen-the sexlessness of intelligence." The Baroness Burdette-Coutts possesses, among other honors, the freedom of the city of London, and she can also lay claim to being a haberdasher, a turner and a coach and harness maker, the freedom of the guilds controlling all these trades having been conferred upon her.

MILE AND CREAM.

MRS. PEART.

ant Peary's chief dependence, gave in from hardship. The dogs perished in great num-bers and frome into solid blocks.

After the storm was ever the whole party returned to Anniversary Lodge, where the left three sick men, together with plenty of supplies to form a basis of operations. Then the four healthy ones, Lieutenant Peary, Entrekin, Clarke and Baldwin, started again and continued onward for fourteen days. But the dogs still continued to die. Those left were unable to drag the sledges and provisions. The party was so weakened by exposure and the time occupied in traveling was so long as to render

it impossible to reach Independence Bay in time to accomplish anything. Consequently Lieutenant Peary decided to abandon the attempt to cross Greenland and returned to headquarters, which were reached on April

The party was absent forty-five days and only got 130 miles away. It started with ninety-two dogs and returned with only twenty-six, after having abandoned all the sledges on the way. It covered only a quarter of the distance necessary and never made more than twenty miles in any day. The members of the party assert that their

experience in the equinoctial gales was worse than that of any previous Arctic explorers. All had very narrow escapes from being frozen to death. Davidson was sick for four months after his experience. Er trekin had both his feet badly frost-bitten. En-

After the party regained health other ex-plorations in the neighborhood were organ-ized. Astrup made a survey of the ized. Astrup made a survey of the unex-plored part of the coast of Melville Bay and harted 150 miles of it. He had a native crew

of five men to help him. Lieutenant Peary and his wife made a sledge journey to Olrike Bay, 100 miles dis-tant. Entrekin and Dr. Vincent started to try to reach Kane's winter quarters at Lit-tleton Island, but the ice broke up, compel-ling them to return. ling them to return.

ling them to return. The auxiliary expedition, which sailed from here on July 7 on board the steamer Falcon, met with a great deal of ice, and the steamer was seriously hampered in her operations. She had extreme difficulty in making her way through the ice floes and only sighted Bowdoin Bay on July 23. Then an ice-mack thirty-flow miles wide prevented compack thirty-five miles wide prevented com-munication with the shore until August 11, and the steatuer only anchored in Falcon Harbor on August 20. She found all the Peary party in good health and spirits and glad of the opportunity to return home. While going north the Falcon searched

Carey Islands. Cape Faraday and Clarence Head, but found no traces of the long missing Swedish explorers Bjorlding and Kal stenius, who sailed from here in June, 1892, in the little schooner Ripple. Their death is now regarded as certain. The Faicon secured some relics on Carey Islands and buried a skeleton supposed to be that

of a saflor. Lieutenent Peary decided to remain another year in the North and try to cross Greenland next year. Lee and Hensen agreed to remain with him. After the combined parties had engaged in

a hunt preparations for departure were made on August 26. Mrs. Peary, her daugh-

QUICK-WITTED, active and reliable players are required to execute intricato con tion plays that are necessary in a winning team

Young, of Cleveland, holds the strike out record of the season, made at New York. He accomplished the feat by striking out ten of the New Yorks.

THE baseball players are taking the live-liest interest in the Professional Football League. Several players have signed and many more want to.

Now is the time of year when the young ball player will wander back to the old home with a high hat and came, and live all winter in hopes of big things next season.

KELLEY, of the Baltimores, in one game made nine hits, with a total of fourteen, out of nine times at the bat-an average of 1.000. It was the batting record of the season.

In view of the experience of the Baltimores this season, Southern practice trips will probably be all the rage next year. Hanlon stole a march on the whole League last spring.

A WORCESTER (Mass.) man has invented a machine on the electric principle which, he says, will register balls and strikes correctly and confine the umpire's work to decisions on the bases.

The pitching record of the season shows that the left-handed twirlers have been handicapped more than the right-handers by the pitching rules. Breitenstein, of St. Louis, is the only notable exception.

THE first and second clubs in the League race play a series of seven games for the Temple cup. The players receive all the gate money, and it is estimated that this will amount to between \$700 and \$800 for each

IT was undoubtedly the increased pitching distance that caused the batting to be as been this season. Some of distance that caused the batting to be as heavy as it has been this season. Some of the suffering pitchers are slyly advocating the curtailing of the distance between the "box" and the plate. It will not be done.

"box" and the plate. It will not be done. CATCHER DOOHUE, of the Kansas City West-ern League team, has broken the catching record heretofore held by Zimmer. Up to August 28 he had caught 126 consecutive games and never missed an inning of one of the games. He promises to finish the season behind the bat, something no other catcher has done since the days of overhand pitch-ine. ing.

COLONEL JOHN M. WILSON, superintendent of public buildings and grounds. In his re-port for August severely censures Catcher Schriver and other members of the Chicago seball team for their feat acomplished on their late visit to Washington of dropping a ball from the top of the monument which Schriver caught. Colonel Wilson says the practice is a "discourtesy" and might result in injuring somebody.

LIFE FLASHED OUT.

Four Persons Instantly Killed by Thunderboltz.

The residence of Marshall Corry, a prominent farmer living near Owingsville, Ky .. was struck by lightning. Corry, his wife, and daughter, aged eighteen, were instantly killed. Several others in the house were in-jured, but, it is thought, not fatally.

At Tuscaloosa, Ala., John Robinson was instantly kilied by lightning, and Mack Bibby, his brother-in-law, was struck by the same bolt, and placed in a precarious con-dition. They were in separate wagons, and the horses were killed.

bank note and the other a counterfeit \$10.

United States silver certificate. The National bank counterfeit is on the Fifth National Bank, of Cincinnati, Ohio, check letter A, series of 1892, and is calculated to deceive those who do not give money careful scrutiny. The \$10 silver certificate is of the series of

1886, check letter A, and is a poorly executed photo-etched production. Much of the word-ing is indecipherable and the face is blurred, while the shading around the letter is in solid black, instead of fine lines, and the note should by detected at a giance.

KILLED BY POKE BERRIES. Two Boys Dead and Mother of One

Attempts Suicide.

While strolling in the woods near Millville, N. J., Emil Klaweter and two companions dared each other to eat poke berries. They ate nearly two quarts of the poisonous fruit. When they started for their homes Klaweter became unconscious. Another boy then dropped. Klaweter died before a doctor arrived.

The other boy swelled until he was three times his natural size. He died in terrible agony. John Schwartz, the last of the unfortunate trio, had by this time also been at-tacked. The doctors said he could not live until morning. When his mother learned this she seized an axe and tried to kill herself. She injured herself severely.

PREDICTS PROSPERITY.

Comptroller Eckels Says There Are Good Times Ahead.

left Washington for a trip through the West. "I think thet the country is entering upon an era of business prosperity," said Mr. Eckles before his departure. "The advices we receive from the various banks in the United States tend to confirm this view, and if anything more were needed to prove it the fact alone that none of the banks is reducing its erculation would seem to show that they ex-pect an increase in the volume of business, otherwise they would cut down their circulation in order to escape taxation as much as

EDITORS IN A DUEL.

Spectator Fatally Wounded.

J. L. Goodman, editor of the People's Voice, and B. T. Armstrong, editor of the Star, met in the main street at Gatesville, Star, met in the main street at Gatesville, Texas, and each opened fire on the other. Goodman was shot through the heart and died instantly. Armstrong was shot in the right side and lived only a few minutes. J. J. Beeman, a bystander, was struck in the back of the neck and fatally wounded by a stray bullet. The duel grew out of the Cash murder trial and the subsequent con-tempt proceedings that followed is.

possible. The country is like a very sick man, and will recover slowly, but the convales-cence will be none the less size and certain."

A TERRIBLE FIRE.

Two Hundred Buildings Destroyed in Shun-King, China.

Se-Chuen, China, has been visited by a con" flagration, which destroyed 2000 buildings. Over a hundred persons lost their lives, in various ways, as a result of the fire. Among the dead is the wife of the Gover-nor of Shun-King, who died from fright. The Governor's bouse was burned and sev-eral temples vere destroyed. The loss is es-timated at ten willion taels.

A Bull-Fighter on a Bicycle.

An extraordinary account of a buil fight, in which a cyclist played the most important part, is related in a South American paper. When the chulos with their red cloaks and darks had worked the bull into a state of indarks had worked the built into a state of in-describable tury the picador. Senor Jose de Silva appeared upon the scene, mounted on a bicycle instead of a horse, affid proceedad to harass the animal. Avoiding his innee, the brute charged him. He barely had time to slip from the saddle when the built caught up the machine on its horns, hursing it int the air. It feil on the animal's back. Tak Tak ing advantage of the hesitation of the beast, which could not realize from whence the severe blow on its back came, the mata-dor jumped nimply forward and adminis-tered the coup de grace.

Canada's Deficit.

There is a deficit of nearly \$2,000,000 in the revenues of Canada for the last fiscal
