She suffered for four hours before the Dr. could be gotten there and the jaw set back in place and give her relief. It is the first woman's jaw that flew out of place in Runville, but it is a great wonder there are not many more such cases.

Science is still in its infancy and Runville is not behind the times in the way of discoveries. Mr. Milligan Walker has made the greatest discovery of the age, a new method of shaking winter apples. He puts twosticks of dynamite under the tree and blows the tree away, the apples all fell down in the hole in the ground. He then put straw over them and buried them on the spot. Toddie says it works like a charm. He intends getting a patent on his method.

Mr. Wm. Shirk was seen leaving his saw mill with a coil of rope around his neck. On meeting a friend he said: "I thought I could live through this McKinley prosperity but I have made up my mind to give her up." But instead of hanging himself, he came home in the evening with more machinery for his mill. When asked why he was adding a circular saw to his shinglemill he made the following statement: "I have been waiting for six months for that promised prosperity to come, and I am now afraid it will come some day on a rush and then lead pencil wood will be in demand and this saw is to saw out lead pencil wood." This is one of the historical months in the American calendar. In it were fought the battles of Saratoga and Germantown. The former is conceded by 15 decisive battles of history. It was after the battle of Saratoga that France acknowledged the independence of the United States. Teachers of our public schools should call attention to these facts. There were stirring times in these colonies six score years ago.

While out walking recently on a moonlight night two young ladies called upon a Central City gentleman, and he felt it his duty to see them safe home. His services were offered, accepted and when but a few yards from the young man's boarding house the party was joined by a howling bob cat, which came out from a dark corner in the fence and seemed determined to accompany them. Miss B. objected, however, and hoisted pussy over the fence into the yard of J. C. McCloskey, at same time admonishing it to be quiet. The poor cat was so frightened that he ran off and did not return until next day and was then too weak and hungry to give an account of his experience. Mr. S. returned home in time to study his geography. Query: Miss S. cannot understand why Mr. S. and Miss B. conducted her home first, unless because of the lateness of the hour and their wish to go home early, as all good boys and girls are in the habit of doing.

MANY THINK! when the Creator said to woman, "In sorrow shalt thou bring forth children," that a curse was pronounced against the human race, but the joy felt by every Mother when she first presses to her heart her babe, proves the contrary. Danger and suffering lurk in the pathway of the Expectant Mother, and should be avoided, that she may reach the hour when the hope of her heart is to be realized, in full vigor and strength. MOTHER'S FRIEND so relaxes the system and assists Nature, that the necessary change takes place without Nausea, Headache, Nervous or Gloomy Foreboding of danger, and the trying hour is robbed of its pain and suffering, as so many happy mothers have experienced. Nothing but "Mother's Friend" does this. Don't be deceived or persuaded to use anything else.
