About two weeks ago Mrs. Jasen Underwood accidentally ran a brass pin in the thumb of her left hand and a few days after her thumb began to cause her great pain and became swollen almost to bursting. For three or four days and nights she suffered the most excruciating pain; it was at one time thought that blood poisoning had set in, and that that member would have to be amputated, but under the skillful treatment of Dr. Irwin the swelling has been reduced and the pain allayed; she is now getting along nicely.

On last Friday, Edward Sprow, who had been confined in the Pest House at Altoona for several months, affected with the smallpox, arrived in town on the 8 o'clock p. m. train, but met with a cool reception. Persons with whom he was well acquainted fled from him as from a pestilence from fear of becoming infected with the loathsome disease. His own mother-in-law refused him admittance to her home, where his wife was staying, and begged him not to come in to the house, although he was armed with a discharge from the physician in charge to the effect that he was perfectly cured of the disease and not the slightest danger of infection existed. He then went to Philip Idding's home, a couple miles below town, when he was also refused admittance at first, but was finally allowed to stay. Mr. Sprow is a man of industrious habits and excellent reputation and would never have thought of coming to his home if there had been the least danger of contagion.
