Good News for Our Readers

Who have scrofula taints in their blood, and who has not? Scrofula in all its forms is cured by Hood's Sarsaparilla which thoroughly purifies the blood. This disease, which frequently appears in children, is greatly to be dreaded. It is most likely to affect the glands of neck, which become enlarged, eruptions appear on the head and face, and the eyes are frequently affected. Upon its first appearance, scrofula should be entirely eradicated from the system by a thorough course of Hood's Sarsaparilla to prevent all the painful and sickening consequences of running scrofula sores which drain the system, sap the strength and make existence utterly wretched.
