There was a big fight in front of the Potter House one night, and he carried on the scene just in time to be struck on the head by a brick that one of the participants threw at the other. Hicklin suffered greatly from the injury, but after awhile it grew better and he bade fair to get well. Later, however, his speech became affected; growing gradually more so until he could scarcely talk. The operation after two years resulted in finding a piece of the skull pressing on the brain and with its removal relief will very probably come.
