A word of warning to a young lady of Spring township, who of late is making frequent visits to this place. Do not repeat any longer, your conduct will not be tolerated in this place. We have a place for all loose characters, and a man to look after all unruly actions. You would be a mere child alongside of our large police going to the "cooler." There is where you would surely land. He has his eye on you, take warning in time; save time and cost. We will withhold your name for the present. Your slang phrases and conduct on Sunday night the 5th, settled your coming here. Our policeman is on the lookout for you.

Perhaps a word on the use of tobacco, would not become amiss, for the benefit of the young men and boys. All tobacco contains more or less of an oil, called nicotine, which in its pure state is a deadly poison, and which in its diluted state is gradually absorbed in the system. There is also in all tobacco smoke a small amount of free carbon to which the blue color of the smoke is due. It is this carbon which is confirmed and inveterate smokers settle on the back part of the throat, and on the lining membrane of the bronchial tubes creating a copious secretion which it dissolves and which causes the unnatural expectoration or spitting observed in the users of tobacco. There is also ammonia in tobacco, which bites the tongue and dries the throat of the smoker. Finally carbonic acid is present which causes sleeplessness, headache and lassitude which follow prolonged smoking. It is a fact that tobacco produces functional disturbances of the stomach, heart, nerves and brain. Even the physicians who defend the moderate use of tobacco admit that its effects are disastrous on most people and whatever may be urged in favor of the moderate use of tobacco, by adults, all intelligent men unite in condemning its use by the young. Physiology tells us that smoking is deleterious to boys causing in them impairment of growth, and physical degradation. In this country a general alarm, has been sounded on this subject, and several state legislatures have endeavored to check the evil by prohibiting the sale of cigarettes to boys. But boys is it necessary that when you know what a bad thing it is for you to use tobacco that you must be prohibited by law from using it? Will you not arise in the strength of your young manhood and say: "I will never touch tobacco again in any form." It is saddening to see boys ruin their health and impair their future manhood by a habit which gives but a transient pleasure and impairs alike mind and body. It is a habit, too, which is easily formed and very difficult to abandon. But few men have sufficient will power to quit the use of tobacco although they may know and acknowledge its injurious effect upon them, and boys are naturally less resolute than men. Heed the warning which is given to you and do not begin the use of tobacco in any form. Almost every man says the use of tobacco hurts him, yet hardly anyone quits it.

CAUSE FOR ALARM. How baldness begins. How to prevent it.

Every person, male or female, shrinks from baldness. It adds to the appearance of age and is a serious discomfort. The cases are rare when the falling out of the hair may not be stopped, and a new and healthy growth of the hair promoted. The hair grows in the scalp like a plant in the soil. If a plant flourishes, it must have constant attention; it must be watered regularly and find its food in the soil where it is rooted. It is so with the hair. Neglect is usually the beginning of baldness. Dandruff is allowed to thicken on the scalp. The hair begins to loosen. The scalp loses its vitality. The hair, insufficiently nourished, begins to fade and to fall. The instant need in such a case is some practical preparation which, supplying the needed nourishment to the hair, feeds the hair, gives strength, and so produce a strong and healthy growth. All this is done by Dr. Ayer's Hair Vigor, the most practical and valuable preparation for the hair that can be obtained. It tones up the scalp, does away with dandruff, stops the hair from falling, restores the original color to gray or faded hair, and gives an abundant and glossy growth. Those who are threatened with approaching baldness will be interested in the following voluntary statement, made by Alderman S. J. Green, of Spencer, Iowa. He writes: "About four months ago, my hair commenced falling out so rapidly that I became alarmed, and being recommended Dr. Ayer's Hair Vigor by a druggist, I resolved to try this preparation. I have been now using it for three months, and am much gratified to find that my hair has ceased falling out and also that hair which had been turning gray for the past five years has been restored to its original color, dark brown. It gives me much pleasure to recommend this dressing."—S. J. GREEN, Alderman, Spencer, Iowa.

Those who are interested in preserving and beautifying the hair will do well to send for Dr. Ayer's Curbuck. A story of cures told by the cured. This book of 100 pages is sent free, on request, by the J. C. Ayer Co., Lowell, Mass.
