Your correspondent claims the honor of having shared a special seat with two of the oldest men in this section of country while listening to the able address of Rev. Maxwell, at Shady Dell picnic.

John Beckwith is greatly improving his property at Hannah station. He recently built a stable 25x35 ft. with all the modern improvements, W. W. Laird doing the carpentering work with, but little assistance, took the timber from the woods, framed, erected and put the roof on the building in eight days. Not so slow, either.

The members of the United Brethren church, at Shady Dell, held a picnic in the grove near that place on Saturday last which proved to be a success under the management of Rev. Maxwell. The able address of the Rev. with some very excellent music rendered by the Port Matilda Cornet band, made it both interesting and instructive to a large crowd.

The people who have been camping here during the summer expect to pull up stakes on Friday to locate at Grange Park. We are sorry to see several of them leave, while for others there will be no tears shed.

Colored people's campmeeting is in progress with not so large an attendance yet, as it is not generally known. They expect to continue it for at least to days. They do some excellent singing and it is not a money making scheme, such as was here last summer. It is free to all; of course they take up a collection.

There are several sluggers camping over at the park, but they only do their slugging when a man's back is toward them, and the one attempted to use foul means on one of our boys on Sunday evening. It Is Just As Important.

That you enrich and purify your blood in the Fall as in the Spring. At this time, owing to decaying vegetation, a low water level, and other causes, there are disease germs all about us, and a weak and debilitated system quickly yields to attacks of malaria, fevers, etc.

By purifying and enriching your blood with Hood's Sarsaparilla you may build up your system to resist these dangers, as well as coughs, colds, pneumonia and the grip which come with colder weather.

To be on the safe side, take Hood's Sarsaparilla now, and always be sure it is Hood's and not something else represented to be "just as good."

DEAFNESS Cannot Be Cured. by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hood's Catarrh Cure. Send for circulars free.

F. J. CHENEY & CO., Toledo, O., U.S. Sold by Druggists, etc.

They're raising all the prices. And 'tis a crying shame. But you'll find that the Centre Democrat, Will cost you just the same.

The Bicycle Ear.

An eminent Italian physician, curious to observe the effect of fatigue on cyclists, recently examined twenty-four men who had ridden thirty-two miles in two hours and a quarter, and found that with reference to the hearing in nearly every instance it was defective, though it became normal again after two or three hours' rest.

Trolleys in Japan.

Japan is deteriorating. It has already three electric railroads and work on four other roads will begin about the middle of September. One of these will be an electric railway about fifty miles long, running through a number of small towns in the vicinity of Kobe. Current for the line will be generated by water power.

German Engineers.

Engine drivers in Germany receive from the Government a gold medal and £1,000 for every ten years of service without accident.

Giant Plants of Mexico.

Down in Mexico the castor bean, which we think does pretty well for us if it stands up ten or twelve feet "in its stockings," grows to be a tree thirty feet high, with hard wood and orthodox bark. Our common field day is pruned into a shrub two or three feet high and made to cover itself with a wealth of its yellow-eyed flowers; its stem becomes as large as one's wrist, and it is much used as an ornamental shrub in cemeteries. Hibiscus, a rare greenhouse shrub with us, which has large, flame-colored flowers with curious plum-like centers, is planted for hedges, and is said to make very beautiful ones. The foliage is a lovely green, and the freedom with which it produces its flowers makes it very attractive.

French Literary Pay.

Madame got only the equivalent in French money of \$40 for his "Andromaque." Boileau got only \$120 for his "Lutrin." Diderot earned barely \$200 a year by his labors in connection with the Encyclopedia. Rousseau did better, for "Emile" alone brought him \$1,200, but Stendhal, after twenty years' work found that his profits amounted to no more than \$1,350. Perhaps, however, the most remarkable fact of all is that "Madame Bovary" was sold to the publisher for \$50.

No More Scrofula

Not a Symptom of the Affliction Since Cured by Hood's.

"When our daughter was two years old she broke out all over her face and head with scrofula sores. Nothing that we did for her seemed to do any good. We became discouraged, but one day saw Hood's Sarsaparilla so highly recommended that we decided to try it. The first bottle helped her, and after taking six bottles her face was smooth and we have not seen any signs of scrofula returning." SHLAS VERNOOY, West Park, New York. Get only Hood's because
