OUR NEW NEWSPAPER PRESS.

The above is a cut of the new Babcock Cylinder press, recently put in the CENTRE DEMOCRAT office. It is a brand new machine, direct from the factory, and is equipped with all the latest improvements, combining convenience, speed, durability and simplicity and capable of the highest grades of work. It has patent air springs, noiseless grippers, tapeless delivery, patent roller bearings and an excellent double vibrator distribution,-all of which features are only to be found on the higher grades of printing presses. It can be run at a speed of from 1,200 to 2,000 impressions per hour, depending entirely upon the ability of the pressman to handle it. So acurately and perfectly is this press built that when running at its highest capacity there is not a jolt, only the hum of the rollers, and the huge cylinder as they rapidly revolve, taking through the blank sheets and de-livering them nicely printed. It makes a printer's heart rejoice to see, or handle such a splendid piece of mechanism-the product of years of experience in building printing presses, by this famous firm.

Heretofore our paper was printed on an old, worn-out, rattle-bang machine, around which n ore time was wasted and profanity axtravagantly expended than the thing was worth. Fortunate for all-like "Grandfathers clock," one day it stopped short, never to go again-and there was general rejoicing about this print shop.

NEW GAS ENGINE.

In addition to our new press we have added a patent electro-gas engine, of two-horse power, built by Jenkins & Lingle, of Bellefonte, Pa. A gas engine is practically unknown to most of onr readers, therefore a brief explanation may be of interest. Ordinary illuminating gas, when mixed with air at a certain proportion, becomes highly explosive. By valves, automatically operated, gas and air, in exact quantities, are taken in a cylinder, in which a piston moves. By either an electric spark or a heated tube connecting with the cylinder, this mixture is ignited as the piston compresses it. An explosion follows that is very powerful and drives the piston foreward in the chest or cylinder upon the same principle as steam expands in a steam cylinder; gasoline works equally well. The engine is a very small affair, compactly built and runs at 300 revolutions per minute. requires little or no attention, can not explode, makes no ashes or dirt and can be started in an instant. Last week the regular edition of the CENTRE DEMOCRAT, 1475 copies, was printed and put through the folder, paster and trimmer, using only 50 feet of gas, or 5 cents for power. The expense of operating this machine is its best recommendation, as it can furnish a full 2 horse power for about 20 cents per day.

WELL EQUIPPED OFFICE.

The mechanical department of this office, with its water motor, gas engine, new Babcock Cylinder, Eclipse Bascom folder, paster and trimmer combined, Universal jobber, power paper cutter, patent mailing machines, and other im-proved contrivances belonging to the business, is about as complete as could be desired. All these improvements have been made since the paper passed into the sole ownership of the writer, less than one year ago. We promised at that time to make improvements as we moved along, and in a measure have kept the pledge, by furnishing a better, newsier paper than ever. True to our motto: "The Most News, for the Least money." This is evidenced by the fact that since last June no less than four hundred new subscribers have been added to our list. The public evidently appreciate our efforts, like the paper and want it in their homes. This alone gives more consolation than the paltry dollars that roll in our till. With improved appliances, and by strict attention to business, it is the aim

and belief that in the future we can still better serve our many patrons, to whom the CENTRE DEMOCRAT owes the success it has attained-all of which is duly appreciated.

REAL ENJOYMENT

There's real enjoyment in wearing comfortable footwear. When a man gets home at night, off come his shoes. When he arrives at his place of business or labor, the chances are he fishes out an old pair of shoes that have convenient holes cut to ease his corns. That's the way with some men.

The men who find comfort in wearing the same pair of shoes from morning till night are the men who bny footwear of me. I can give anybody foot comfort who will buy the kind of shoes I advise. I can't guaranteethis, however, to those who use their own judgment.
