The face of an auditors settlement was again gone through on Monday a week and the usual amount of white wash applied; it shows more extravagance and recklessness than has ever been brought to the surface before as it shows the borough to be largely in the hole, and that it required five times the amount to grease the machine last year than it took in the beginning where a great many improve ments had to be made. At that time all the money had to be raised by taxation while under the present law two hundred and twenty-eight dollars is received from liquor license and the assessment still in excess of former years. This certainly shows a lack of executive ability or willful profligacy, on the part of the officials and a violation and disregard of the official oath. The borough is hemmed in on four sides by toll gates and the principal thoroughfares are kept up by corporations, and tolls collected from those passing over the same, and the few streets to be kept up are badly neglected except those of favorites and pets, which receive attention from the ring within the ring; so are appointments made to the highest bidder instead to the lowest without regard to ability or qualification, so it goes to the ring. This white-washed statement does not show one cent collected or paid over by any official for shows, plays, fees or fines to be collected under the ordinances of the borough, which seem to be a dead letter and entirely obsolete, except for the purpose of extorting unreasonable taxes from the public and since this misrule has got into away real estate has depreciated at least one-third and the population in about the same proportions, as parties do not want to own real estate where municipal affairs are mismanaged and unreasonable taxes levied.
