SLAUGHTER OF DEER,

Greater Than Ever Before in the Adirondacks.

The slaughter of deer in the New York Adirondacks this year has been greater than ever before. It has been found that the present game law, which allows deer to be shot between August 15 and September 1 and allows each hunter to kill two deer, does not protect the animals sufficiently. If deer were killed for the next two years at the rate they were this season, they would be exter-minated in that period. The framers of the game law never antici-

pated this great slaughter. It was stated in the Department of Fish and Game Commis-sion in Albany that the Legislature would probably be asked to shorten the deer season, and might possibly be requested to close it for the next year.
