OUR COUNTRY.

In no part of this great and magnificent earth can any nation or people say our country with more pride and devotion than we. And why should we not be proud of our country? The grandest and most glorious of lands, teeming everywhere with natural scenery, the equal of which cannot be found anywhere upon the globe; exceeded nowhere in fertility and natural resources; situated so as to command the trade of the entire world; and securing to us the dearest of rights—that of governing ourselves, together with liberty and independence, which is the secret of our progress and happiness as a nation.

Let us go back and trace our country's growth from the beginning, to the present time. At first we find the small number of thirteen colonies, planted along the Atlantic coast, which were the outgrowth, in most instances, of men seeking freedom from persecution. We see them grow from a small handful of settlers, to large and prosperous colonies, gradually extending their boundaries, and ever jealous of their liberties, but fully acknowledging their being subject and tributary to Great Britain, until finally in 1774, her tyrannical and unjust government compelled them to take up arms in defense of their rights as loyal English subjects.

At the beginning of the Revolutionary war the object was not independence, for after the hostilities had commenced, we find the colonists imploring the King of England, as their beloved and rightful Sovereign, to repeal those unjust measures which he was trying to inflict upon the American people. But instead of treating them as loyal subjects begging for their rights, he declared them to be a state of open rebellion, and sent armed forces to put it down.

The colonists then saw that England was determined to ruin our country and continue to turn a deaf ear to all their supplications. As a result, on July 4th, 1776, the most memorable date in all American history, the colonists declared themselves, through Congress, free and independent states.

And today we owe nobody any greater reverence than those brave men, who were filled with patriotism and devotion to their country enough to do that act.

Yet, of all those whom should reverence and honor, none takes the precedence of Washington, who was the heart and soul of the revolution, and without whom success would have been impossible.

In a few years of sacrifice and suffering and through the intervention of France in our behalf we see the independence of the United States established and fully recognized under a republican form of government.

Other nations ridiculed it and predicted that it would not last, but soon fall. But in spite of this, it grew in strength and power, and under it the nation progressed without a parallel in history for rapidity. And now we are one of the foremost nations, if not the foremost nation upon the earth, in prosperity and power.

The only drawback to American progress was the Civil War. And we cannot fully estimate how much it really did retard the progress of the country, though it certainly was great. Yet, it had one very important result, inasmuch as it removed from the country the great curse of slavery, which will always be one blight on American history.

But where would you go to find, on this earth, a country more beautifully situated or better adapted to foster the growth of a nation. It has a temperate climate which is best suited for energy and activity; it is capable of feeding its people by its own productiveness; and in manufactures and natural resources it has everything it needs.

In educational facilities this country is unsurpassed. The public schools together with the vast number of higher institutions of learning to be found everywhere in this broad land, gives every child an opportunity to acquire an education.

The only way to retain our happiness as a nation is to see that we have good government, and if this be true, then we should strive to be true, honest, upright, loyal citizens; study the government of our country, do all we can for our country's good and in this way secure a perpetuation of the blessings of liberty to ourselves and our posterity.

Snow Shoe.

Good sleighing again at this writing. Jack Watson was troubled with quinsy last week. The affection was very much agitated by his being taken by the neck, by uncle John. Jack will think he is getting it in the neck, sure, this time.

J. B. Yarnell made a trip to Jersey Shore last week.

H. M. Gates, the all-around-man, is now enjoying himself as brakeman on the N. Y. C. & H. R. R. R.

We sympathize with Runville in having their henroosts disturbed. We're glad you are out the intruders, but we don't think any are from here except one, and for his benefit will say we don't think its chickens he's after.

The short and short of it—two salesmen at Bud's.

W. G. Lucas made a business trip to Tyrone Saturday.

The festival given by stewards and ladies of M. E. church, Friday and Saturday evenings, was a complete success, and well patronized. The little book sealed in envelopes only cost a nickel and helped out considerably. Frank would have bought one but he was afraid to risk it. Oysters sewed, plain, or with milk.

We must do the red-coats or they'll do us.

If Geo. Washington could see the red-coats in Snow Shoe, he'd raise from his grave and call for the minute men.

Arthur succeeds well as a sale-cryer, on chocolate cake.

The Snow Shoe scribe was looking for chickens over about Runville, last week, and didn't get back in time to send in any contribution. Didn't find any poultry either. Nothing but trousers with bosoms in 'em. Only this and nothing more.
