EDITORIAL.

In Centre county there are about 50,000 acres owned by the state as a forest reservation, and more will be purchased.

JUDGE Archibald takes the federal judgeship plum from Judge Love. Why not make a new district for our townsman while they are in that kind of business? Judge Love has earned something, surely.

WHAT has this machine legislature done? We defy any of its defenders to show a single act that was not in the line of creating new and unneeded offices for party henchmen with fat salaries. The farmer and working people are not in it.

HON. D. F. FORTNEY'S admirable address delivered before the State Directors' Association, printed entire in the Centre Democrat two weeks ago, has received favorable comment by journals of the state interested in our common schools. One paper in one of the eastern counties copied the address entire from the columns of the Democrat. Mr. Fortney may well feel proud of being ranked as one of the foremost champions of our school system.

THE Delaware legislature has chosen the state shall not be represented in the United States senate unless called in extra session to fill the two senatorial vacancies. The legislature adjourned sine die on 8, and does not meet again until January, 1903. There were 27 votes necessary to a choice. The Democrats cast 23 votes for their candidates and the republicans divided, Addicks having the greatest number. The Nebraska legislature has also two senatorial vacancies to fill, and its time limit is about expiring, with no probability of a choice.

TALK of disfranchising the colored people of the South who can not read or write! If that is a wrong, then a thousor on the articles they attack, they will and fold greater is the wrong of the magive both a wide berth and make themchine in Pennsylvania, which by ripper bills is endeavoring to disfranchise the independent, intelligent white republicans, because they will not bow the knee to Quay. Further, the same conspirators are disfranchising a half million of white democratic voters and several hundred thousand white independent republican voters in Pennsylvania, by unconstitutional apportionments, because they will not endorse the astounding wrongs of the Quay machine.

THE state of Mississippi has a total population of more than 1,500,000, yet her total vote at the presidential election in last November was only 60,000, or one vote to every 25 of her population. There must be something wrong where such a condition of things exists thinks the Lock Haven Express, republican. Surely there must be "something wrong" same as in Philadelphia where 100,000 democrats poll only 30,000 votes, because the machine, to which the Express belongs, makes it useless for any democrat, or independent republican should vote, on account of its ballot box stuffing and fraudulent registration.

Will Be Established in This State in the Near Future.

The first meeting of the state forestry reservation commission since the creation of the new department of forestry by the passage and signing of the bill introduced into the present session of the legislature, was held at Harrisburg. Dr. Rothrock reported that over 110,092 acres of land are now actually held by the state as forest reservations.

In addition to these, there are 25,996 acres in the hands of the title examiner for examination as to title and transfer to the state, if the titles be found satisfactory. Fourteen thousand acres are under considertion, if price can be agreed upon and satisfactory titles given. This makes a total of 150,089 acres in only a few places, but that observers which either belong to the state actually or are in process of acquisition.

The commission recognizes clearly that the state has entered upon a great planting has retarded the growth of the work, which is intended to benefit the commonwealth financially, in the way of plants have rotted at the root, and that restoration of timber and the lumbering industry. Arrangements have, therefore, been made to begin operations in a very modest way. Mothers Note This.

"Laying on of the hand" for com plaints, especially in children, is now taking the place of Christian science. A mother cured her son of using profane language with one dose. She laid her left hand on a substantial slipper, and then laid the slipper where it would do the most good. It effected a cure, and a relapse is not looked for .- Ex.
