The service at St. Thomas' church was most impressive. There was vocal and instrumental music, and several clergymen were in the chancel, among them the Rev. Dr. J. Wesley Brown, rector of St. Thomas', and Bishop Potter, who performed the ceremony.

Mrs. Gougar Loses Her Suit.

BOSTON, Nov. 13.—The jury in the libel suit brought by Mrs. Helen M. Gougar, the temperance advocate of Lafayette, Ind., against Congressman Morse, brought in a verdict last evening in favor of the defendant. Action was brought against Mr. Morse two years ago for \$25,000 for alleged damages which Mrs. Gougar claimed she sustained because of language used by Mr. Morse during a political controversy. The case was tried last year in the United States circuit court and was won by Mr. Morse. A new trial was ordered and the case was brought up again, with the same result.

The Carina's Coming Anouchement.

Liberated by a Mob.

PURVIS, Miss, Nov. 12.—The jail here was broken open by a mob shortly after midnight, and William Purvis, an alleged murderer and whitecapper, was liberated. Purvis was one of the whitecaps who committed so many outrages some years ago, and was tried for the murder of one of the men connected with the whitecapping. He was found guilty and sentenced to be hanged. Upon the day fixed for his execution the rope was placed around his neck and the trap sprung, but he slipped through and fell to the ground. The people believed it a miracle, and would not let the sheriff proceed with the hanging.

IRRIGATING WITH THE PLOW.

How to Hold Moisture in the Soil—Wrong Methods in Cultivation.

There is scarcely a season when the northern states do not have more than 17 inches of rainfall between the going of frost and July 1; so, if we have this from running off or evaporating, we may expect to carry nearly all our crops to maturity. To save the water of the spring showers it is only necessary to have the ground in a receptive state—that is, mellow and spongy. Gravelly or sandy soils naturally take all the water that falls, provided they are not packed or solidified on top. Clay soils, however, must be thoroughly loosened as deep as it is desirable. To do this, some berry growers are using a subsoil plow. One uses a purchased implement with a sole like a pumpkin seed, that disturbs and lifts pretty nearly all the bottom of the furrow so that with a heavy team on both plow and subsoil he is able to loosen the ground to a depth of 16 inches. If such a soil is thoroughly supplied with humus by growing clover or plowing under green crops, it plows up loose and lies two or three inches higher after plowing than before, and its capacity for holding a greater quantity of water is increased at the same time that it parts with it more slowly from its spongelike nature.

It is safe to say that a somewhat retentive soil, prepared in this way, either late in the fall or early in the spring, would easily take all the water that fell in the spring months. It may also be said that such a soil, with proper management, will suffer less in periods of drought than sandy soils. Thus writes a correspondent of Rural New Yorker, who says:

"A field with a 16 inch mellow top soil filled with water would, with the data from which I started, be able to produce fair crops of almost any summer grain or vegetable or fruit without rain after July 1 if the moisture could be kept in the ground." This correspondent explains as follows:

Water is brought to the surface by capillary attraction, and if this is not arrested at the surface it feeds evaporation, according to the dryness of the atmosphere, until all available moisture is taken from the soil or the supply is renewed from the clouds. It has been proved that breaking up the surface crust arrests capillary action; hence the best farmers start a smoothing harrow a day or two after the planting of a crop, repeating the process after every rain. Berry growers are adopting the same methods, and the more advanced cultivate with a many toothed light cultivator, some cultivating in the afternoon what was planted in the forenoon. In strawberry planting especially there is much trampling of the ground, and in some rows at least half the surface will be covered with tracks, each track giving free scope to the most active capillary pumping.

Another Stolen Fortune Unearthed.

BOSTON, Nov. 13.—The arrest of James Stevens Chaffee, of this city, by the police and the recovery of over \$20,000 worth of stolen plunder was followed last night by even more startling discoveries. In addition to the property recovered on Monday stocks and bonds to the value of \$141,000 (par value) were brought to the inspector's office. Barrett is a notorious criminal now serving a life sentence for murder in this state, and Chaffee claimed that all the stuff which was found on his premises has been given to him by Barrett in return for his having spent a great deal of money in Barrett's defense at the time of the murder trial. The charge against Chaffee is receiving stolen goods while knowing them to have been stolen. The total amount of plunder secured by the police now reaches at least \$170,000 in value.

Wants to Succeed Senator Gibson.

BALTIMORE, Nov. 13.—Congressman George L. Wellington, chairman of the Republican state committee, announces his candidacy for the United States senate to succeed Senator Charles H. Gibson. "I have decided to enter the contest for the senatorship, and I expect to win," said he. "There is no necessity for repealing the so called Eastern Shore law before the election of the senator. The fact that a resident of another part of the state is elected will be a virtual repeal of it, and in this instance it will be ignored. The United States senate, under the constitution, will seat any man who is a resident of the state, and will ignore the law in such a case, as it is clearly unconstitutional."

Tennyson.

Tennyson would not talk about his poetry, but once intimated that he regarded the "Ode on the Death of the Duke of Wellington" as containing more inspiration than some of the others. He once said that he did not expect much of the "Charge of the Light Brigade" and was agreeably surprised at its reception.
