Some of our people have discovered a quicker way of transmitting messages than by electric telegraph; the discovery is this: Just tell the message to your neighbor.

The people in this place are very much pleased with the daily mail granted by the postoffice department on July 1. There is considerable talking and guessing who will be our next postmaster since O. T. Fetzer resigned to carry the mail; we are informed R. M. Butler has secured the appointment as postmaster but declines to serve, for my part I think the office conveniently located for the most of the citizens of this place and should be continued somewhere in the village, and think the office should be placed in a public place; why not petition the department to appoint I. P. Confer postmaster, and have the office moved to his store, that would be a convenient place for all interested?

I noticed an article in last week's Democrat about the Musser house at Millheim. It has been occupied by the Musser family for about 40 years. W. S. has been in it for 23 years and in all that time it appears, has not made enough to meet obligations and was sold out by the sheriff last Thursday. The stand is certainly one of the best in the valley and a man should make money there, as well as they do at other stands.

I took a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy to the house telling them I felt sure it would do good if used according to directions. In two days' time the child had fully recovered, and is now (nearly a year since) a vigorous, healthy girl. I have recommended this Remedy frequently and have never known it to fail in any single instance." For sale by Green's Pharmacy.

Daniel Taylor, residing near Fillmore, does all his shopping on this side of the mountains, where he always gets the worth of his money, and sometimes a little more. Recently he bought, among other things, a pound package of coffee and on opening it he found a ticket enclosed "entitling the holder to a china tea set of 44 pieces." J. E. Griest, of whom he purchased the coffee, forwarded the ticket to the firm in Chicago and the tea set came promptly to hand, free of freight charges. Dan was as happy as a little boy with his first pair of new red top boots, as he lugged them over the mountain.

Allen G. Rumberger, who has been in the employ of Kern, Lauderbaugh & Co., at Philadelphia for the last few years, came home a week ago to spend his summer vacation with his parents and, while here, he met with a most singular and painful accident which might have resulted more seriously than it did. He and his nephews, George and Cornelius Brugger, indulged in shooting mark with a 32-calibre target gun. The target was a piece of white paper the size of a half dollar tacked on the hard stump of a pear tree. They shot at short range—perhaps about fifteen feet—with unerring aim they perforated the paper with bullet holes. But their sport ended when Allen met with a serious accident. He took aim as usual and when the gun was discharged, it dropped from his hands to the ground, he uttered a cry of pain, and, reeling around ran into the house where he fell, fainting, to the floor. Mrs. Jos. Brugger, at whose home this occurred, though very much frightened, got some cold water and dashed it on his face, which had the effect of reviving him. On examination it was found that the ball he fired struck him in the outer corner of his right eye, the one with which he took sight, and almost in a direct line to the target which was on a parallel with his eye. Had it returned a quarter of an inch lower it would have entered the muzzle of the gun from which it was fired. We carefully examined the stump on which the target was tacked and found the course of this singular break of the bullet to be utterly unexplainable. Had the ball struck him a little bit higher it would have undoubtedly destroyed the sight of his right eye. It became very much inflamed and was very painful for several days—but he hit the paper.

Miss Tamar Shirk, while returning from picking berries, passed a walnut tree, just as it was struck by lightning, and was thrown to the ground by the shock, but experienced nothing worse than a severe shaking up. The way the thunder roared and the proximity of it caused some of the citizens to hie away to insurance offices, and we warrant the next thunder shower that passes over this place, the majority will rest easier while the thunder and lightning is playing hide and seek around their buildings.

Mention was made last week of the storm which struck this town on Tuesday. But among other things not mentioned we might briefly mention the hay that went through town, not on wagons, but on the raging, surging flood, and relieving some of their wood supplies, board-walks and yard fences, tearing up the street and flooding the cellars, enlarging the fields by taking away the fences. At one place obstructing the tracks of the P. R. R. Co by washing wheat on the tracks compelling the train to come to a standstill until it was removed. Many tons of hay were entirely destroyed.

Among the heavy losers in this respect may be mentioned, Robt. McClellan, Ferguson Potter and others. During the thunder shower of Wednesday, lightning struck the tenant house on the George VanTress farm, and stunned some of the inmates, especially Mrs. Hester Long, an aged lady. The fire was subdued before much damage was done.

OUR IDENTITY.—As some people have been making inquiries as to who the correspondent is from this place, we presume in order to give him a good nice slice of their mind, we will try to describe ourselves so they may know us, when they meet us on the streets, and be able to retaliate when hit in the items. When we were extremely young, people called us handsome, but since we have grown older, we have also grown uglier, in fact so much so that some people have mistaken us for Darwin's missing link. We are not very high up, but wide out. Talk Dutch, English and German mixed, wear a stove pipe hat, homespun shirt, hickory suspenders, knicker-bockers and barefooted. Our greatest hobby is to mind the affairs of everybody except our own, and they are well taken care of by everybody else. Our principal occupation "before the war" was selling patent medicine during the war, shooting Philipinos, and since the war we have reached our highest ambition and climbed to the top of the ladder by becoming correspondent to the Centre Democrat, the great leading weekly of Centre county. Our name? Oh yes! we nearly forgot. Well, we may tell you in our next?

He married but his wife preceded him to the grave many years ago. The following children survive to mourn their loss, namely, Mrs. William Tressler, Fillmore; Mrs. H. C. An Engine With a Record. Locomotive 1999, owned by the New York Central railroad, has been taken out of commission at Jersey Shore. For more than 38 years it was in constant service, and is famous because it drew the funeral train of Abraham Lincoln over the Cumberland Valley railroad in 1865. Then it was considered the most perfect and powerful type of passenger in existence. "No. 1999" was built in the Baldwin shops in Philadelphia and was in use on the Cumberland Valley road until five years ago, when the old engine was sold to the Pittsburg and Eastern. When this road was absorbed by the New York Central "No. 1999" was sent to the Pennsylvania division to be used as a yard engine.
