

A PAPER BALLOON.

One That Makes Its Own Gas and That Will Rise In the Air.

All boys and many girls who have the spirit for adventure have often longed to take a trip with the man in the balloon and go away up in the sky where they can look down upon the people below, who, as he rises, keep growing smaller and smaller until they are mere specks on the earth and finally fade out of sight altogether.

Many, many strange sights are often seen from the balloon as it rises up into the heavens, for from that high point men can look down as they cross the deep lakes and rivers and see the bottom as plainly as if there were only two or three feet of water, when really the lake is probably fifty or sixty feet deep.

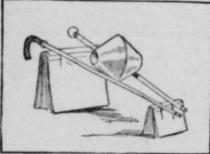

Now, this real big balloon is never safe for the young folks to ride in, for their presence of mind would probably leave them when they reached even the tops of the church spires, and then they would either cry to return to the earth or huddle down in the bottom of the basket, afraid to even look over the side. Yet I am going to tell you how each one of you little folks can make a balloon all of your own, and, while it will not be large enough to ride in, you may send up in it toy people, who will not hurt themselves if they do fall.

This is not to be a trick or a sleight of hand performance, but merely a plain, matter of fact amusement for those liking such play, and this is the way it is made:

First you get a large piece of tissue paper; tie a light string around each of the corners firmly; then get a small pasteboard box and tie to the strings, about eight or ten inches below the ends of the tissue paper. When this is done, get an old sponge or a piece of soft woolen rag, wet it thoroughly in either spirits of turpentine or alcohol, set fire to the rag or sponge and give your little balloon a sudden shove upward and see it rise like a feather in the air until the rag or sponge is entirely burned up; then down again it will come to within a few feet of where it was sent up.-E. A. Emmons in New York Herald.

A Curious Illusion.

A curious trick may be performed by means of two conical bodies and a couple of walking sticks. Take two lamp shades and fasten the edges together. Then make an inclined plane by means of two walking sticks in the manner shown in our illustration. Let the space between the two sticks be

ROLLING UP HILL.

wider at the higher than at the lower end. Then place the double cone at the bottom of the incline, and it will roll to the top. Although at first sight the trick suggests a disturbance of the natural law of gravitation, it is only an adaptation of that well known principle. As the sticks widen the cone is correspondingly depressed, and the center of gravity is equally lowered.

Evening Fun.

party is "scissored animals." Plain white paper, scissors and pencils are social intercourse.-Harper's Bazar. the implements, and the little guests are allowed a few minutes in which to cut out any animal they may choose from the paper and add eyes, ears and pencil.

animal must be scissored right out of the paper.

privileged to write the name of the animal represented. The result is usually the greatest show on earth.

Prizes may be offered, but it is not wise to give a booby prize. There is such an embarrassment of riches in this direction that choice is too difficult.

Little Things.

It was a little stone that slew Goliath; it was a common basket that saved the life of a great apostle; it was a spider's web spun across the opening of the cave in which the great Scottish patriot was hid that made the soldiers not think of searching for him there. There were only two small fishes, but from them esus fed the multitudes, so that it says. "Likewise of the fishes as much as they would." - Detroit Free Press.

A Good Trick,

With some lycopodium powder the surface of a large or small vessel of water. You may then challenge any one to drop a piece of money into the water and declare that you will get it with the hand without wetting your skin. The lycopodium adheres to the hand and prevents its contact with the water. A little shake of your hand after the feat is over will dislodge the powder.

His Explanation.

A little boy who was asked the other day what was meant by the "sins of omission" responded without a moment's hesitation, "The sins we have forgotten to commit."

HOUSEHOLD HINTS.

If you want to dry a damp cellar, let a bucket of unslaked lime stand in it for a few weeks.

When windows are difficult to open, rub the cords with soft soap and the sashes will run smoothly.

Cheap varnish is said to be much better than white of egg or any kind of mucilage for attaching labels to cans or boxes for the fruit or store closet.

Always keep carbolic acid convenient for use. It is one of the best insect destroyers that can be used. A small quantity only need be applied at a time.

Wringing out a cloth in hot water and wiping the furniture clean before putting on the furniture cream will result in a high polish and will not finger

Far more important than the external beauty of the bed is its "comfortableness," and the careful housewife will consider that factor as its first require-

According to a housewife who has made the experiment, a thin coating of varnish applied to ordinary straw matting will keep it looking fresh and new and add to its durability.

Salaried Charity Workers.

A new profession for women that pays well is that of a charity worker. There is not much competition as yet, and the opportunities for studying charity work are limited, but still it is now possible.

New York has a training school for charity workers. The women who enter are put into active service at visiting under proper lectures upon the different phases of the leadership, and then there are courses of subjects. It is quite worth entering from a financial standpoint also. Philadelphia is proverbially conservative, and yet we pay the young woman at the head of our organizing charities the salary of \$5,000, and she can greatly supplement it by lecturing and literary work upon the subject of her profession.

Other cities do better than this, and the time is not far distant when all charitable work will be conducted in a methodical manner by an expert, who will be well paid for her services .-Philadelphia Record.

Sun Baths.

It is said that frequent sun baths are the best known tonics for a woman's hair. The Greek maidens of old who sat on the walls of the city and combed their hair owed the beauty of their tresses to the sun's rays. When the hair is washed, sit beside a lowered window, as the sun shines stronger through the glass, and allow the hair to dry as it is being brushed. No bleach has been found so successful as the sun, which strengthens and beau-

tifies generally. When the hair shows a tendency to fall out, the very best thing to stop its coming out and to promote its growth is the abundant use of genuine olive oil. Saturate the hair thoroughly and keep it saturated for a week until the dry scalp has absorbed all it will, then wash with pure soap and water. If this operation is repeated every two or three months the effect is said to be marvelous.

A Hint to Girls.

It was a little thing, but the other day a young girl was noticed following her callers, two young lads, into the hall as they took their leave. She even accompanied them to the stoop, this undoubtedly because she did not quite know how to say goodby and dismiss them in the parlor. There was nothing formal in the call, which was merely a drop in of some schoolboys, but it would have been a good time for that young girl to practice the little dignified conservatism of the hostess that presently she will very much need. A girl may be all that is charming and companionable and cordial and hos-An amusing little game for a child's pitable and yet preserve the ceremonious forms that are the necessities of

Mrs. Harrison's Pen Name.

The ter of her father's fame. For this reason she combined the names of two clever women in her family, one of Fortunately, however, each one is whom was Mrs. Mary Lucas, the maiden name of her father's mother, and the other Alice Malet, her grandmother's aunt, both of which names she has thus rescued from oblivion.-Washington Post.

Nickel Fittings.

To clean the nickel plate of the bathroom a mixture of washing soda and ammonia may be used for the cleaning part, with a little thin whiting paste when it comes to the polishing. These fitments are easily kept clean and bright if treated once a week, but the surface once thoroughly clouded through neglect it will take many repeated rubbings to restore the original polish and brightness.

Child Obedience.

There should be no conflict of authority between husband and wife in the exaction of obedience from their children. Little ones learn quickly that they can appeal from mother to father and vice versa. One parent should uphold the authority of the other. To be a shuttlecock tossed to and fro between conflicting parental methods of discipline is very detrimental to the child.

Easy Washing.

When washing clothes, dissolve a little pipeclay in the water or rub with the soap on to the clothes. This process gives the linen the appearance of being bleached and also makes the clothes clean with half the usual labor. When the water is hard, pipeclay is especially useful, for it makes the water as soft as rainwater.

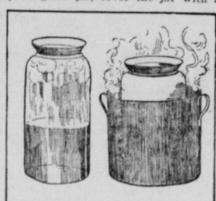

FOR LITTLE & TOLKS TOLKS

A STORM IN A JAR.

How You May Raise a Tempest In a Glass Vessel.

Here is a very pretty trick which you in perform with little trouble and which is always very effective. You should tell your friends that you have been on a visit to Old Man Swinkum Swankum, the rainmaker, or something of the kind and that he gave you a jarful of rain. Then bring in a jar of alcohol, all ready prepared, as explained below. It will interest your young friends very much, and as they cannot tell what is in the jar they will be completely puzzled and delighted, too, by the little bottled piece of a rainstorm before their very eyes.

Pour a quart of alcohol into a two quart glass far, cover the jar with a

A PRETTY PARTY TRICK.

saucer and set it in a vessel of hot water, which, however, should not be hot enough to make the alcohol boil. When the spirit is thoroughly heated, remove the jar, taking care not to shake it, from the water and place it on a table to cool. Soon a cloud will form under the saucer and a very fine rain will fall upon the surface of the liquid below. The shower will last fifteen or twenty minutes. A more violent storm, with miniature whiriwinds, may be produced by replacing the hot saucer by a cold one when the jar is taken from the water .- New York Her-

Swiftness of Animals.

Every one has noticed the marvelous endurance shown by little fox terriers, who follow their masters for hours while the latter are riding on bicycles or in carriages. Some wild animals show great endurance, as the wolf, which can run between fifty and sixty miles in one night. The arctic fox has been known to do as well. Eskimo and Siberian dogs can travel forty-five miles on the ice in five hours, and there is one case on record where a team of Eskimo dogs traveled between six and seven miles in twentyeight minutes. The speed of shepherd dogs is said to be from ten to fifteen yards a second. Setters and pointers hunt at the rate of eighteen to nineteen miles an hour, maintaining their speed for at least two hours. A foxhound once beat a thoroughbred horse, covering four miles in six and one-half minutes. Greyhounds are the swiftest of all four footed creatures. Their speed is equal to that of carrier pigeons, covering from eighteen to twenty-three yards a second.

Funny Fishermen.

In England the boys and sometimes the grown men have a very funny way of catching fish. You would never guess what it is, so

I might just as well tell you right off. It was an English boy who told me "You must first catch a goose," he

said, "and that is the hardest part. Then you tie a line which has a baited hook on one end to the goose's leg. "Then let her go. She'll make for the water every shot, and as she swims

about she of course drags hook and line after her "Pretty soon a fish bites and maybe

gets hooked. "Then the goose feels something tugging at her leg, and she swims along about as hard as she can, but this only makes the tugging worse. The only way to get away from that awful something, she thinks, is to get out of

"So, with wildly beating wings, she makes for shore at a rattling pace."

The Obedient Table.

the water.

You can make a light parlor table or chair obey your will and move when you want it to in the easiest possible manner, and no one will be able to detect you after you have practiced it a little. Attach a silken thread to the inseam of your trousers below the knee, allowing it to fall in a loop almost to the floor. Pick up the small table, ask your friends to examine it and then place it upon the floor, allowing one of its legs to fall within the loop of the thread. Step backward and command the table to move. As soon as you have tightened the thread the table will naturally go where it is pulled, and the sudience will be mystified.

Number Thirteen In Coins.

The commonest of all our silver coins is the twenty-five cent piece. In the words "quarter dollar" are thirteen letters. "E Pluribus Unum" contains Crider Exchange. thirteen letters. In the tail of the engle are thirteen feathers and in the shield are thirteen lines. There are thirteen stars and thirteen arrowheads, and if you examine the bird through a microscope you will find thirteen feathers in its wing.

Had Their Own Spoons.

Good Mistress Chicken gave a party To her little barnyard friends

And served a most delicious sop
She'd made from odds and ends.
Their manners shocked the lady much.
"Why not use the spoons?" said she.
"Because," one said, and wagged his

"We're spoonbill ducks, you see."
—Delineator.

Joseph I. Young, who has long been an attache of the famous London Cook tourist agency, declares that the best lady traveler is the American girl. "As a rule," he says, "women are not good travelers. Some engage a berth on a first class steamer, find they are unable to start at the appointed time and wind up by sailing in a slow freighter. We have a good deal of trouble with the woman who reads a lot of guidebooks before she starts. She is usually so busy finding the proper page that she misses some of the best sights. Then there is the woman who travels with too much luggage. The experienced person provides himself with the smallest possible amount of such impediments, wears a serviceable dress with a few invisible pockets and is happy. The greatest luggage fiend is the English girl, who is liable to have as many as fifteen packages and wonders why she sometimes loses one or two. Taken as a whole, women are not so much of a trial as might be imagined. Nearly always they graciously recognize good attendance, and a pleasant smile from one of them goes further, even with a surly guide, than a handsome tip from some men."-Argonaut.

Spirit of the Home.

There are dwellings where physical health, refinement, well to do circumstances and no trouble of any importance lack but one thing-the optimistic spirit of the mother. There is no use denying a fact which we all know. The spirit of the home follows that of the mother.

No Hair?

"My hair was falling out very fasteand I was greatly alarmed. I then tried Ayer's Hair Vigor and my hair stopped falling at once."-Mrs. G. A. McVay, Alexandria, O.

The trouble is your hair does not have life enough. Act promptly. Save your hair. Feed it with Ayer's Hair Vigor. If the gray hairs are beginning to show, Ayer's Hair Vigor will restore color every time. \$1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. He sure and give the name of your nearest express office. Address, J. C. A YER CO., Lowell, Mass.
