Fire broke out in the woods at the rear of the McCalmont farm, now owned by S. H. Kunes and D. W. Clark, Saturday afternoon, and, owing to the high wind and dry weather, spread rapidly, destroying the wood, also the fences and burning over several fields. It is supposed that the fire started from a lighted match or cigar carelessly thrown down by some one, as it was near where the picnic was held. To the Snow Shoe scratcher: I will now explain to you the reason you was attacked by the fire animals of this place, you know it is very dry weather and the grass is all dry, and the potatoe bugs and grasshoppers live on green stuff, and they know a green thing when they see it. So when they saw you they knew it and all flocked to the one spot and it is a wonder there was anything left of you. Ha, Ha! We saw you in the corn field, our attention was called in that direction by the crows making a loud noise, but just supposed it was a scare crow the farmers had put there in spring to protect his corn and did not think any more about it. We are sure you did not hear anyone sing "My sweet heart is the bum in the corn field." In the winter is the best time for you to come to this place.

Another Way.
