The Snow Shoe scribe must understand that there are more charms here than he considered at last writing. It has recently been found out that a certain lady at this place was not long ago presented with a great large photo of the honorable scribe at Snow Shoe, which some of the young people have taken and erected on a large pole in the central part of the vicinity, and potato bugs, grasshoppers, or any other insects of the farm which come within a radius of one-half mile of the horrible spectacle drop dead instantly. Ha! Ha! There is no Chinese puzzle about it, for down in the lower valleys of this county the insects have infested the fields all summer and just lately the people have heard of the cure used here and have made a contract with Malory, the photographer, to recopy a large number of the photos, paying quite a large percentage to the one owning the photo, and the photographers and owners of said cure are both making great fortunes rapidly. The scare crowd's apparel will not be needed by the ladies and if the S. S. scribe will please make another trip we will make him a present of all the clothes he wishes and we think all will fit excepting shoes, as we are informed he has enormously large feet. These clothes you are welcome to and we would advise the scribe to use same in attending school this winter, and when spring comes, perhaps he can spell his big words correctly. We will not recommend the goods to be in first class order, but for all mending or repair we would advise you to patronize W. D. Walker, Snow Shoe, who is in your town from Saturday till Monday regularly. Instead of singing "My sweetheart among the pumpkin blossoms" they can be heard singing, "He is a green cabbage head. That's what the people said, Deed they did."
