A BRITISH VICTORY

GEN. FRENCH ROUTS CAPE IN-VADERS.

A Full Summery of the Transvaal War News-Progress of the Conflict From Day to Day-The British Encouraged.

The chief interest of the war situation does not lie either at Natal or the Modder River, where things remain practically unchanged, but the north of Cape Colony, where Gen. French had been doing work for the British by constantly harrassing the Boers and finding out their strong positions, and then working around the flank and ever and anon threatening their line of communication. Gen. French advanced, retired, manoeuvred and fought until by successive steps he has driven the Boers eastward, and Colesburg is once more in

Gen. Buller is preparing to strike a blow in Natal for the relief of Ladysmith, while the Boer army in front of him has been strengthened to resist his advance.

The pension system of the Pennsylvania Railroad has gone into effect with the new year. About 775 men

will be pensioned. Military operations in the British-Boer war in South Africa are practically limited by the opposing forces to strengthening their positions. The besieged British towns are still holding ing their ground, though Ladysmith is being closely pressed by the Boers. Gen. Buller's army in Natal Colony has been strengthened, but there has been no advance movement toward the relief of Gen. White's garrison.

The McCoy-Maher Fight.

The young Indiana puglist, known to ring patrons as "Kid" McCoy, but whose real name is Norman Selby, surprised a crowd of 6,000 spectators at the Coney Island Sporting Club Monday by knocking out Peter Maher, of Ireland, in the fifth round. There was never a period when Maher classed with his opponent in scientific methods. McCoy showed a vast improvement over his previous form. He was worderfully clever both in landing blows and in defensive tactics, and at every stage of the battle he showed that his brain had mapped out the affair before he enterel the ring. He kenw that Maher was a terrific puncher, but he figured that if he could avoid the Irishman long enough he would be able to beat him with that sharp, clan powerful blow that has beaten other men before. The knockout came at an unexpected moment. It was after Maher had been indulging in a flerce attack, and had shown increasing strength all through the fourth round and the be ginning of the fifth. But a couple of quick smashes stopped the Irishman's englaught and then came an opening for McCoy's left, which took the money. McCoy furnished an tional surprise by outpunching Maher in several mixups, but that was because he was more accurate with his ; blows, while Peter wasted many.

Administration Senators are feeling their way carefully on the subject of expansion and the adoption of legislation in regard to any of the new insular possessions. The Foreign Relations and the three insular committees of the Senate are made up of strong expansionists. There is also undoubtedly a firm majority in favor of the President's policy. But three Republican Senators can be counted as likely to vote against their party on any question involved in the government of the islands. These are Mason, Hoar and Wellington. Senator Pettigrew will fight the expansion policy inch by inch, but none of his fellow Populists will stand with him. That there will be strong opposition from the Democratic side of the chamber is fully as-The Pacific coast and Rocky Mountain Senators are counted as expansionists. The bitterest struggle is likely to come on the proposition to tax the colonies by means of the tariff. The theme is one that invites speechmaking. THE FENIAN RUMORS

REPORT OF AN INVASION OF CANADA.

Subject Discussed in Washington-State Department Awaits Official Information-Fenian Agitation In Boston-Government May Act.

The alleged attempts in different parts of the country to organize Fenians for a raid into Canada have not as yet been drawn to the attention of the State Department in Washington, and nothing is known upon the subject beyond the matter set out in the newspaper publications. The officials do not give the smallest credence to the stories, and are of the opinion that the purpose in setting them affoat is to frighten the Canadians into keeping their soldiers at home and failing to answer the appeal of England for volunteers for the African campaign.

British Ambassador, Lord Pauncefote, has made no protest to the authorities relative to the reported organized movements in various parts of the country in behalf of the Boers, although these matters were subjects for discussion between Secretary Hay and the Ambassador, including the alleged Fenian movement. The only attention which the Embassy is giving to these reports is to keep advised through the British Consuls at various points as to any movements of importance. Thus far, however, nothing has come from the Consuls to indicate that any of the movements was more than local and triffling.

Should it turn out that a Fenian movement of the kind alleged to exist is actually discovered and brought to the attention of the United States government, sharp and prompt repressive action will be taken, not only to prevent the violation of the neutrality laws, but also to save the raiders themselves from such consequences of their actions as befell the unfortunate Fenian raiders of 1866.

The talk of a Fenian raid is well calculated to cause alarm on the Canadian side of the border, as the people of that section were greatly agi tated during the former Fenian excitement. Although an actual movement occurred at that time, the chief trouble occurred over alarming reports of invasions which never took place.

A movement looking to the invasion of Canada by the Fenians and advanced Irish Nationalists has been agitated for some time by leaders of these organizations in and around Boston. Colonel Roger E. Scannel, who has been identified with Irish agitation for many years, says that there is to be a meeting of prominent Irish Nationalists in Philadelphia to discuss the question of invading Canada.

"This meeting." Colonel Scannel says, "will be followed by another in Boston, when reports from the Philadelphia meeting will be made by Boston delegates.

Colonel Scannel said that the present would be a good time for the invasion, as the troops of Canada are being sent away to take part in the African war.

"It has been agitated for years." continued the colonel, "that Canada should either be annexed to the Uniled States or should have an independent government of her own. present African war will, in my opinion, see the first break in the British Empire. With an army of 100,000 Irish Nationalists engaged in the invasion of Canada, it surely would make things interesting for the English government.

John Scannell, of New York, presided, and presented a report stating the object it was desired to attain, and suggesting the way that the money shall be secured. The report, which provides for assessment of members of all Irish societies, was adopted. There were about five hundred delegates present. It was decided that Philadelphia shall be the headquarters for the reception of funds and the direction of operations.

A Gift of Millions. The University of Chicago has received a New Year's gift of \$3,370, 000. The president hoped to announce that the university would be \$4,000, 000 richer, but he has not been able to raise the \$315,000, which, duplicated by John D. Rockefeller, would make up that amount. However, Mr. Rockefeller has wired that he will extend the limit three months, and in that time Dr. Harper thinks he is reasonably sure of getting the rest of th money, as he has several large do nations in prospect. It is understood that much of the money has come from business men of that city.

BUSINESS OUTLOOK.

Volume of Transactions Greater Than Ever Known Before.

The year 1899 was the most wonderful year in the history of American business. This has been said many times, but it is doubtful, even now whether even business men fully realize how enormous the transactions have been. As soon as the complete statistics for the year are obtainable they will show astounding totals, and it may be long before the record of 1899 will again be equaled. Certainly 1900 will have hard work to maintain the pace of its predecessor. In spite decreased crops of cotton and wheat, the volume of business has been unprecedented. The history of the year must, of compulsion, be told in superlatives. The bank clearings have been the greatest, the railroad traffic the heaviest, the production and sales by the manufacturing industries the largest, the volume of foreign trade the most, and the number of failures the least. Nearly all records have been broken. Prices have made the biggest advance ever before recorded in one year, and wages have been raised in many of the industries. The year ended with nearly everything at the summit of activity and success. Last week's bank clearings were the greatest of any week on record, and this week they are again heavy. For the year the bank clearings are 36 per cent, greater than in 1898. Along with this unequaled activity in business there has been unprecedented speculation in stocks. The transactions of the Stock Exchange in New York are 60,000,000 shares larger than in 1898, and greater than in any other year. The speculative activity has indeed about the only development of the year that has worked mischief.

Chicago reports business in all lines for the year as 25 to be per cent. ahead of last year, prices 10 to 15 per cent. higher, and more orders booked for the ensuing year than ever before at this period. Fewer unemployed men are reported at that city than ever before known.

Big Snowstorm in Alaska.

Steamers from the north bring news that southeastern Alaska was visited week before last by the heaviest snowstorm known in years. Three feet of snow fell in less than twenty! four hours. The storm extended from Lake Bennett to the coast and from Prince William Sound south to Wrangle. The White Pass Railroad is having its first experience in keeping its road open by the use of rotary snowploughs. The great niche in the side the cliff which was blasted out to make a right of way for a large part of the twenty miles between Skagway and the summit was blown full of snow. There was danger that the rotary might jump the slippery track and go plunging into the canyon thousands of feet below. The last report says that the rotaries were able to keep the road open. Between Bennett and Dawson the weather has continued clear and cold. The telegraph line has been down between Selkirk and Dawson for ten days. The week before it was prostrated by a storm the company received over \$3. 00 in tolls between Skagway and Dawson.
