Made a Mistake.

Recently one of our telephone companies notified its patrons that in case of any trouble to report same to the Bellefonte exchange at once. Mr. Lyons, our butcher, it is related, was the first to have occasion to respond. He called up the exchange on Monday and inquired if it was correct that all troubles were to be reported to that exchange. "Yes, I believe so" the hello girl replied, "what is your complaint," in an alarmed manner, expecting to be reported for negligence. "Oh nothing serious," was his reply, "I only eat a lot of green cucumbers for dinner and am in awful trouble ever since." If a thunderbolt had gone over the wire the exchange girl would not have received a greater shock, and yet Mr. Lyons still thinks he was only following instructions. It is appropriate to say that he is better.

The Saving of Money by the use of Royal

Baking Powder is considerable. Royal is economical, because it possesses more leavening power and goes further.

Royal saves also because it always makes fine, light, sweet food; never wastes good flour; butter and eggs.

More important still is the saving in health. Royal Baking Powder adds anti-dyspeptic qualities to the food.

There is no baking powder so economical in practical use, no matter how little others may cost, as the Royal

Imitation baking powders almost invariably contain alum. Alum makes the food unwholesome.
