We are glad for this vindication of Mr. Miller. He is now again in charge of the postoffice at at Rebersburg, which, pending the investigation of the case, was in the hands of a deputy.

#### Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure Deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

#### FROM IOWA.

Tama City, Iowa, July 8, 1902.

Dear Editor:—I will write a few lines to my friends of old Center Co., as I am a good way from my old home, so they can see I am among the living. We came west in 1870, when the state of Iowa was not so densely populated as at present. In 1870, wolves roamed over our prairies and howled enough to set any one crazy, but now you cannot hear or see one. The prairie chicken gathered in the grain fields in the spring, but now they are almost annihilated. I must tell you something of our old Hawk-eye state. When we came west a man could get land for 3 and 4 dollars per acre, now it costs all the way from \$40 to \$100. One man can farm all the way from 80 to 160 acres. I farm 120 myself. I have 60 acres of corn, and plowed it all myself and it looks fine, and my wheat is nice. I have 30 acres of it and it has commenced to ripen a little. The crops I never saw look more promising than at present on high land. The low ground is all drowned out. We have had a great deal of rain of late; it has rained off and on for 48 hours and some of the time pretty hard, but the sun set tonight clear and hope it will give us some good weather so we can make our hay and get ready for harvest. Our hay crop is not very heavy, it was too dry in the spring. They are paying \$2 50 a day

for haying hands. That is pretty good. Wishing you a prosperous year I will close. Yours respectfully W. T. POORMAN.

#### "ALICE OF OLD VINCENNES"

Another enchantingly interesting story is delighting readers of the Sunday North American. "Alice of Old Vincennes," by Maurice Thompson, is both thrilling and pathetic, a word picture of the life of the early settlers in Indiana, which portrays the lights and shadows of pioneer days with the skill of the expert. Alice Roussillon is introduced to the reader. She is described as a tall, lithe girl at play beneath a cherry tree with her foster brother, Jean, the hunchback. They are interrupted by Pere Beret, the parish priest. Gaspard Roussillon, the adopted father of the children, a stalwart French immigrant, had taken the two waifs and had given them a home. The girl was of Protestant parentage, but her guardian, a devout Catholic, had refused to interfere with her religion, to the regret of the good priest. After children for their rough play Pere Beret was told that a quantity of alcoholic liquor had just reached Vincennes. He made no sign of approval or disapproval, but as he sat on the doorstep of home thinking of it, a letter was handed him. The continuation of the story will be found in the Sunday North American.
