HE TELLS THE TRUTH.

A Pennsylvania editor who loves the

"Willie Shortlike and Bettie Bloomers were married last evening. The church was prettily decorated with flowers and potted plants, borrowed promiscuously all over town from people who didn't want to lend them. The decoration was done under protest by some of the members of the church, who were asked to do so by the bride, and couldn't well refuse. The ladies are of the opinion that if the couple were so bent on having a stylish wedding they should have been willing to have paid someone to chase all over the town for a day getting flowers together and then taking then, home

"The bride wore a handsome Silverstein gown, made at home, and the groom was decked in a \$10 hand-medown suit. The ushers wore cutaway coats borrowed for the occasion. Sallie Potts was maid of honor, and the concensus of opinion was that she was 2 to better than the bride. The young couple took the morning train to Pittsburg, where they will spend more money in a few days than Willie can earn in three months.

"Willie says now that he's married he's going to settle down. Some of our merchants think it would have been better if he had settled down first. The groom gets a salary of \$27 a month, which is about the allowance Bettie has been used to for pin money. We wish for Willie's sake that the old saying that it takes no more to support two than one wasn't a lie.

"The bride sent up a shoe-box full of a conglomeration of stuff supposed to be cake. If this is a sample of Bettie's cake we feel sorry for Willie. Our janitor's dog fell heir to the cake and now he's lying in the cold, cold ground. But this wedding is none of our funeral. If Willie and Bettie are satisfied we've

TYRONE WOMAN LOST.

Tyrone is excited on account of Mrs. Richard Kellar, of that place being lost spending a short time with friends in be open and we invite all our friends, in the woods. Last Thursday Mrs. correspondents and patrons to call and Kellar, who is aged 50 years, went to Frugality to visit her brother, Warren McCloskey. The next morning she disappeared. Searching parties were sent out and they are still scouring the mountains for the missing woman.

They have found her handkerchief and a fragment of her clothing was discovered hauging from a bramble. A woman answering her description was seen in the neighborhood of the Daugherty coal mines, six miles from Frugality, in the most desolate part of the Alleghenies, Saturday, but she ran when hailed.

COURAGEOUS ANIMALS.

Sungle Cat Attacked a Leopard Three Times Its Own Size-Other Instances.

In North America one of the largest of the weasel family is the "fisher," a very large, long-furred polecat, living mainly by the water side, and, like many others of the tribe, very partial to fish, says the London Spectator. It weighs about 16 pounds, and its long, richly-colored fur is exported in great quantities to different parts of Europe, though not often used in this country. A trapped "fisher" will attack anyone who comes within reach of the frap chain, and when free will beat off any dog of twice its size. But perhaps the most striking example of the courage of the smaller species yet recorded is that shown by a small variety of jungle cat known as the fishing cat, which, though no relation to the Canadian "fisher," is quite as courageous. One of these, which was kept in a menagerie, broke through into the next cage and there attacked a leopard which was three times its own size.

The Indian mongoose possesses all the courage of the polecat, together with amiability and a "regulated" mind. It turns its pluck and prowess to good ends, and we imagine it to stand at the head of the list of the smaller animals if quality as well as quantity is demanded as a mark of intrepidity. There is no doubt that the mongoose realizes the deadly nature of the cobra's bite. Its intense excitement is strong evidence of this. But a mongoose has been known to fight just as bravely against other foes. One was seen to attack and drive off a large greyhound which it fancied was hostile to it.

PULLED THEM UP.

And Franz, the Guilty One, Was Perfeetly Placid About the Matter.

The woman who has a country house comes to town these days and tells tales of her trials and joys, says the New York Commercial Advertiser. She came in from Long Island for a day's shopping last week, and after glowing accounts of her flower beds and the wonderful kitchen garden she had planned for the summer she said: "We always have curious experiences with garden workers and farm hands; not that we do much farming, but we have to keep some one to watch over the potatoes and keep an eye on the peas.

"This year we have a fine man and our garden is like an English picture. But Franz was not so good when we got him. He came to help our farm hand, Peter, and Peter set him to work in the onion patch. The onion patch, was the pride of my life. It was flourishing as nothing-but weeds-had ever flourished in my garden, and I took more interest in its progress than I did in my rose bower. Well, after Franz had been busily bending over the onion patch one morning Peter discovered, to his horror, that his assistant had pulled up all the big onions. Nothing but lit-

"When the storm of questions and reproaches broke over his head Franz said, placidly: 'Why, the big ones were crowding the little ones. They hadn't room to grow. I wanted to give them a chance, and I pulled up the big ones."

WORMS AND CYCLONES.

Owners in Southern Seaboard Cities.

Spring is the time the small white torredo worm does business down south in the wharf piles of cypress wood. The first warm day of spring the wharf owner looking fown into the green water lapping the edge of his pier sees a swarm of floating insects about an inch long and about a yard below the surface. The next day he looks for them and they are gone, every one-gone into his good piles. They will never be seen again this season; they will come the next, and by the third year the wharf owner will need to put in a new lot of piling. The torredo worms out away steadily until they cut the hard logs fairly through just below high-water mark.

In years past it was the custom in some of the seacoast cities of the south to build wharves of a cribbage of logs, resting on the harbor bottom and packed in with concrete. But the almost yearly cyclones picked up these contrivances and set them down budily quiet street.

Killed a Large Snake. Edward Bixel had a thrilling experience near Mt. Zion the other day. A large black snake encountered him as he was traveling on the public highway. The boy was alone. The reptile tried to race him. Producing a big club the llowed, in which the reptile was killed in the third round. of the community .- Loganton

"THE STANDARD"

Rotary Machines:

The following are a few reasons for buying a Rotary Machine: Largest Bobbin-holds half a spool of No. 80 cotton. First stitch perfect. Most perfect tension release. Runs 50 per cent. faster than old style shuttles. Most elastic stitch. Shortest needle in any machine. There are a score of other styles.

EVERY MECHANIC will wonch for the superiority of Rotary over Vibrating Shuttle Machines. You will only require one in this life. It will outlast any human frame.

Six Stitches in same time required to make three and one-half on old style shuttle machines. Just a trifle more than half the time required on other machines to do the same amount of work.

A Special Invitation

Is kindly extended to all while attending the coming Centennial of Centre county to call and see "THE STANDARD" Sewing Machine and allow me to explain its many excellent features and advantages over all other machines in the market. It is THE BEST and I can verify this statement by medals captured at the World's Fair, Atlanta, Omaha and other expositions. If you have an old Standard you can get the new attachments at little cost.
