The Snow Shoe scribe must be of about the same temperature as the Yarnell scribe was last winter, as they both want to look at things from a "combative standpoint," and when the point appears, both run. You had better be careful in throwing your brickbats, as we have the bats and batters too; and they might rebound, when you are on that combative point, and you will be the someone getting your face hurt. You began the maligning and got scared and got a helper as No. 2. As to playing "the cow that crossed the road," you had best be careful when you blow your horn or turtle shell unless you have a rubber face. We are not one bit afraid to monkey with the band wagon when there is a monkey inside.

A Good Sleep.

Nothing adds more to vigor of body and cheerfulness of mind, or aids so well in chasing away the lines of worry and care from the weary brow, as good, sound, refreshing sleep. But when the gray matter of the brain has been robbed of its vitality and constructive strength by weak, worn-out and exhausted nerves, sleep gives way to restless tossing and long hours of feverish distress. Do you want a good sleep? You can get it if you go about it right.

"After four months of intense suffering from nervous prostration I was a helpless invalid, could not eat, did not sleep 30 minutes in each 24 hours and was so run-down that I had lost nearly 60 pounds in weight.
