GHASTLY STORY OF CANNIBALISM.

Terrible Tale Told by Two Survivors of the Horror.

London, April 8.—The Singapore correspondent of The Daily Express wires a ghastly story of cannibalism at sea brought to Singapore by two survivors of the Nova Scotian bark Angola, wrecked six days' sail from Manila on Oct. 23 last. The correspondent says: "The survivors, Johnsen, a Swede, and Martieornu, a Spaniard, assert that the Angola struck a reef. Two rafts were built. The smaller, bearing five men, disappeared. The other, with 12 men, drifted for 40 days. The sailors ate barnacles, sea weed and finally their boots.

"On the 25th day two became insane and killed themselves. On the 26th a Frenchman killed the mate with an ax, drank his blood and tried to eat his brains, but was prevented by the others. Next day the Frenchman was killed while attempting to murder the captain. The survivors, all of whom were now insane, ate the Frenchman's body.

"Cannibalism continued until only Johnsen and Martieornu remained. On the 42d day the raft stranded on Subi or Flat island, in the Natuna group (northwest of Borneo). Johnsen and Martieornu were awfully emaciated. Friendly Malays sent them by junk to Singapore."

"The Pittsburg Post" is the kind of a newspaper that is bound to be successful. It is second to none in the matter of publishing the news of the world, and in addition to that all objectionable items are eliminated. It is a newspaper that can be safely admitted into any home. "The Post's" facilities are surpassed by none. It has demonstrated time after time it is always on the alert, whether it be to gather the news of the far East or of the local field. "The Post" is essentially a newspaper, but it does not neglect other features that go to make a well rounded daily publication to interest all kinds and conditions of men.

Dr. J. W. Bates of Corfu, N. Y., states: "A most remarkable case has come under my hands of late and has fully convinced me of the wonderful power of Dr. A. W. Chase's Nerve Pills over diseases of the nerves.

"A young lady who was treated for over two years for epilepsy by two doctors was given up to die. I found that her sickness was not epilepsy, but nervous troubles, due to menstrual derangements, and prescribed four of Dr. Chase's Nerve Pills a day, after meals and at bed-time.
