EDITORIAL.

THE Navy Department catches Schley coming and going. First it indicted him on the strength of that famous chart and now when some of its charges are proved false by that very production, it declares the chart inaccurate.

In France, avowed anarchists may be imprisoned or banished. The newspapers are forbidden to publish accounts of their trials or of their executions, if convicted. Thus the criminals are prevented from posing as heroes.

We need fearless criticism of our public men and public parties. We need unsparing condemnation of all persons and all principles that count for evil in our public life.—President Roosevelt in his essay on reform methods in politics.

THE Court of Inquiry evidently intends to be absolutely fair, in marked contrast with the attitude of the Navy Department. Its respect for fairness has again been shown by its ruling on a question put by itself on being shown that it was improper.

It is a good thing to appeal to citizens to work for good government because it will better their estate materially, but it is better to appeal to them to work for good government because it is right in itself.—President Roosevelt in an essay on stay-at-homes in politics.

As we expected, the G. A. R. is rising in its wrath to denounce President Roosevelt for declaring that he is proud of his two uncles who served in the Confederate navy. The G. A. R. is determined to revive the sectional issue if it is in any way possible.

AGAIN is the law peculiar. Czolgosz was asked by the state to plead to the indictment of murder, but his plea of guilty was not accepted, because under the law it could not be. From this it would seem that he had to be regarded as innocent until proved guilty by trial. Even his own word would not be taken as evidence of the fact. It indicated a disposition, however, to make no defense, and it was admitted by his counsel before the trial began that he had none.

FOR CLEAN GOVERNMENT.

Fusion between all the honest elements in the state, against machine rule and the public robbers who have disgraced our state in the eyes of all honest men in the country, seems to be perfected. In boss-ridden and plundered Philadelphia the independent republicans have joined with the democrats for the election of a fusion ticket in the city and state. The state ticket agreed upon by the friends of pure government is that of Yerkes, democrat for supreme judge, and Coray, independent republican for state treasurer. For Yerkes every honest Pennsylvania can, and should, vote, as he has been tried upon the bench and shown his great legal ability and impartiality in that high and important position—a jurist of the purest character. Mr. Coray has served in the lower house of the legislature six terms; elected as a republican, but in every session he has stood shoulder to shoulder with the democrats against the iniquities of the machine in all the rascality perpetrated. Any democrat can, therefore, vote for Coray. Mr. Palm will voluntarily withdraw from the democratic ticket in order that Coray may take his place and thus form a fusion ticket.

The democracy all over the state by their organs and their leaders, have pronounced in favor of fusion. Hundreds of thousands of republicans in the state, along with their leading organs, have endorsed fusion, and will join with the democrats for the election of Yerkes and Coray, and save the commonwealth from further dishonor and disgrace by the thieves that have violated all constitution and law and every principle of honor, and fastened upon Pennsylvania a rule of scoundrelism that has not its equal in perfidy in any state in the Union. There are a few purchased democrats who will give fusion a side glance because they are traitors in the camp. This is not a contest for party supremacy, but a joining of hands by honest men of all parties to put an end to machine rule in the state and have the people run the government for the general good and put an end to the plunderings of the gang that would land in the penitentiary if they had their deserved dues.

The autumn leaves are falling. Not so, however, with the price of coal.

OUR HISTORICAL REVIEW.

(Continued from Page 1.)

on board of that fleet. When we came to New York there was no exchange for us. General Carlton then commanded the British army at New York; he paroled us to return home.

In the month of March, 1783, I was exchanged, and had orders to take up arms again. I joined my company in March at Northumberland; about that time Capt. Robison received orders to march his company to Wyoming, to keep garrison at Wilkesbarre Fort. He sent myself and ensign Chambers with the company to that station, where we lay till November, 1783. Our army was then discharged, and our company likewise; poor, and penniless, we retired to the shades of private life.

ARE YOU GOING TO BUFFALO ?

There are about four weeks left until the Pan-American Exposition at Buffalo will close its gates and the splendid exhibit will be a thing of the past. The writer was to the exposition last week and was more than surprised with its extent and high merit. While it is not as large as the World's Fair, yet there are many new features, the grounds are more picturesque and the buildings are finer in their groupings and decidedly of a higher grade of architecture, while everywhere you turn there is a wealth of artistic ornamentation, and the colorings of the various structures are so well selected that there is a harmonious blending that is more pleasing to the eye, and as a whole surpasses the great white sheds at Chicago. To give in detail of what the exposition consists is not our intention. It is a magnificent affair, in every sense of the word. Every feature is well represented, and especially that of the government exhibit which covers three large buildings illustrating the methods employed and appliances of every department of the public service, such as mails, weather, agriculture, army, navy, fisheries, navigation, mint, etc. This feature alone is worth a trip to Buffalo, but then it is only a small part of a large exhibit. You have the art gallery, horticulture, forestry, machinery, electrical, industrial and a host of other large exhibits to interest you, while the electrical illumination of the grounds at night is one of the most impressive sights ever produced. All these exhibits are interesting and instructive and the longer you study them the more you find there is of information to be acquired.

While a person may grow tired of the serious and practical side, all that he need do is to step into the Midway and there he will find variety and spice, to his heart's content. Scores of amusement halls and places to spend a half hour abound and some of them are exhibits of high merit (and this is no pun), especially those showing the life and manners of peculiar races living in all parts of the globe. There are some attractions "a little on the order," while on the other hand there are exhibits that are purely of a religious nature that any minister could urge his flock to see. In short, the exposition is a rare treat, which all who can afford we would urge to see. The way to see it is to purchase a guide book as soon as you get to the city and then spend an hour studying the plan of the ground and what the various buildings contain. If you don't, the chances are that you will go about wandering and retracing many a step. You should do the exposition methodically, and in that way you will save much time.

A great many people from this section have attended the exposition and there are others debating yet about going. To them we say that it is a trip worth the cost and one that you will never regret. The cost probably is the most important to the average individual. Your fare from this section is less than \$7. There are hundreds of private houses in Buffalo anxious to have you take lodging and breakfast with them, the charge being from \$1 to \$1.50; in the city or on the grounds you can get lunch or meals that are substantial from 25 cents on up. For 5 cents you can ride from any part of Buffalo to the exposition. You can live as cheaply and about as well in Buffalo as in Bellefonte. Of course, if you are fastidious and can afford to have attention and special service you can get it there up to any price. But we are speaking to those of our readers who have no abundance, but of moderate means, who must earn their income by the sweat of the brow, and they are the bulk of our readers and to whom this matter is ever important. The admission to the ground is 50 cents. You will want to see a number of the best attractions on the Midway and should have about \$3 which will take in the best of them. Then calculate \$5 for incidentals and \$2 per day for boarding and lodging; with railroad fare \$7, you can see that a person can spend four days at least at the exposition for less than \$25. Some have told us that it cost them \$17. The trip to Niagara Falls costs about \$2 more.

While at Buffalo the writer stopped with Samuel Dresher, a former resident of Bellefonte, who was raised in Potter twp. He conducts "The Allen," at 227 Allen street, where a great many persons from this county have stopped. He will take good care of you at reasonable prices—beds are clean and meals were good. Be careful that you get to the right "Allen"—there are others.
