SUNDAY'S DISCOURSE BY THE NOTED DIVINE.

Subject: "Expurgation of the Scriptures."

In our day the Bible is assailed by scurrility, by misrepresentation, by infidel scientists, by all the vice of earth and all the venom of perdition, and at this particular time even stack, and the hatches fastened down, and many prophesying the foundering of the steamer, and at that time some of the crew with axes and saws go down into the hold of the ship, and they try to saw off some of the planks and pry out some of the timbers be-and it challenges the admiration of all the

and storms outside with their axes and saws inside. Now, this old Gospel ship, what with the roaring of earth and hell around the stem and stern and mutiny on deck, is hav-

rifically bombarded, and the men on the ramtion from the magazine, are trying with m crowbars to pry out from the wall certain p blocks of stone, because they did not come to from the right quarry. Oh, men on the ram-parts, better fight back, and fight down the

common enemy, instead of trying the breaches in the wall! While I oppose this expurgation of the Scriptures, I shall give you my reasons for such opposition. "What!" say some of the theological evolutionists whose brains have been addled by too long brooding over them by Darwin and Spencer, "you don't now by Darwin and Spencer, "you d

enough to make a whale I could have made very easy ingress for the refractory prophet, leaving to evolution to eject him if he were an unworthy tenant! "But," say they, "you don't really believe that the water was turned into wine?" Yes inst as easily as water was turned. I am also opposed to this proposed expur-"into wine?" Yes, just as easily as water now is often turned into wine with an admixture of strychnine and logwood! "But," say they, "you don't really believe that Sameou assaults the Bible is wielding the same

Disraeli's "En-dymion," the works of Tennyson and Longdymion," the works of Tennyson and Long fellow, and all the popular books of our time having no such sale in the last ten years as this ald worn out book. Do you know what this old worn out book. Do you know what astruggle a book has in order to get through one century or two centuries? Some old books, during a fire in a seraglio of Constantinople, were thrown into the street. A man without any education picked up one of those books, read it, and did not see the value of it. A scholar looked over his shoulder and saw TEXT: "Let God be' true, but every man a liar."-Romans iii., 4. a har."—Komans III., 4. The Bible needs reconstruction according to some inside and outside the pulpit. It is no surprise that the world bombards the Scriptures, but it is amazing to find Chris-tian ministers picking at this in the Bible and denying that until many good people are left in the fog about what parts of the Bible they ought to believe and what parts reject. The heinousness of finding fault with the Bible at this time is most evident. In our day the Bible is assailed by scurrility. mans, not a fragment left. Quintilian wrote his favorite book on the corruption of eloquence, all lost. Thirty books of Tactitus lost. Dion Cassius wrote eighty books, only preachers of the Gospel fall into line of criticism of the word of God. Why, it makes me think of a ship in a September equinox, the waves dashing to the top of the smokecomes along and picks up one of them and blows the dust off and opens it and finds it the book he does not want. But this old book, much of it forty centuries old, stands cause the timber did not come from the right forest. It does not seem to be a commendable bus-iness for the crew to be helping the winds

ing a very rough voyage, but I have noticed that not one of the timbers has started, an t the captain says he will see it through. And I have noticed that keelson and counter timber knee are built out of Lebanon cedar, and the bishops of Hippo, all decided that the she is going to weather the gale, but no apochryhal books must be added to the Old credit to those who make mutiny on deck. When I see professed Christians in this particular day finding fault with the Scrip-tures, it makes me think of a fortress ter-will put the book of Maccabees or the book Judith beside the book of Isaiah or parts, instead of swabbing out and loading the guns and helping fetch up the ammuni-tion from the magazine, are trying with ment," and there were epistles and gospels and apocalypses written and added to the New Testament, but they have all fallen out. Lesson Text: "Saviour's Parting Words," Luke xxiv., 44-53 (Missionary Lesson)-Golden Text: Matt. xxviii., 19-Commentary.

"Go Ye."-This is the genius of the gos pel. This its missionary spirit. Begin at Jerusalem, it is true, but with their faces turned from it. Start from the centre, but go to the circumference. The command was imperative. They were not to linger, or to exercise their discretion as to whither they were to go, but to go in obedience to His command. It was as abiding as the time was to be long in which the work was to be done. When one set of workers fell, another set were to be set of workers feil, another set mand was a living present, as the Lord was a living and present Lord. Moreover, it in-cluded not only the eleven apostles, but the whole company of disciples. Every Chris-tian has some part and some responsibility in connection with this commission. Some are connection with this commission. Some are evangelists, some pastors and teachers, some prayers, some private witnesses, some givers of money—all earnestly engaged, each according to his ability and according to his talent, in winning men from sin to salvation, from the power of satan unto God. So long is there is an unsaved man, woman or child in the world, this commission is an force; this command is upon every disciple of Jesus Christ.-Pentecost.

THE FINAL CHARGE.

44. In these first six verses Luke gives a brief summary of Christ's teachings after the resurrection. Jesus speaks as though He were not now with His disciples. In the old form of existence He is not. He participates more in the heavenly than in the earthly life. 45. Jesus was in condition now, by His words and very presence, to open their minds. Now that the Scriptures had been fulfilled, and with the cross behind, the mind would readily open to truth to which it had been closed before. 46. There could have been no closed before. 46. There could have been no gospel if there had been no cross; but the death, even of Jesus, would have had no efficacy for the removal of human guilt if He had not risen from the grave. The one fact is invariably connected with the other in the episties (Taylor). 47. Repentance here, as everywhere, means the change of mind and purpose. It is an antecedent condition of the remusion of circ. It is the change real. the remission of sins. It is the change real-ized when the man first exercises faith. The ized when the man first exercises faith. The two things move together (Dwight). 48. An apostle must be one who has seen Christ, Acts i., 21, 22. The Christian system rests upon facts, to which the testimony of those who are eye-witnesses is given. The funda-mental facts are the death, resurrection and ascension of Jesus. These are the basis of Christian preaching; and if they are removed the Christian is sensitized as a so the Christian preaching is emptiness, and so is the Christian faith (Dwight). 49. The promise of the Father here means the send-ing of the Spirit, which occurred on the day of Pentecost (see Acts ii.), ten days later. Extraordinary powers were theirs: 1. Gift of tongues. 2. Illumination of minds. 3. Unusual power of speech. 4. Miracles of healing. 5. Discernment of spirits (Watson). THE FINAL DEPARTURE.

50. It would seem that Jesus had been with them once more in the old familiar upper room at Jerusalem; at least He walked some little way with His disciples along an old and familiar path. Probably the day of ascenfaminar path. Probably the day of ascen-sion was just six weeks after that on which the last supper had been celebrated, and sev-eral of those present would well remember the walk of that day. 51. The ascension seems to have been slow and gentle. The apostles could therefore view it distinctly and deliberated as their there much he as apostles could therefore view it distinctly and deliberately, so that they might be as-sured of its reality. No chariot nor horses of fire were seen like those which waited the prophet Elijah to heaven; no violent whirl-wind agitated the air, no blaze of glory daz-zled the eyes or overpowered the feelings of the anxious spectators. Every part of the scene accorded with the character of the mild and benevolent Master. Though a parting overpote there was in it nothing to terrify or and benevolent inster. Though a parting scene, there was in it nothing to terrify or depress the minds of the apostles. Filled with an abiding awe, and yet with a great and abiding joy, they returned to Jerusalem (Theorem (Thompson)

The result of meteorological tests with balloons at immense heights is announced from Bremen. One balloon, carrying self-registering instruments, reached a height of twelve miles. The thermometer could not register the temperature, sixty-seven degrees below zero being marked at a lower height. Many tests show that the temperature sinks gradually up to two and a half miles. Above that the fall is much more rapid.

The gentleman removed to his present residence from Coronado last May, and took the cat with him. The animal was not satisfied with the new quarters and disappeared. Nothing was heard of it for some months, when it was learned that the cat had somehow made its way to the old home at ************** Coronado. The new tenants treated the cat in a way that caused .it great anguish, kicking it out of the house and allowing it to starve. The treatment had the effect after a time of sending the cat away in disgust. It then came straight back to the new home, where it knew it would be well treated. It appeared there thin as a shadow, and has not made any more efforts to get away. As the bay is more than a half a mile wide and as the cat could not easily have taken the ferry, it is apparent that it made its way around the head of the bay, a distance of fully fifteen miles, in order to reach its friends .- San Diego (Cal.) You must not expect to weigh the thunderbolts of Omnipotence in an apotha cary's balances. Starting with the idea that God can do anything, and that He was present at the beginning, and that He is present now, there is nothing in the holy Scriptures stand a fossil of the ages, dug up from the tertiary formation, failen off the shelf of an antiquarian, a man in the latter part of the have demonstrated no evil result. A cruel ous nineteenth century believing in a whole Bible from lid to lid!

I am opposed to the expurgation of the Scriptures in the first place, because the the ages fetch me a victim whose heart has Bible in its present shape has been so miraculously preserved. Fifteen hundred years after Herodotus wrote his history, there was ly one manuscript copy of it. Twelve indred years after Plato wrote his book there was only one manuscript copy of it. God was so careful to have us have the Bible and the strangers that happened to be within in just the right shape that we have fifty the gates-twice a day, without leaving out manuscript copies of the New Testament a chapter or a verse, they read this holy thousand years old, and some of them 1500 years old. Is it not an argument plain enough to every honest man and every honest woman that a book divinely protected and in this shape is in the very shape that God wants it. It pleases God and ought to please us. The epidemics which have swept thousands of other books into the sepulcher of forget-fulness have only brightened the fame of this. There is not one book out of 1000 that lives flow years. Any publisher will tell you lives five years. Any publisher will tell you that. There will not be more than one book that. There will not be more than one book I tell you at this point in my discourse out of 29,600 that will live a century. Yet that a man who does not like this book, and here is a book, much of it 1600 years old and who is critical as to its contents, and who is much of it 400) years old and with more re-bound and resilience and strength in it than when the book was first put upon parchment
